Title	The Convention refugee determination process in Canada
Author, Place of publication, Publisher, Date of publication, Pagination	by M. Young. Ottawa : Library of Parliament, Research Branch, 1987. 13 p. Bibliogr. (Current issues review ; 86-26E) <i>French ed. (La reconnaissance au Canada . . .) on the same fiche.</i>
Series statement	ISBN 0-660-12567-6 MICROLOG 88-00800 1 fiche
Notes	
ISBN	
Microfiche	
Accession Number	
Abstract	The increase of refugee status claiming immigrants in Canada has led to a review of the immigration policy concerning this group. This report looks at the weaknesses of current legislation which is linked to the Geneva Convention and its Protocol, studying Canada's past adherence to the rights afforded under its protection. Also discusses public and government opinion on support for a humanitarian and generous refugee policy and questions of balancing efficiency with procedural fairness to claimants. Gives a chronology of events since 1969.

Introduction

The **Canadian Research Index - Microlog** puts all of Canada's hard-to-find government and research literature at your fingertips. **Canadian Research Index** in print is a monthly indexing and abstracting service. An electronic version on CD-ROM or via the Internet is also available. **Microlog** represents our fulltext document service. Most titles included in **Canadian Research Index** are available in paper as well as microfiche format. Together, these services are a powerful tool for finding Canadian report publications.

The **Canadian Research Index** includes scientific and technical research papers in physical, natural and social sciences. It also includes policy papers, important statistical publications, and annual reports.

Documents issued in English or French are catalogued, indexed and abstracted in the language of the publication, while bilingual documents are catalogued, indexed and abstracted in both languages.

Every effort is made to ensure the currency of the index. For instance, documents appearing in the checklist of Canadian Government Publications are delivered by the **Microlog Service** approximately two months after publication of the list.

SOURCES

- government publications from the federal, provincial and municipal levels
- depository publications of reference value
- non-depository publications issued by government organizations, laboratories and research centres
- non-profit organizations, educational institutions and research groups
- some monographs and serials issued by Statistics Canada

ORGANIZATION

Canadian Research Index comprises the following sections:

Titles and abstracts: A full bibliographic citation and a descriptive abstract for each title.

Corporate name index: Access by controlled format corporate names based on Canadiana Authorities.

Personal name index: Access by personal name.

Subject index: Subject terms based on Library of Congress and Canadian Subject Headings are assigned to each document. A cross-referencing structure assists searchers.

Series titles: Lists by title and numbers all reports in a series; series are available as an on-going subscription or retrospective collection.

Microfiche collections: Lists contents of each fiche collection for quick reference. These collections can be used as current awareness lists in broad subject areas to notify users of new acquisitions.

ELECTRONIC ACCESS

The full **Canadian Research Index** file from 1982 to date is available in electronic formats on the SilverPlatter SPIRS platform. It is accessible on CD; it may be licensed for network use on a local server or on a SilverPlatter ERL server; and it is available for Internet subscription. Reports may be ordered through the National Technical Information Service in the U.S.A., or directly through **Micromedia's Technical Information Centre**. All catalogued documents issued by Statistics Canada are now included in electronic versions of **Canadian Research Index**. For information, contact Micromedia's CD Centre at 1-800-387-2689.

DOCUMENT DELIVERY

The unique **Microlog Accession Number** is the key to immediate retrieval of any document. Most documents cited in **Canadian Research Index** are available as part of the **Microlog Microfiche Subscription Service**, institutions may subscribe to complete or partial collections of the documents in the Index. Individual copies on microfiche or paper reprints may be ordered through **Micromedia's Document Delivery Service**. To order, please contact:

Introduction

Microlog : Index de recherche du Canada met à votre disposition toutes les publications du gouvernement et les travaux de recherche difficiles à se procurer. L'**Index de recherche du Canada** imprimé est un service mensuel d'indexation et de résumés. Une version électronique est également offerte sur CD-ROM ou dans Internet. **Microlog** représente notre service de documents en texte intégral. La plupart des titres figurant dans l'Index sont disponibles sous forme imprimée et sur microfiche. Ces services combinés constituent un outil très efficace pour retrouver les publications des différents gouvernements du Canada.

L'Index contient entre autres des recherches en sciences physiques, naturelles et sociales, des énoncés de politique, des statistiques et des rapports annuels.

Les ouvrages publiés en français ou en anglais sont indexés et résumés dans la langue de publication; les ouvrages bilingues sont traités dans les deux langues.

De vastes efforts sont déployés pour assurer la pertinence de l'index. Par exemple, on peut obtenir les documents qui figurent sur la Liste des publications du gouvernement du Canada environ deux mois après leur parution sur cette liste.

SOURCES

- publications fédérales, provinciales et municipales
- publications déposées servant de référence
- publications non déposées publiées par les organismes gouvernementaux, les laboratoires et les centres de recherche
- publications d'organismes à but non lucratif, d'établissements d'enseignement et de groupes de recherche
- certaines monographies et publication en série publiées par Statistique Canada

ORGANISATION DE L'INDEX

L'**Index de recherche du Canada** comprend les sections suivantes :

Titres et résumés: tous les titres sont catalogués et accompagnés d'un résumé descriptif.

Index des dénominations sociales: donne un accès par dénominations sociales fondées sur les vedettes d'autorité du service Canadiana.

Index des noms: donne un accès par auteur.

Index des matières: des descripteurs fondés sur les vedettes matières des documents Library of Congress

Subject Headings et Canadian Subject Headings sont associés à chaque publication; un réseau de renvois facilite la recherche.

Titres de collections: tous les rapports publiés en série sont classés par titre et numéro. Ces documents sont disponibles par le biais d'un abonnement permanent et ils sont aussi intégrés à une collection rétrospective.

Collections de microfiches: chaque collection apparaît dans une section séparée pour faciliter la recherche. Ces listes peuvent aussi servir à renseigner les usagers sur les nouveautés.

ACCÈS ÉLECTRONIQUE

Le fichier complet de l'**Index de recherche du Canada**, de 1982 à aujourd'hui, est disponible sous forme électronique à partir de la plate-forme SilverPlatter SPIRS. Il est offert sur CD-ROM et il est possible d'obtenir des licences d'utilisation en réseau pour un serveur local ou pour un serveur SilverPlatter ERL. Il est également disponible par le biais d'un abonnement Internet. Les rapports peuvent être commandés par l'intermédiaire du National Technical Information Service aux États-Unis ou encore directement au **Centre d'information technique de Micromedia**. Tous les documents catalogués publiés par Statistique Canada sont intégrés dans les versions électroniques de l'Index de recherche du Canada. Pour plus de détails, contactez le personnel de Micromedia au 1 800 387-2689.

LIVRAISON DE DOCUMENTS

Le numéro d'accès unique de **Microlog** est la clé qui permet de repérer immédiatement tout document. La majorité des documents cités dans l'**Index de recherche du Canada** sont offerts par le service d'abonnement aux microfiches de **Microlog**. Les organismes peuvent s'abonner à l'ensemble ou à certaines des collections de documents de l'Index. On peut également commander des reproductions de documents sur microfiches ou sur papier par l'intermédiaire du service de livraison de documents de **Micromedia**. Pour commander, communiquer avec:

Micromedia Ltée
Centre d'information technique

courrier électronique: tic@micromedia.on.ca

Sample CRI Search

*“How can a person from a foreign country
qualify for refugee status in Canada?”*

The researcher can search in CRI as in any library catalogue - by subject, author and title.

Because the index is bilingual, searching can be done in English or in French.

Recherche type avec IRC

*“Comment une personne d'un pays étranger
peut-elle demander le statut de réfugié au Canada?”*

La méthode de recherche dans IRC est la même que dans une bibliothèque, puisque les documents sont indexés par auteur, par sujet et par titre. L'index étant bilingue, la consultation peut se faire en français ou en anglais.

STEP 2/DEUXIÈME ÉTAPE

A unified search strategy

The search strategy should include all the monthly
issues. Start with the most recent issue and work back.
Monthly issues are cumulated annually.

Établir une stratégie de recherche unifiée

La stratégie de recherche doit tenir compte de toutes
les publications mensuelles, à commencer par les plus
récentes. Chaque année, ces publications font l'objet
d'une refonte.

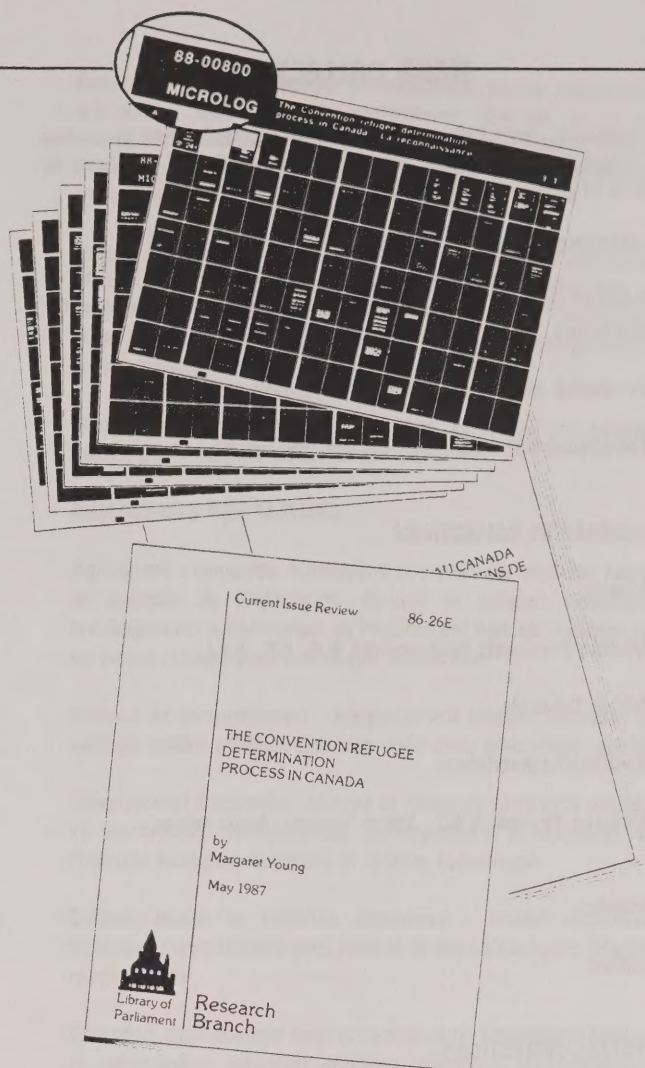

STEP 3/TROISIÈME ÉTAPE

Retrieve the publication

Each bibliographic citation gives a full description of the relevant document. Locate the document by the microfiche number in the library's collection or order from Micromedia. Individual publications are available for purchase on microfiche or paper. The bibliographic description provides publisher source information.

Repérer la publication

Chaque notice bibliographique comprend une description complète du document; celui-ci peut être repéré grâce au numéro de microfiche de la bibliothèque; sinon, il faut le commander à Micromedia. On peut se procurer les monographies sur microfiches ou sur papier. La description bibliographique comporte également des indications sur l'éditeur.

FICHE COLLECTIONS

Documents from CRI are available on microfiche through various subscription plans ranging from the complete collection to subsets by level of government (jurisdiction), geographic area, or subject.

JURISDICTION COLLECTIONS

Federal: titles issued at the federal level, both depository and non-depository

Provincial: titles issued by provincial governments

Local/Municipal: titles issued by local governments

GEOGRAPHIC COLLECTIONS

Alberta

Atlantic Provinces: Newfoundland, N.S., N.B., P.E.I.

British Columbia

Manitoba/Saskatchewan

Northern Regions: N.W.T., Yukon Territory, Arctic regions

Ontario

Quebec

SPECIAL COLLECTIONS

Critical issues: documents from Canadian jurisdictions on issues that receive public attention and are the subject of debate

Fisheries and Oceans Canada: documents published by the Dept. of Fisheries and Oceans

Canada Centre for Mineral and Energy Technology (CANMET): documents published or contracted out by the Centre

Depository Collection: documents published by the federal government issued through the Federal Depository Program

FEARO: documents published by the Canadian Environmental Assessment Research Council (CEARC) and/or the Federal Environmental Assessment Research Office (FEARO)

Non-Depository Collection: documents published by the federal government, not issued through the Federal Depository Program. Available as a complete collection or as a science or social science sub-collection

ONTERIS (ON COLLECTION): ONTERIS documents for which we have microfilming rights and which meet our inclusion policy

COLLECTIONS DE MICROFICHES

Les publications incluses dans l'IRC sont en vente sur microfiches, en collection complète ou en collections plus petites regroupant des titres par juridiction, par aire géographique ou par matière.

COLLECTIONS GOUVERNEMENTALES

CA **Fédéral :** publications émises par le gouvernement fédéral, régies ou non par le Programme de dépôt

PR **Provincial :** publications émises par les gouvernements provinciaux.

MU **Local/Municipal :** publications émises par les gouvernements locaux et municipaux

1994 GTA residential land inventory survey : final report

Toronto : Ministry of Housing ; Canada Mortgage & Housing Corporation, 1994. iii, 44 p. : ill. MICROLOG 96-07312 (1 fiche)

This survey provides a data source on housing unit supply by stage in the development approvals process in the Greater Toronto Area (GTA), with the aim of contributing to the identification of potential land supply problems in the GTA and to foster inter-governmental co-operation. Information for the survey was collected in early 1994 and is based on data in municipal records. The survey identified over 200,000 units in active development applications across the GTA, including single-detached, semi-detached, apartment, and other units. The report estimates the potential duration of a unit supply based on a low, medium, and high absorption scenarios. The report includes an outline of the survey methodology, an analysis of current economic conditions in the GTA and their possible impacts on the housing market, and the results of the survey at the GTA, regional municipal, and local levels. 1994 juvenile and adult coho salmon enumeration studies at Black Creek, Vancouver Island

By T.C. Neilson, J.R. Irvine and R.E. Bailey. Nanaimo, BC : Fisheries & Oceans Canada, Science Branch, Pacific Biological Station, 1996. x, 67 p. : ill., Bibl. (Canadian manuscript report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2356 ISSN 0706-6473) MICROLOG 96-07519 (1 fiche)

This report presents results of the coho salmon (*Oncorhynchus kisutch*) smolt enumeration and coded-wire tagging study, and summarizes the adult coho fence count and upstream mark-recapture escapement studies at Black Creek during the current year. It includes methods and results for spring and fall field studies. BC CA CF FI ND SC

Aboriginal rights -- Rev.

By Jane Allain and Elaine Gardner-O'Toole. Ottawa : Library of Parliament, Research Branch, 1995. 37 p. : Bibl. (Current issue review / Canada. Library of Parliament. Research Branch ; 89-11E) French ed. (*Les Droits des autochtones*) on the same fiche. Revised 29 September 1995. ISBN 0-660-16329-2 CCG-P no. YM32-1/89-11-1995-09E MICROLOG 96-07326 (1 fiche)

The concept of "aboriginal rights" is difficult to define succinctly. This discussion of two competing aboriginal rights theories illustrates the complexity of the issue, and serves as background to current legal and constitutional debates. CA CI DE JU NP SS

Aboriginal self-government -- Rev.

By Jill Wherrett and Jane Allain. Ottawa : Library of Parliament, Research Branch, 1995. 24 p. : Bibl. (Current issue review / Canada. Library of Parliament. Research Branch ; 89-5E) French ed. (*L'Autonomie gouvernementale des autochtones*) on the same fiche. Revised 22 August 1995. ISBN 0-660-16327-6 CCG-P no. YM32-1/89-5-1995-08E MICROLOG 96-07327 (1 fiche)

The issue of aboriginal self-government has risen to particular prominence over the last 15 years as aboriginal people across the country have sought control over their political institutions and governing authority in a variety of areas. This document looks at aboriginal self-government. Topics covered are: background; the Indian Act; Special Committee on Indian Self-Government; the government's policy on aboriginal self-government; legislative initiatives to recognize aboriginal self-government; and constitutional reform. Accumulation of fish mixed function oxygenase inducers by semipermeable membrane devices in river water and effluents, Athabasca, Peace and Wapiti rivers, August and September, 1995

By: J.L. Parrott...et al. Edmonton : Northern River Basins Study, 1996. viii, 62 p. : ill., Bibl. (Northern River Basins Study project report / Northern River Basins Study (Canada) ; no. 127 ISSN 1192-3571) ISBN 0-662-24726-4 CCG-P no. R71-49/3-127E MICROLOG 96-07158 (1 fiche)

This study used semipermeable membrane devices (SPMDs) to identify industrial effluents that induce mixed function oxidase (MFO) activity in fish cell lines. Investigators deployed SPMDs for two weeks at three pulp mills and one oil sands facility, and at two tributaries near Fort McMurray, Alberta. SPMDs provided samples of known exposure time in effluents and river waters by simultaneously sampling the effluent stream and the river upstream and downstream of the mixing zone at each site. In addition, the investigators conducted laboratory experiments with rainbow trout to quantify the MFO response in fish exposed to various concentrations of the oil sands effluent. The Acetylcholinesterase oxime reactivator HI-6 in man : pharmacokinetics and tolerability in combination with atropine

John G. Clement...et al. Raiston, AB : Defence Research Establishment Suffield, 1995. 12 p. : Bibl. Presented at the United States Army Medical Research Biosciences Review. In *Biopharmaceutics and Drug Disposition* : vol. 16, 1995. MICROLOG 96-07586 (1 fiche)

Standard treatment of nerve agent poisoning utilizes atropine and an oxime such as pyridine 2-aldoxime or toxogonin, but these drug combinations are relatively ineffective in treating poisoning from certain nerve agents such as soman. Previous research has shown that HI-6, a bispyridinium oxime, may be a superior oxime for treatment of nerve agent poisoning. This report describes a study to evaluate ascending single dose pharmacokinetics and tolerability following intramuscular injection of HI-6 with atropine in healthy men. Results presented include mean plasma HI-6 concentration/time profiles for each dose, vital signs in the subjects, and adverse drug experiences observed. CA LS ND SC

Achieving employment equity, a manual for practitioners

MacLeod Consulting Services Ltd. Toronto : Ontario Women's Directorate, 1985. 195 p. : *Bibl.* ISBN 0-7729-0721-8
MICROLOG 96-07231 (3 fiche)

This manual is designed as a reference document to assist the practitioner charged with responsibility for developing and managing an organisation's employment equity initiatives. It begins with overview chapters on the status of women, benefits of equity, and the language of equity programs. It then provides sections on assessing the internal and external climate, including employment legislation and organisational structures; determining the equity status of the organisation; developing an action plan; implementing the plan; and monitoring and evaluating the equity plan.

MICROLOG 96-07646 (4 fiche)

La rencontre internationale francophone sur la prévention des conflits avait deux objectifs principaux. Premièrement, elle voulait susciter une réflexion sur les nouvelles réalités affectant la sécurité et la stabilité du continent africain. Deuxièmement, elle désirait encourager les participants à tirer les leçons qui s'imposent suite aux différentes expériences en matière de diplomatie préventive. En termes pratiques, ces délibérations et réflexions devaient contribuer, dans un premier temps, à améliorer la capacité de la Francophonie et de ses pays membres dans le domaine de la diplomatie préventive pour ensuite mener à une coopération plus étroite avec l'ONU et l'OUA.

Advance Formation, stratigraphy and biostratigraphy of a new Ordovician formation from the Rocky Mountains, northeastern British Columbia

Papers by B.S. Norford... et al. Ottawa : Natural Resources Canada, Geological Survey of Canada, 1996. 129 p. : *Ill.*, *Bibl.* (Bulletin / Geological Survey of Canada ; 491) ISBN 0-660-16226-1 CCG-P no. M42-491E
MICROLOG 96-07273 (2 fiche)

The Advance Formation is a thin stratigraphic unit in the Williston Lake region of British Columbia, having a very restricted lateral distribution beneath a regional sub-Upper Ordovician unconformity. The formation consists of thinly bedded carbonates and shales deposited in a slope environment in three depositional episodes. Rocks of this age and lithology are unique in western Canada. The formation also contains abundant fossil brachiopods associated with several other fossil groups, including some of the oldest known solitary corals in North America. This publication complex six papers on the Advance Formation, covering its stratigraphy, depositional environment, and biostratigraphy; brachiopod palaeontology; coral palaeontology and palaeoecology; bryozoa palaeontology; gastropod palaeontology; and pelecypod palaeontology and palaeoecology.

AECB Workshop on Seismic Hazard Assessment in Southern Ontario

By J.C. Stepp... et al. Ottawa : Atomic Energy Control Board, 1995. vii, 15 p. (Report / Canada. Atomic Energy Control Board ; INFO-0604)
MICROLOG 96-07532 (1 fiche)

Reports on a workshop held to review available geological and seismological data on earthquake occurrence in southern Ontario and to develop a consensus on approaches that should be adopted for characterisation of seismic hazard. The workshop was structured in technical sessions to focus presentations and discussions on the following four issues: the importance of geological and geophysical observations for the determination of seismic sources; methods and approaches which may be adopted for determining seismic sources based on integrated interpretations of geological and seismological information; methods and data which should be used for characterising the seismicity parameters of seismic sources; and methods for assessing vibratory motion ground hazard. Session formats involved invited presentations followed by

open presentations of participants, a general discussion, and development of conclusions and recommendations.

Aging in place : strategies to meet the needs of senior tenants in non-profit housing

By Christine K. Davis. Ottawa : Canada Mortgage & Housing Corporation, Socio-Economic Policy & Research Division, 1996. vi, 93 p. : *ill.*, *Bibl.* MICROLOG 96-07430 (2 fiche)

Ageing in place is a process which enables elderly people to grow older in the familiar and comfortable surroundings of their own homes while providing them with the assistance needed to maintain a relatively independent life style. This report describes a study commissioned to find which building and apartment design features and service delivery mechanisms for ageing in place are possible and preferred. The main goal of the study was to explore options that could enable senior tenants in non-profit housing to continue to live independently in their homes for as long as possible. Study methodology included a survey of senior tenants, housing managers, and support service providers in Nova Scotia, and an architectural evaluation of

six typical seniors' building styles. Results presented include profiles of seniors living in Nova Scotia non-profit housing, their housing and support needs, the concerns of housing managers, and strategies that can support ageing in place. The report ends with examples of initiatives to assist ageing in place (physical design modifications and access to support services).

Agri-Food Innovation Fund : strategic overview

Ottawa : The Government ; Regina : The Province, 1996. 19 p. : *ill.* On cover: *Canada-Saskatchewan Agri-Food Innovation Agreement.* MICROLOG 96-07121 (1 fiche)

The Agri-Food Innovation Fund will invest \$91 million in the Saskatchewan agri-food sector by 2000. The Fund was established to address new and emerging primary production, sustainable agriculture and value-added activities. This document reviews the structure of the Fund and its governing federal/provincial agreement, and profiles the eight strategic areas that the Fund board has identified as needing attention: biotechnology, food processing, horticulture, information technology, non-food processing, special crops, specialised livestock, and sustainable agriculture. For each area, the document reviews a strategic vision and lists priority areas and objectives for project funding.

An Agriculture 2000 strategy, addressing issues : progress report, 1995

Regina : Saskatchewan Agriculture & Food, 1996. 22 p. MICROLOG 96-07113 (1 fiche)

Extensive consultations with farmers and the agri-food industry in Saskatchewan produced Agriculture 2000, a strategy having three main focuses: changes to individual farms, developing value-added production, and institutional development. This progress report reviews issues addressed by the strategy, including the rural population, costs, transportation, marketing, trade agreements, crop insurance, farm debt, agricultural research, and environmental sustainability. It then summarises partnerships and initiatives of Saskatchewan Agriculture & Food, such as programs relating to research and development, sustainable agriculture, market development, livestock operations, and departmental reforms. Finally, the report presents a perspective on Saskatchewan agriculture in 1995.

Air dispersion modelling of roaster stack emissions, Royal Oak Giant Yellowknife Mine, Yellowknife, Northwest Territories -- Rev.

M.M. Dillon Ltd. Yellowknife : Northwest Territories Renewable Resources, 1995. 31 p. : *Bibl.* MICROLOG 96-07368 (1 fiche)

Gold ore processing at the Giant Yellowknife Mine includes a roasting process that produces an off-gas rich in sulphur dioxide and arsenic trioxide. This report describes an air dispersion modelling study conducted to aid in understanding how the roasting process emissions are carried by the wind away from the mine and to provide a planning tool to assess potential measures for reducing air pollution. Sections of the report cover background information about the site, the emission source, and local meteorology; model selection, the configuration of selected model runs, and baseline modelling results; modelling results in comparison with ambient air pollution monitoring results; and a sensitivity analysis where the individual and combined effects of stack discharge parameters and mass emission rates are evaluated. The model also predicted what the changes in pollution levels would be if certain changes were made to the roaster stack.

Alberta. Ministry of Energy : Annual report 1995-96

Edmonton : The Ministry, 1996. 96 p. : ill.
ISSN 0832-6878
MICROLOG 96-07594 (2 fiche)

The Ministry of Energy's mission is to ensure Alberta's energy and mineral resources are developed and used in an effective, orderly and environmentally responsible manner in the interests of Albertans. Its responsibility includes oil, natural gas, oil sands, hydrogen, coal, electricity and mineral resources. This responsibility encompasses two distinct areas: the Dept. of Energy and the Alberta Energy and Utilities Board. This annual report presents the activities of these two distinct areas. Financial statements for various areas inside the Dept. are included as well as audited financial statements for the Board.

Alberta traffic collision statistics, 1995

Edmonton : Alberta Transportation & Utilities, Transportation Safety & Carrier Services Branch, 1996. xlii, 78 p. : ill.
MICROLOG 96-07151 (1 fiche)

This report provides an overview of traffic collision data for Alberta during the year, with particular attention paid to collisions which resulted in death or injury. The information in the report is based on data collected from standardized collision report forms which are required to be filled out for every traffic collision in the province that results in either death, injury, or property damage to an apparent extent of \$1,000 or more. Statistics and commentary are included on when the collisions occurred, the victims, the drivers, the vehicles involved, the environment at time of collision, collisions involving specific types of vehicles, collisions involving pedestrians and bicyclists, and traffic safety issues such as the condition of the driver and the involvement of drinking drivers in casualty collisions.

Analyse avantages-coûts d'autobus urbains allégés

Préparé pour Centre de développement des transports, Politiques et coordination, Transports Canada; par Sylvie Corbell, Jean Hardy, Marie Mantha. Montréal: Beauchemin-Beaton-Lapointe Inc., 1995. xli, 117 p.: ill., *Bibl.* L'éd. anglaise (*Cost/benefit analysis of lighter...*): 96-05694/2. MICROLOG 96-07494 (2 fiche)

Cette étude fait une évaluation du rapport efficacité-coût des autobus urbains allégés. Elle vise à sensibiliser et à encourager les gouvernements et l'industrie à investir les fonds nécessaires dans le développement et la mise en service de ce type d'autobus. Le poids à vide des autobus urbains au Canada s'est accru de 25% entre 1972 et 1992 et des coûts sont associés à l'opération d'autobus plus lourds. Cette étude identifie ces coûts et évalue les avantages reliés à l'opération d'autobus allégés.

Analysis of ground aircraft de/anti-icing laboratory holdover time and physical properties

By Patrick R. Louchez, Jean-Louis Laforte and Alexandre Zouzou. Montréal: Transportation Development Centre, Safety & Security, 1996. xiv, 135 p.: ill., *Bibl.* On title page: *Anti-Icing Materials International Laboratory, Groupe de recherche*

en Ingénierie de l'environnement atmosphérique, Université du Québec à Chicoutimi. MICROLOG 96-07495 (2 fiche)

Presents results from a research program conducted to develop a numerical simulation to predict the protection provided by commercial Type I and II de/anti-icing fluids, particularly under water spray endurance test (WSET) conditions, and to measure pertinent fluid physical properties. Investigators established an isothermal model representing the WSET situation, describing the downstream velocity, fluid dilution, and thickness with equations reduced to their simplest form. The simulation computes, beyond freezing, the ice progression down the plate. Comparisons are made between modeling results, analytical solutions, and experimental observations of the fluid thickness and holdover time in a cold chamber. The experimental work focused on six representative fluids at various concentrations and temperatures. Measured properties included density, viscosity, surface tension, water diffusivity, thermal conductivity and diffusivity, heat of water-fluid mixing, and freezing point.

Analysis of the contaminant plume in the Oak Ridges Aquifer: report

By I. Proulx and R.N. Farvolden. Toronto: Environment Ontario, Research & Technology Branch, Environmental Research, 1989. vi, 134 p.: ill., *Maps, Bibl.* ISBN 0-7729-5889-0. MICROLOG 96-07394 (2 fiche)

The Oak Ridges Aquifer provides water to municipal, industrial, and domestic wells throughout the region of the Oak Ridges Moraine. Local contamination of this valuable resource stems from solid wastes buried in the Halton Till which caps the main aquifer unit, and from liquid industrial wastes dumped in kettles at the Stouffville landfill site. This report presents results of a monitoring program used to follow the extent of the zone of contaminated water with time and to delineate its shape. The investigators studied the hydrochemical processes occurring in the contaminant plume and used tritium to delineate zones of groundwater of different ages and to relate these zones to plume development. They tested the influence of recharge and heterogeneous stratigraphy in the aquifer on the plume using flow model simulations. An analytical transport model was used to obtain estimates of the hydrologic factors controlling the plume evolution.

Annotated bibliography of nearshore fish habitat maps for the Strait of Georgia

By J. Lessard... et al. West Vancouver, BC: Dept. of Fisheries & Oceans, Science Branch, West Vancouver Laboratory, 1996. iv, 31 p. (Canadian manuscript report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans; no. 2350 ISSN 0706-6473) *Diskette not included with microfiche.* CCG-P no. F97-4/2350E. MICROLOG 96-07489 (1 fiche)

Effective management of British Columbia's foreshore fish habitat requires access to mapped

information, but many habitat maps have not been published or widely distributed. This bibliography lists maps made over the past 20 years that relate to nearshore fish habitat in the Strait of Georgia, excluding habitats in the Fraser River estuary and Burrard Inlet. The bibliography not only includes maps distributed through journal articles, numbered report series, or other media normally used in scientific communication, but also unpublished maps. Entries are arranged by district within the Strait. For unpublished maps, annotations are provided giving such information as map date and scale, author(s), habitat classification system used, base map if known, air photos used and date, extent of study area, description of map, whether there is accompanying text, and name of organisation where map can be obtained.

Application of R-2000 and advanced house energy standards in affordable homes in Canada

By R. Kevin Lee. Ottawa: Dept. of Natural Resources Canada, Energy Technology Branch, Energy Sector, CANMET Energy Technology Centre, 1995. v, 41 p.: ill., *Bibl.* CANMET 23440-4-1035/01-SQ. MICROLOG 96-07560 (1 fiche)

This report provides a survey of some of the potential energy efficiency upgrades available on the Canadian market for application to low-cost housing and reviews the incremental cost, performance, and potential for acceptance of various options. Upgrades are evaluated on the basis of implementation in a model affordable home, a 93-square-metre narrow-front row house. Upgrade packages for meeting multi-unit R-2000 and Advanced House energy standards are assembled for semi-detached and middle units for five representative cities from Halifax to Vancouver. Cost effectiveness analysis is based on a cash flow index which measures the principal, interest, tax, and energy payment savings associated with upgrading. The effect on cost effectiveness of an energy-efficient mortgage discount is also examined.

Aquatic plant and algae control -- Rev.

Toronto: Ministry of the Environment; Ministry of Natural Resources, 1989. 28 p.: ill., *Bibl.* MICROLOG 96-07384 (1 fiche)

Aquatic plants, a natural part of a healthy aquatic ecosystem, are beneficial but can have a detrimental effect if present in excess amounts. This publication reviews the types of aquatic plants and the species typically found in Ontario inland waters, and presents a guide for controlling those plants. Control techniques reviewed include habitat manipulation, biological control, mechanical methods, and the use of herbicides. Legal requirements for controlling aquatic plants in Ontario are noted, including those relating to the use of herbicides and the types of licenses or permits needed. The final chapter describes how to calculate the amount of herbicide for a control treatment and includes ex-

ample calculations.

Assessing pulp mill contamination using morphological deformities in chironomid larvae (Diptera Chironomidae) upper Athabasca River, April, 1992

By William F. Warwick. Edmonton : Northern River Basins Study, 1996. vi, 18 p. : *Ill., Bibl.* (Northern River Basins Study project report / Northern River Basins Study (Canada) ; no. 140 ISSN 1192-3571) ISBN 0-662-24833-3 CCG-P no. R71-49/3-140E
MICROLOG 96-07156 (1 fiche)

Chironomid (midge) larvae are considered good environmental indicators and have been used in prior research to test the sub-lethal responses of aquatic invertebrates to nutrient-rich wastes and pollution in aquatic ecosystems. This report describes a project conducted to provide baseline information on the occurrence and spatial distribution of chironomid deformities in depositional areas of the upper Athabasca River. Data were supplemented by identification and counts of individual chironomid taxa, allowing an evaluation of spatial trends in the incidence of deformities relative to known point-source effluents. The influence of effluents on chironomid community diversity is also noted. Possible explanations for the observed trends are given.

An Assessment of the utility of benthic macroinvertebrate and fish community structure in biomonitoring, Peace, Athabasca and Slave River basins

By Kevin J. Cash... et al. Edmonton : Northern River Basins Study, 1996. vi, 210 p. : *Ill., Bibl.* (Northern River Basins Study project report / Northern River Basins Study (Canada) ; no. 123 ISSN 1192-3571) ISBN 0-662-24837-6 CCG-P no. R71-49/3-123E
MICROLOG 96-07359 (3 fiche)

Data on benthic macroinvertebrate and fish community structure are widely recognised as being very useful in cumulative assessment and issues of ecosystem health and integrity. Measurements of aquatic community structure have been made periodically within the northern Alberta river basins over the past 30 years, but these data have not been standardised or co-ordinated, nor analysed to determine their appropriateness or to assess the general state of the aquatic ecosystem. This report describes efforts to assess the nature and quality of long-term data sets measuring benthic invertebrate and fish community structure and effluent loading within the Peace, Athabasca, and Slave river drainages. Information was collated and standardised to assess the utility of applying current biomonitoring techniques to these data, and recommendations were made on the most appropriate approaches to use in a long-term cumulative effects monitoring plan.

The City of Fredericton has been manually processing from 1,100 to 1,500 building permit applications per year. An automated permitting system would circumvent the delays and duplication inherent in a manual system, while improving the quality and quantity of information available and making it accessible to more staff and to several departments. This document presents a case study of this system. Topics covered are: project description; system requirements and recommendations; project background; and, regulatory reform initiatives and impact on housing cost, choice and quality.

L'Autonomie gouvernementale des autochtones -- Rév.

Par Jill Wherrett et Jane Allain. Ottawa : Bibliothèque du Parlement, Service de recherche, 1995. 27 p. : Bibl. (Bulletin d'actualité / Canada. Bibliothèque du Parlement. Service de recherche : 89-5F) L'éd. anglaise (Aboriginal self-government) sur la même fiche. Révisé le 22 août 1995. ISBN 0-660-95173-8 GCC-E no YM32-1/89-5-1995-08F
MICROLOG 96-07327 (1 fiche)

La question de l'autonomie gouvernementale des autochtones a pris une importance particulière au cours des 15 dernières années, soit depuis que les autochtones de tout le pays cherchent à prendre en mains leurs institutions politiques et à exercer leur autorité dans une variété de secteurs. Ce document porte précisément sur l'autonomie gouvernementale des autochtones. Les points suivants sont examinés : contexte; la Loi sur les Indiens; le Comité spécial sur l'autonomie politique des Indiens; politique fédérale en matière d'autonomie gouvernementale; mesures législatives en vue de la reconnaissance de l'autonomie gouvernementale des autochtones; et, réforme constitutionnelle.

Ben Nevis, Munro, Kamiskotia, and other base metal areas, districts of Cochrane and Timiskaming : Ranger Lake and Garden River area, District of Algoma : certain lead-zinc deposits in the District of Algoma

By T.L. Gledhill and M.E. Hurst. Toronto : Dept. of Mines, 1929. vi, 85 p. : ill., Maps, Bibl. Published as vol. XXXVII, part III, of the Ontario Dept. of Mines annual report, 1928.
MICROLOG 96-07299 (2 fiche)

The main part of this report describes a group of townships immediately north of Larder Lake, Ontario, and west of the Quebec border (within the Cochrane and Timiskaming districts). It begins with introductory sections on prospecting for base metals in Ontario and on geophysical prospecting in general. It then describes the physical characteristics of the area and its general geology (Precambrian volcanics and intrusives) and geological structure. A final section on economic geology gives information on the types of mineral deposits in the area and on mine developments, ore deposits and mineralogy, base metal prospects, and mining claims. The second part of the report covers the Ranger Lake/Garden River area (about 30 miles north-east of Sault Ste. Marie), describing its topography, general geology, and base metal mining prospects. The third part describes five lead-zinc mine properties and prospects located west of the Ranger Lake/Garden River area.

Benchmarks for Alberta's post-secondary education system : a discussion paper

Edmonton : Alberta Advanced Education & Career Development, 1996. 10 p.
MICROLOG 96-07432 (1 fiche)

Benchmarks are best known practices indicating superior performance, and are adopted as targets for optimal organisational performance. This paper presents some underlying principles and constraints that need to be considered in the development of benchmarks for Alberta's higher education system. Including their application in performance-based funding for institutions. Criteria and constraints considered in the paper include level of comparison, comparison group, baseline and range, meaning and interpretation, and direction toward which the institution should strive. Bench-

marking within the context of the report card is also discussed. The paper ends with highlights of a proposal for a benchmarking exercise and a schedule of further activities in related projects.

Best value for tax dollars, improving service quality in the Ontario Government : a report to the Ontario public service

Continuous Improvement Services Inc. and Erin Research Inc. Toronto : The Province, 1992. xii, 185 p. : ill.
MICROLOG 96-07333 (3 fiche)

Presents research commissioned by the Ontario government to determine what the public and Ontario Public Service (OPS) employees think about provincial government service generally. Research activities included focus groups, a private think tank session, parallel surveys of the public and OPS employees, and a series of strategy formulation workshops. The research assessed public opinion in relation to those services directly provided by the OPS and excluded those provided by third parties such as hospitals and schools. Four direct service businesses were investigated: registration, information, financial assistance, and enforcement/justice. Gaps in service quality are identified and strategies to deal with those gaps are presented. The survey results include the public view of OPS service quality, and the OPS view of service to the public and of internal customer service. The appendix includes copies of the survey questionnaires.

Blueprint for the Office of the Ombudsman in Ontario

By Arthur Maloney. Toronto : The Office, 1979. v, 598 p. : Bibl.
MICROLOG 96-07700 (7 fiche)

This report presents the first Ontario Ombudsman's study of the functions of the office of Ombudsman as it evolved in the province, extending to wherever such an office existed throughout the world. The goal of the report is to produce a document which would provide a basis not only for the organisation and operation of the Ontario Ombudsman's office but also for discussion of the role of the office in its larger context, with suggestions of directions that the office might take now and in the future. It reviews the organisation of the Ontario office, the office of Ombudsman from the point of view of the Ontario public, and the various legislative debates regarding the office of ombudsman in other provinces and Commonwealth countries. A literature review on the ombudsman includes discussion of such matters as the character and role of that office, relations with the rest of government, and the ombudsman's jurisdiction. A separate section contains information and descriptive analyses of om-

budsman offices in other jurisdictions around the world. The report concludes with recommendations for a model Ombudsman's office for Ontario, including suggested amendments to the Ombudsman Act. The appendix includes a report on the organization of the Office of the Ontario Ombudsman and text of the 1975 Ombudsman Act.

Le Calcul des peines : guide pour les juges et les avocats

Ottawa : Solliciteur général Canada, 1996. vi, 65, vi, 61 p. *Bilingue (Sentence calculation...)*. ISBN 0-662-62186-7 GCC-E no JS42-70/1996
MICROLOG 96-07458 (2 fiche)

Bien des gens trouvent que les dispositions législatives relatives au calcul des peines pénales sont complexes. Ce guide se penche sur cette question et sur bien d'autres semblables. Il est conçu comme document de référence pour les juges et les procureurs de la Couronne et autres membres du personnel de la justice pénale qui désirent élargir leurs connaissances de l'administration et du calcul des peines d'emprisonnement. À l'aide d'explications, fournies étape par étape, des méthodes de calcul des peines et d'exemples pratiques, le guide tente de clarifier l'effet de la détermination de la peine dans des cas bien précis.

Canada-Quebec Special Subsidiary Agreement (1987-92) on Forest Development of the Upper North Shore : final report

Quebec : Ministère des ressources naturelles ; Ressources naturelles Canada, Service canadien des forêts - Québec, 1996. viii, 51 p. : Bibl. French ed. (Entente auxiliaire spéciale Canada-Québec...) : 96-07203/1. ISBN 2-550-30256-7
MICROLOG 96-07213 (1 fiche)

This is the final report of a special agreement whose main objective was to increase the timber supply of the Les Escoumins and Forestville management units, thereby enhancing the economic impact of forestry on Quebec's Upper North Shore. The agreement's operational objectives comprised silvicultural treatments on 14,530 hectares, with emphasis on tending of natural and artificial regeneration and bringing poorly regenerated sites back into production. The first part of the report provides an overview of the agreement, focusing on the issues and context in the forestry sector which gave rise to the agreement's goals and programs. Terms and conditions of funding are also given. The second part outlines the cumulative achievements of

the programs and activities, allowing measurement of the extent to which the agreement reached its operational objectives. The third part evaluates the economic effects associated with program implementation and with processing of the timber volumes resulting from operations conducted under the agreement.

China 2000 : the nature of growth and Canada's economic interests

By Stephen Lavergne. Ottawa : Dept. of Foreign Affairs & International Trade, 1994. 63 p. : *Bibl.* (Policy staff paper / Canada. Dept. of Foreign Affairs & International Trade ; SP44A) (Regional trade and economic series / Canada. Dept. of Foreign Affairs & International Trade ; 94/10) MICROLOG 96-07481 (1 fiche)

In 1981, the Chinese leadership set the goal of quadrupling China's 1980 per-capita gross national product by the year 2000, and the current leadership is trying to improve economic efficiency in order to sustain economic growth. This paper examines the issues of how far the Chinese economy has advanced toward these objectives, the major challenges that lie ahead in the 1990s, and China's economic prospects as it enters the next century. The second section of the paper reviews China's reform experience to date; the third section assesses the impact of these reforms on the economy; the fourth section attempts to identify the areas where economic reform will require deepening in the 1990s. Section five seeks to draw some conclusions regarding the art of economic reform as practised in China, and the sixth section outlines what the Chinese economy might look like in 2000. The final section discusses the implications for China-Canada bilateral relations.

Colour alteration, thermal maturity and burial diagenesis in fossil foraminifers

By D.H. McNeil, L.R. Snowdon and D.R. Issler. Ottawa : Natural Resources Canada, Geological Survey of Canada, 1996. 34 p. : ill., *Bibl.* (Bulletin / Geological Survey of Canada ; 499) ISBN 0-660-16451-5 CCG-P no. M42-499E MICROLOG 96-07284 (1 fiche)

Thermal maturity studies are an integral part of sedimentary basin analysis and hydrocarbon exploration. This report introduces new methods for assessing thermal maturity, based on colour and mineralogical changes in foraminifers, microfossils that are biostratigraphically important elements in marine sedimentary sequences. The methods and techniques presented are based on studies conducted in the Beaufort-Mackenzie basin. The report establishes an index consisting of ten categories, called the foraminiferal coloration index (FCI). The study indicates the sensitivity of the FCI at different levels of maturation, the influence of pore fluids in overpressured zones on the retarding of the FCI, and the sensitivity of the FCI to heating rate. Mineral changes in tests of both agglutinated and calcareous benthic foraminifers are also explained.

Combined experimental-analytical investigation of afterburning solid rocket exhaust plume properties to improve signature level prediction capability : final contract report

By J.P. Sislian. Courcellette, PQ : Defence Research Establishment Valcartier, 1990. II, 190 p. : ill., *Bibl.* On cover: University of Toronto Institute for Aerospace Studies. MICROLOG 96-07554 (2 fiche)

Describes experimental work performed on a high-speed pre-mixed hydrogen-air jet flame in a co-flowing annular air flow in the presence and absence of base flow at the exit. Includes details on the high-speed flame in a coaxial air facility which was designed, built, and tested to simulate (in a first approximation) rocket exhaust flow conditions. In addition, a new high spatial resolution computer-controlled three-dimensional gear was built to traverse the investigated flow field. The main experimental tool was a two-dimensional laser Doppler velocimeter with data acquisition and processing system. The tool was used to measure the two main velocity components. Other measurements included turbulence intensities and mean temperatures at various downstream sections. The measured initial and flow field data will serve to evaluate the validity of various turbulence models and to predict the structure of rocket exhaust plumes. Moreover, the experiments established the effect of the base flow on the turbulence structure of the exhaust plume.

Combustion system development for low-emission natural gas engines, vol. I : optimization of the UBC squish-jet combustion chamber

By J.Z. Blaszczyk and R.L. Evans. Montreal : Transport Canada, Policy & Coordination, Transportation Development Centre, 1995. xiv, 164 p. : ill., *Bibl.*
MICROLOG 96-07491 (2 fiche)

This is part one of two volumes detailing the results of a program designed to develop a combustion system for low-emission natural gas engines. It focuses on the design and investigation of a fast-burn combustion chamber, both in an engine laboratory and in computer simulations. It is known that the level of turbulence in the chamber just prior to ignition and during combustion has an important impact on the burning rate of the air-fuel mixture. The level of turbulence in the chamber can be influenced by the chamber design through the degree of swirl imparted to the mixture during the intake process and by the squish motion generated as the piston nears the top dead centre. The volume reports on the development of a family of squish-jet pistons to obtain various levels of turbulence while the chamber geometry controlled the level of turbulence. In total, 15 piston designs were tested at wide-open throttle conditions over a wide range of air-fuel ratios. Numerical modelling was performed using the KIVA-II code, and modelling results were compared to three test cases. A variety of squish combustion chambers was also tested. Results presented include power output, burn rate, specific fuel consumption, and specific emission levels.

Combustion system development for low-emission natural gas engines, vol. II : the effects of squish and swirl interaction on the performance and emissions of a spark-ignition engine

By M. Law. Montreal : Transport Canada, Policy & Coordination, Transportation Development Centre, 1995. xdi, 118 p. : ill., *Bibl.*
MICROLOG 96-07492 (2 fiche)

This is part two of two volumes detailing the results of a program designed to develop a combustion system for low-emission natural gas engines. It focuses on the design and investigation of a fast-burn combustion chamber. It is known that the level of turbulence in the chamber just prior to ignition and during combustion has an important impact on the burning rate of the air-fuel mixture. The level of turbulence in the chamber can be influenced by the chamber design through the degree of swirl imparted to the mixture during the intake process and by the squish motion generated as the piston nears the top dead centre. The volume describes research conducted to determine experimentally the relationship between the intake and compression generated charge motions of squish and swirl on engine performance and emissions. The work included design and construction of a variable swirl intake port and a swirl meter, wide-open throttle testing of squish and swirl combinations, and part load testing at constant volumetric flow rates. An optimum squish-swirl operating condition was determined.

Computer analysis of data from stratified mark-recovery experiments for estimation of salmon escapements and other populations

By A.N. Amason... et al. Nanaimo, BC : Fisheries & Oceans Canada, Science Branch, Pacific Region, Pacific Biological Station, 1996. vi, 37 p. : *Bibl.* (Canadian technical report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2106 ISSN 0706-6457) CCG-P no. Fs 97-6/2106E MICROLOG 96-07643 (1 fiche)

Describes the analysis of two-sample mark-recovery experiments conducted to estimate the number of animals in populations where the marks and recoveries take place over a number of strata. Strata may be defined in time or space or both, and the strata in which marking takes place may differ from the strata in which recoveries take place. The report also describes the use of a program called SPAS (Stratified Population Analysis System) for analysing this type of data. SPAS computes the Darroch, Schaefer, and Pooled Petersen estimators as described in Seber (1982) and a new maximum likelihood estimator. Among other advantages, this estimator works when the number of strata in which marking takes place equals the number of strata in which recoveries take place. SPAS permits pooling and deletion of strata and carries out a number of tests for goodness of fit and the validity of pooling. It allows conducting very general simulation experi-

ments to examine the effects of different population and sample sizes, different poolings, and of assumption failures.

Computer modelling of heat flow following laser surface melting

By S.B. Liu... et al. Dartmouth, NS : National Defence, Research & Development Branch, Defence Research Establishment Atlantic, 1995. v. 86 p. : *Ill., Bibl.* (DREA contractor report / Defence Research Establishment Atlantic ; DREA CR/95/436) MICROLOG 96-07587 (2 fiche)

Describes the physical model and numerical formulations used in the LASER1 program, a transient three-dimensional heat transfer program which describes the thermal history of a specimen after laser treatment with a scanned continuous laser. The program was based on the conservation of energy for the treated specimen and the three-dimensional implicit finite difference method, where the surface of the melting pool was assumed to be flat and fluid dynamics effects of the pool are neglected. The program was used to simulate the laser surface melting for a eutectic aluminium-copper alloy over a range of traversing speeds between 0.2 to 5.0 metres per second. Simulation results are compared to experimental results obtained in previous research. The report also describes the development of a graphical user interface for LASER1 and proposes and approach for analysis of heat flow resulting from laser cladding with a wire feed. The appendix contains thermochemical and optical data for aluminium bronzes, copper-nickel alloys, and gun steels, as well as a user's guide for the LASER1 program. Sample screens are included.

Concentrations and variability of major, minor and trace elements in soils and crops from two humic gleysol fields in southeastern Ontario, Canada

By M. Inhat, C. Wang and H. Kodama. Ottawa : Agriculture & Agri-Food Canada, Research Branch, Centre for Land & Biological Resources Research, 1996. v. 82 p. : *Ill., Bibl.* (CLBRR contribution / Center for Land & Biological Resources Research (Canada) ; no. 96-13) (Technical bulletin / Canada. Agriculture & Agri-Food Canada. Research Branch ; 1996-3E) ISBN 0-662-24328-5 CCG-P no. A54-8/1996-3E MICROLOG 96-07252 (1 fiche)

This bulletin is a detailed account of an investigation primarily into the minor and trace element (but also major element) status of an agricultural soil

and two crops (corn and alfalfa) grown on that soil in south-eastern Ontario. The investigators sampled soils from each experimental site and analysed soil characteristics (pH, total carbon, particle distribution, exchangeable cations), soil and crop total elemental concentrations, and soil extractable element concentrations. The results provide a reliable database regarding background levels of a large number of minor and trace elements in an important agricultural soil as well as information for establishment of soil-crop-element correlation relationships and influences of long-term agricultural practices.

Conflict of interest : selected issues -- Rev.

By Margaret Young. Ottawa : Library of Parliament, Research Branch, 1995. 25 p. : *Bibl.* (Background paper / Canada. Library of Parliament ; BP-362E) *French ed. (Les Conflits d'intérêts...) on the same fiche. Revised July 1995.* ISBN 0-660-16358-6 CCG-P no. YM32-2/362-1995-07E MICROLOG 96-07303 (1 fiche)

Conflict of Interest can be a conceptually difficult issue. Why has Parliament been unable to pass conflict of interest legislation, despite the introduction of four bills since 1988? What are the principles served by minimizing conflicts? How do those principles relate to the compliance mechanisms commonly enacted or suggested? What role is played by the independent conflicts regulatory bodies? This paper explores these and other related issues by focusing on certain topics relevant to the regulation of conflict of interest.

CA CI DE JU PA SS

Les Conflits d'intérêts : principaux aspects -- Rév.

Par Margaret Young. Ottawa : Bibliothèque du Parlement, Service de recherche, 1995. 26 p. : *Bibl.* (Etude générale / Canada. Bibliothèque du Parlement ; BP-362F) *L'éd. anglaise (Conflict of interest...) sur la même fiche. Révisé en juillet 1995.* ISBN 0-660-95204-1 GCC-E no. YM32-2/362-1995-07E MICROLOG 96-07303 (1 fiche)

L'expression conflit d'intérêts désigne un problème parfois difficile à cerner. Pourquoi le Parlement a-t-il été incapable d'adopter une loi sur les conflits d'intérêts, bien que quatre projets de loi sur le sujet aient été présentés depuis 1988? Quels principes sont-ils en réduisant les conflits? Comment fait-on le pont entre ces principes et les mécanismes d'application habituellement prévus dans les lois ou dont on propose le plus souvent l'adoption? Quel rôle les organismes indépendants de réglementation en matière de conflits d'intérêts jouent-ils? Dans ce document, nous traitons de ces questions et de sujets connexes en insistant sur certains su-

jets relatifs à la réglementation réglissant les conflits d'intérêts.

Constructed wetlands for stormwater management : a review

Prepared for Water Resources Branch, Ontario Ministry of the Environment, and the Metropolitan Toronto and Region Conservation Authority; prepared by Mark E. Taylor & Associates. Toronto : The Branch, 1992. viii, 63 p. : ill., Bibl.
ISBN 0-7729-9262-2
MICROLOG 96-07206 (1 fiche)

Construction of wetlands for stormwater management provides a feasible solution to improve water quality in urban and rural environments. They also modify flow rates by storing water temporarily, attenuating flow and reducing downstream scouring and erosion. This document contains information to assist designers in evaluating the use of con-

structed wetlands for stormwater treatment. Sections of the document review the hydrology of wetlands; contaminant loadings in wetlands, vegetation, and wildlife (bioaccumulation and transfer of contaminants to other systems); public perceptions of wetlands in residential and industrial or commercial areas; the history of constructed wetlands for such purposes as sewage treatment and wildlife enhancement; and the development, maintenance, operation, and monitoring of constructed wetlands. The final sections provide guidance on such matters as design criteria, soil preparation, planting, water level control, harvesting of organic material, and water quality and biotic component monitoring.

Convoluting laminations in waterlain sediments : three examples from eastern Canada and their relevance to neotectonics

By D.A. Macdougall and B.E. Broster. Ottawa : Atomic Energy Control Board, 1995. v, 92 p. : ill., Maps, Bibl. (Report / Canada. Atomic Energy Control Board ; INFO-0606)
MICROLOG 96-07535 (2 fiche)

Catastrophic disturbance of unconsolidated sediment produces a wide variety of deformation structures, particularly if the sediment is water-saturated at the time of disturbance. This report describes a study of sediment convolutions in five examples of Pleistocene glaciomarine deltas at three eastern Canadian locations: St. George (New Brunswick), Lower Five Islands and Economy Point region (Nova Scotia), and Kemptonville and Lanark in Ontario. The objective of the study was to determine the origin(s) and to identify, if possible, criteria for distinguishing between seismically induced convoluted laminations and those produced by other phenomena. Several examples of convolutions were found that were attributed to penecontemporaneous deformation and common to particular mechanisms of formation and facies.

Corrections population growth : report for federal/provincial/territorial ministers responsible for justice

Ottawa : Solicitor General Canada, 1996. 33, 38 p. : *Bibl. Bilingual (Croissance de la population carcérale...)*. ISBN 0-662-62584-6
MICROLOG 96-07490 (1 fiche)

When Federal, Provincial and Territorial Ministers met in Victoria on January 4 and 5, 1995, an item for discussion was the rapid and relentless growth of correctional workloads, particularly prison populations, that all jurisdictions are experiencing. This document looks at corrections population growth. Topics covered are: provincial/territorial activities; federal activities; federal/provincial division of responsibilities; principles; and, recommendations. CA CI DE JU PR SS ST

Cotisations du Régime de pensions du Canada, 1994

Programmes de la sécurité du revenu (Canada). Mesure des résultats. Ottawa : l'Unité, 1996. 89 p.
ISSN 0319-7247
MICROLOG 96-07375 (1 fiche)

Les cotisations au Régime de pensions du Canada sont versées par les salariés, les employeurs et les personnes travaillant à leur propre compte, depuis l'entrée en vigueur du Régime en janvier 1966. Les données présentées dans ce document contiennent des renseignements seulement sur les personnes qui ont contribué au Régime de pensions du Canada pendant l'année. Les données proviennent du registre des gains tel que maintenu par le ministère des Approvisionnement et Services, Division du Régime de pension du Canada. Les tableaux comprennent des informations sur le nombre de cotisants et le montant des cotisations, selon le sexe, l'âge, le niveau des gains, l'état relatif à l'emploi et la province. Cette publication contient des données historiques datant de 1966. CA CO DE SA SS ST

Croissance de la population carcérale : rapport à l'intention des ministres responsables de la justice du gouvernement fédéral, des provinces et des territoires

Ottawa : Soliciteur général Canada, 1996. 38, 33 p. : *Ill. Bilingual (Corrections population growth...)*. ISBN 0-662-62584-6
MICROLOG 96-07490 (1 fiche)

Lorsque les ministres du gouvernement fédéral, des provinces et des territoires se sont réunis à Victoria, les 4 et 5 janvier 1995, un des sujets à l'ordre du jour était la croissance rapide et soutenue de la clientèle correctionnelle, en particulier la population carcérale, partout au pays. Ce document se penche sur la croissance de la population carcérale et examine : les activités des provinces et des territoires; les activités du gouvernement fédéral; le partage fédéral-provincial des responsabilités; les principes; et, les recommandations. Data Fusion and Correlation Techniques Testbed, DFACTT : a command and control information system for land electronic warfare (U)

By Derek S. Elsaesser. Ottawa : National Defence, Defence Research Establishment Ottawa, 1995. ix, 20 p. : *Ill., Bibl.* (Report / Defence Research Establishment Ottawa ; no. 1274)
MICROLOG 96-07568 (1 fiche)

The Data Fusion and Correlation Techniques Testbed (DFACTT) is being developed to investigate automated command and control information system and signals intelligence analysis processes for land electronic warfare. The aim is to automate the collection, correlation, and fusion of electronic warfare and intelligence data to provide near real-time enemy situation assessment and immediate threat warning to the battlefield commander. This report describes the status of the DFACTT project as of September 1995. It includes a review of the DFACTT development approach (prototyping, object oriented design, evolutionary development) and description of DFACTT workstations. Sample screens are included. A Database of environmental samples collected and analysed for the Northern River Basins Study

By Robert B. More... et al. Edmonton : Northern River Basins Study, 1996. iv, 101 p. : *Ill., Maps, Bibl.* (Northern River Basins Study project report / Northern River Basins Study (Canada) ; no. 142 ISSN 1192-3571) *Diskette not included with microfiche.* ISBN 0-662-24710-8 CCG-P no. R71-49/3-142E
MICROLOG 96-07360 (2 fiche)

An important component of the Northern River Basins Study was the original data resulting from the collection and analysis of environmental samples. Samples were collected, stored, and analysed by a number of different agencies, and an inventory of samples obtained by the Study and results data were compiled into a single electronic database to ensure future ease of access to the original data. This report describes the data contained in the database, the methods used to compile the database,

the media and the nature of the samples, the collection site, and the data collected. Information is provided on which analyses were conducted on samples as well as the values of various parameters measured for the samples. All the files and the data fields that comprise the database are described in the users' guide in the report appendix. AL CA EV ND PR SC TE

The Design and evaluation of in situ bioremediation methods for the treatment of sludges and soils at waste disposal sites

By K.L. Berry-Spark, J.F. Barker and C.I. Mayfield. Toronto : Environment Ontario, Research & Technology Branch, Environmental Research, 1989. i, 30 p. : *Ill., Bibl.* ISBN 0-7729-5652-9
MICROLOG 96-07426 (1 fiche)

In-situ methods for treatment of waste sludges hold great promise for efficient remediation of sludge at waste disposal sites, such as the diverse and complex sludges from the O.E. MacDougall site near Brockville, Ontario. This report presents results of laboratory testing of natural bioremediation techniques using six representative soils and sludges obtained from the MacDougall site. Four of six samples contained concentrations of hydrocarbons typical of petroleum products and solvents. The report includes descriptions of the characterisation of the organic chemistry and microbial populations of the soils, as well as of the experiments conducted under aerobic, methane oxidising, anaerobic-denitrifying, sulphate reducing, and methanogenic conditions. The Design and testing of a large propeller driven aeration device for reservoir use

By H. Vandermeulen. Toronto : Ministry of the Environment, Water Resources Branch, 1991. iii, 15 p. : *Ill., Bibl.* ISBN 0-7729-8634-7
MICROLOG 96-07383 (1 fiche)

The use of destratification to improve reservoir water quality and dissolved oxygen concentrations has had wide application, and brings such benefits as reduced internal phosphorus loading, rapid decomposition of bottom organic matter, and expansion of fish habitat. This report describes field tests performed at Guelph Reservoir using a simple aeration device consisting of a 3-metre diameter polystyrene tube extending 8 metres down, and a 2.2-metre diameter propeller driven by a submersible electric motor suspended within the tube. The device was mounted on a raft and tested for two ice-free seasons in 1989 and 1990. Dissolved oxygen and temperature readings were taken at a variety of stations around the raft in order to determine the performance of the device in destratifying the reservoir. ON PR PS PW SC

Design considerations for a suboptimal Kalman filter

By D.J. DiFilippo. Ottawa : Defence Research Establishment Ottawa, 1989. 17 p. : *Ill., Bibl.*
MICROLOG 96-07526 (1 fiche)

This paper illustrates the process of designing a sub-optimal Kalman filter for the case of an airborne transfer-of-alignment (TOA) system used for synthetic aperture radar motion compensation. In this application, the filter must continuously transfer the alignment of an onboard inertial navigation system to a strapdown navigator that processes information from a less accurate inertial measurement unit. The main function of the TOA Kalman filter is to control navigator attitude errors and, to a lesser degree, velocity and heading errors. The paper gives a high-level background description of a motion compensation system incorporating a TOA Kalman filter and presents the optimal TOA filter design, with some simulation results to indicate potential filter performance. It then derives the sub-optimal Kalman filter configuration, with simulation re-

suits shown to allow comparison between optimal and sub-optimal performances.

The Development document for the effluent monitoring regulation for the electric power generation sector

Toronto : Environment Ontario, 1990. ii, 360 p. : *ill.*, *Bibl.* At head of title: *Municipal-Industrial Strategy for Abatement (MISA)*. ISBN 0-7729-6553-6 MICROLOG 96-07208 (4 fiche)

The Ontario Municipal-Industrial Strategy for Abatement (MISA) program has the ultimate goal of virtually eliminating persistent toxic contaminants from all discharges to receiving waters in the province. The purpose of this document is to provide background information on the development of the MISA Effluent Monitoring Regulation for the electric power generation sector. It begins with an overview of the sector, including a historical overview of the industry and descriptions of power generation methods and wastewater generation and treatment. This section concludes with specific information on each station and facility in the Ontario power generation sector. The next section describes the derivation of the monitoring parameters and the monitoring frequencies specified in the Regulation. The final sections comprise the text of the Regulation and explanatory notes.

Development of a protocol for predicting the fate of hazardous contaminants in municipal sewage systems

By Donald Mackay ; to the Ontario Ministry of Environment, Water Resources Branch, and the Department of Environment, Wastewater Technology Centre. Toronto : The Branch, 1988. iii, 71 p. : *ill.*, *Bibl.* ISBN 0-7729-4873-9 MICROLOG 96-07205 (1 fiche)

Describes the background to, and incentives for, the development of a protocol or calculation procedure by which the fate of hazardous contaminants could be quantitatively assessed in municipal sewage collection and treatment systems. Reviews the state of scientific knowledge concerning the properties of hazardous chemical contaminants and their fate in laboratory, pilot-, and full-scale treatment systems, with particular emphasis on their biodegradability. Several potential benchmark chemicals are identified, and the current status of modelling of chemical fate in sewer systems and treatment plants is also reviewed. Studies are then identified which, when successfully completed, could provide the knowledge base from which the

proposed protocol could be developed.

Development of an ecotourism opportunity spectrum (ECOS) for sites identified using GIS in northern Ontario

By Stephen W. Boyd and Richard W. Butler. Sault Ste. Marie, ON : Natural Resources Canada, Canadian Forest Service, Great Lakes Forestry Centre ; Toronto : Ministry of Natural Resources, 1996. 19 p. : *ill.*, *Bibl.* (NODA/NFP technical report / Great Lakes Forestry Centre ; TR-11 ISSN 1195-2334) On cover: *Canada-Ontario Northern Ontario Development Agreement - Forestry, Northern Forestry Program*. ISBN 0-662-23598-3 CCG-P no. Fo29-42/11-1996 MICROLOG 96-07623 (1 fiche)

This report outlines the development of a new framework within which the opportunity for ecotourism may be set. Based on existing approaches used in the field of resources management, the framework incorporates ideas from the recreation opportunity spectrum and modifies ideas presented in the tourism opportunity spectrum to specifically address ecotourism. Termed the ecotourism opportunity spectrum, it has eight components: access, other resource-related activities, attractions offered, existing infrastructures, social interaction, level of skill and knowledge, acceptance of visitor impacts, and acceptance for a management regime. Aspects of the ecotourism opportunity spectrum framework are applied to northern Ontario ecotourism areas that had been previously identified using a geographic information systems approach. The report also presents recommendations on evaluating the priority of ecotourism activities and opportunities, and on assessing the significance of the environmental impacts that may result.

Development of the Ontario provincial sediment quality guidelines for PCBs and the organochlorine pesticides

By R. Jaagumagi. Toronto : Ministry of Environment & Energy, 1992. iv, 80 p. : *ill.*, *Bibl.* ISBN 0-7778-9250-9 MICROLOG 96-07699 (1 fiche)

Details the derivation of provincial sediment quality guidelines for polychlorinated biphenyls (PCBs) and organochlorine compounds, and summarises the data used to derive these values. The guidelines set out in the document are intended for the protection of aquatic biological resources and have defined three levels of ecotoxic effects (no-effect, lowest effect, and severe effect). The document also summarises the fate of the organochlorine compounds and PCBs in sediments and provides the necessary details of the calculations of the sediment quality guidelines. Compounds covered in the guidelines include aldrin, benzene hexachloride, dieldrin, endrin, hexachlorobenzene, heptachlor, heptachlor epoxide, and mirex, in addition to PCBs.

Diplomacy at the leading edge : advanced technology and Canadian trade policy

By Gary Lutton. Ottawa : Dept. of Foreign Affairs & International Trade, 1995. 113 p. : *Bibl.* (Policy staff paper / Canada. Dept. of Foreign Affairs & International Trade ; SP70A) MICROLOG 96-07480 (2 fiche)

Canadian interests are being transformed by technological innovation both at home and abroad. The goal of this paper is not only to broaden the standard debate beyond traditional questions of government support for commercial research and development and the gathering of technology information abroad, but also to provide relevant recommendations for Canadian trade policy linked to advanced technology. In doing so, the paper provides an overview of the interaction between legal, economic, and trade issues affecting advanced technology markets, with particular reference to the North American Free Trade Agreement and the World Trade Organisation. The main objective of the paper is to review, via a technology perspective, the policies and practices in several key policy domains in the United States and the European Union that have an impact on advanced technology development. Three fundamental issues are addressed: the interplay between policies targeted at advanced technology sectors and trade policy; potential sources of dispute regarding trade, technology, and intellectual property rights; and Canadian interests in this debate.

The Disposal of Canada's nuclear fuel waste : comments on the postclosure assessment of a reference system

By C.J. Allan and B.W. Goodwin. Pinawa, MB : Whiteshell Laboratories, 1996. 19 p. : *ill.*, *Bibl.* (AECL research / Atomic Energy of Canada Ltd. ; AECL-11600 ISSN 0067-0367)
ISBN 0-660-16524-4 CCG-P no. CC2-11600E
MICROLOG 96-07408 (1 fiche)

As part of its work in developing the technology for the disposal of Canada's nuclear fuel waste, Atomic Energy of Canada analysed the performance of a hypothetical disposal facility that incorporates specific design choices for the engineered barriers which isolate the waste and that assumes a specific geological setting. The results of this analysis can be used to provide insight into the performance of the various components that comprise the multibarrier geological disposal system and insight into how changes in the performance of specific components can affect the overall performance of the system. This report discusses these aspects of the postclosure analysis, including the geological setting, the location of the disposal vault relative to the fracture zone, the impact of barrier failure, the impact of design changes, the effect of an excavation damage zone, and the effect of other fractures.

Dissolved oxygen conditions and fish requirements in the Athabasca, Peace and Slave rivers : assessment of present conditions and future trends

By Patricia A. Chambers and Thomas A. Mill. Edmonton : Northern River Basins Study, 1996. xiv, 91 p. : *ill.*, *Bibl.* (Northern River Basins Study synthesis report / Northern River Basins Study (Canada) ; 5 ISSN 1205-1616) ISBN 0-662-24671-3 CCG-P no. R71-49/4-5E
MICROLOG 96-07270 (2 fiche)

This report synthesises research by the Northern River Basins Study and other agencies on the subject of what concentrations of dissolved oxygen are required seasonally to protect the various life stages of fish, and what factors control dissolved oxygen in the northern rivers. The introduction summarises the current state of knowledge with respect to dissolved oxygen conditions in rivers during periods of ice cover. The next four chapters cover the following topics: characterisation of the sources of biological oxygen demand (BOD) loading (e.g. pulp mills and sewage treatment plants) and the regulation of point sources of BOD loading; longitudinal changes in dissolved oxygen concentrations in the Athabasca, Wapiti-Smoky, Peace, and Slave rivers in relation to pulp mill and municipal loadings; dissolved oxygen modelling; dissolved oxygen requirements for fish, including results of oxygen stress experiments on native fish species; and interactions between the response of benthic biota to dissolved oxygen and nutrients or contaminants. The final two chapters assess the state of aquatic ecosystem health and develop scientific and management recommendations for the northern river basins.

Does inflation uncertainty vary with the level of inflation?

By Allan Crawford and Marcel Kasumovich. Ottawa : Bank of Canada, 1996. 48 p. : *ill.*, *Bibl.* (Working paper / Bank of Canada ; 96-9 ISSN 1192-5434) ISBN 0-662-24986-0
MICROLOG 96-07382 (1 fiche)

The purpose of this study is to test the hypothesis that inflation uncertainty increases at higher levels of inflation. The analysis is based on the generalised autoregressive conditional heteroskedasticity (GARCH) class of models, which allow the conditional variance of the error term to be time-varying. Since this variance is a proxy for inflation uncertainty, a positive relationship between the conditional variance and inflation would be interpreted as evidence in favour of the hypothesis. The authors apply GARCH techniques to two models of the inflation process in Canada: a simple autoregressive model and a reduced-form Phillips-curve model. Results are presented and compared for the two models.

Dose from organically bound tritium after an acute tritiated water intake in humans

By A. Trivedi, D. Galeriu and R.B. Richardson. Ottawa : Atomic Energy Control Board, 1995. viii, 102 p. : ill., *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0598)
MICROLOG 96-07666 (2 fiche)

In February 1990, eight nuclear power plant workers were accidentally contaminated when they drank from a juice dispenser that was later found to be spiked with tritiated heavy water. This situation provided a rare opportunity to obtain human data on the retention of tritium in the body after an acute intake of HTO (the sum of tritium as water and the exchangeable bound tritium). Worker urine samples were analysed for tritium up to 300 days post-exposure, and results obtained included the mean body water turnover half-time and a longer-term component of tritium excretion. Cumulative 24-hour urine, blood, and faecal samples were also collected and analysed from a control group of workers and the exposed workers 100-300 days post-exposure. Results are given for HTO and organically bound tritium (OBT), and a mathematical model is proposed to estimate the dose increase from the retained OBT by examining the kinetics of total tritium excretion in urine.

The Draft development document for the effluent limits regulation for the metal mining sector

Toronto : Ministry of Environment & Energy, 1993. iii, 393 p. : ill., *Bibl.* On cover: MISA, Municipal/Industrial Strategy for Abatement.
ISBN 0-7778-1119-7
MICROLOG 96-07338 (5 fiche)

The Ontario Municipal-Industrial Strategy for Abatement (MISA) program has the ultimate goal of virtually eliminating persistent toxic contaminants from all discharges to receiving waters in the province. This document begins with an overview of the environmental background to MISA and the main features of the program. Section two presents information about the metal mining sector, consisting of about 50 mines. The information includes descriptions of mining effluents and waste treatment strategies. The next section contains information on the effluent monitoring data used in developing the effluent limits. Section four assesses available pollution control technologies and describes the identification of those considered to be the best available; this section also examines the financial implications of each 'best available' option. Section five presents the effluent limits and describes the limit development process. Finally, key components of the effluent limits regulation are summarised and other regulatory requirements such as monitoring frequencies and toxicity testing criteria are defined.

Draft report on planning and development reform in Ontario

Commission on Planning & Development Reform in Ontario. Toronto : The Commission, 1992. 90 p. On cover: *New planning for Ontario*.
ISBN 0-7778-0515-4
MICROLOG 96-07694 (2 fiche)

This draft presents proposals for an improved planning system for land use in Ontario. It recommends clearly articulated provincial goals and policies that incorporate environmental and other considerations, enhanced municipal planning responsibilities, clearer relationships between levels of government, earlier and more comprehensive public involvement, and a more timely and efficient process for decision-making and dispute resolution. It begins with an overview of proposals, proposed recommendations, and the purposes of planning. It then discusses proposed provincial policy statements on such matters as ecosystem protection, agricultural land, housing, and non-renewable resources; the provincial role in planning, the mechanics of policy making and planning, develop-

ment standards, and related matters; issues related to Aboriginal communities; the municipal role in planning (planning structures, plan making, implementation, and public involvement); the dispute resolution and appeal process; other issues such as land stewardship and the fiscal impact of development; and matters related to the transition to the new planning system.

The Eastern part of the Sturgeon River area : the western part of the Sturgeon River area : new developments in the Little Long Lac area

By E.L. Bruce and H.C. Laird. Toronto : Dept. of Mines, 1937. vi, 150 p. : ill., *Maps, Bibl.* Published as vol. XLV, part II, of the Ontario Dept. of Mines annual report, 1936.
MICROLOG 96-07280 (2 fiche)

The area described in the first two parts of this report is located east of Lake Nipigon, about 60 miles north of Lake Superior. The report describes the area's means of access, previous geological work, natural resources, topography and drainage, general geology (Precambrian volcanics, sediments, intrusives; glacial deposits), historical geology, structural geology (folding, faulting, shearing), and economic geology. The latter section includes a discussion of the area's gold deposits and descriptions of gold mines, mining claims, ore mineralogy, and mining properties. The third part of the report reviews gold mining developments in the neighbouring Little Long Lac area to the east. It includes information on the area's general geology, structural relationships, ore deposits and mineralogy, and gold mines.

CCG-P no. R71-49/3-135E
MICROLOG 96-07157 (1 fiche)

The objectives of this project were to re-examine sediment toxicity at sites sampled previously on the Athabasca River, including sites in the oil sands area, and to conduct toxicity testing on a number of additional sites on the Athabasca, Smoky, and Peace rivers. Investigators tested suspended and bottom sediment samples using four species of freshwater benthic invertebrates in chronic exposure studies. Endpoints measured included survival, growth (amphipod, chironomid, and mayfly) and reproduction (oligochaete worm). Test results were compared with those using standard reference sediment samples for biological quality assurance.

ECS program unit funding : a handbook for ECS operators, 1996-97

Edmonton : Alberta Education, Special Education Branch, 1996. II, 59 p. : *Bibl.*
MICROLOG 96-07442 (1 fiche)

This handbook is written specifically as a resource for Early Childhood Services (ECS) operators in Alberta to apply for program unit funding. It also may serve to enhance the understanding of how assistance is provided to ECS children with severe disabilities. The handbook provides information for the completion of program unit funding applications and is divided into the following sections covering the context for program unit funding, the basic requirements of funding, completing the necessary forms, and making a declaration that attests to seven criteria to be met. Appendices include definitions, a checklist for development of local special needs policies, a special needs profile form, and a description of conditions and considerations regarding funding for school authorities.

Effect of hypoxia, fresh water, anaesthesia, and sampling technique on the hematocrit values of adult sockeye salmon, *Oncorhynchus nerka*

By J.S. Korstrom... et al. West Vancouver, BC : Dept. of Fisheries & Oceans, Science Branch, Pacific Region, West Vancouver Laboratory, 1996. v, 29 p. : *Bibl.* (Canadian technical report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2101 ISSN 0706-6457) CCG-P no. Fs 97-6/2101E
MICROLOG 96-07650 (1 fiche)

Describes a study of the hematocrit values of adult sockeye salmon after the fish were subjected to sublethal hypoxia in salt water under simulated estuarine conditions, a residual oxygen bioassay, transfer from sea water to fresh water, and a lethal dose of the anaesthetic MS-222. Results presented include hematocrit values over time, comparison of hematocrit values between anaesthetized and control fish and between male and female fish, and the influence of such factors as splenic reservoirs on hematocrit. The utility of hematocrit values in relation to environmental stressors is also discussed.

The Effect of varying the dietary digestible protein to digestible lipid ratio on the growth and whole body composition of Atlantic salmon (*Salmo salar*) (0.5-1.2 kg) reared in sea water

By J.S. Anderson... et al. West Vancouver, BC : Dept. of Fisheries & Oceans, Science Branch, Pacific Region, West Vancouver Laboratory, 1996. v, 20 p. : *Bibl.* (Canadian technical report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2102 ISSN 0706-6457) CCG-P no. Fs 97-6/2104E
MICROLOG 96-07642 (1 fiche)

Describes a study undertaken to estimate the optimal dietary ratio of digestible protein (DP) to digestible energy (DE) for rearing Atlantic salmon in sea water over a size range of 0.5 to 1.2 kilograms.

The work involved conducting both a growth experiment and a digestibility experiment. The investigators formulated nine experimental diets using herring meal to supply 80% of the dietary protein and containing from 360 to 460 grams DP per kilogram. Fish growth and performance were described and assessed using such variables as weight gains, dry feed consumption, and specific growth rates. Digestibility was determined by analyses of dried faeces. Fish performance data were also analysed statistically by a repeated measures analysis-of-variance model to evaluate the responses over time.

Effects of plate thickness and stack distribution of quasi-phase matched materials on nonlinear frequency generation

By S.K. Wong. Courcellette, PQ : Defence Research Establishment Valcartier, 1995. v, 40 p. : *Ill.*, *Bibl.* (DREV report / Defence Research Establishment Valcartier ; R-9517)
MICROLOG 96-07528 (1 fiche)

Diffusion-bonded and semiconductor materials such as gallium arsenide show promise as non-linear frequency conversion materials for lasers. Many thin layers of these materials can be stacked together in a quasi-phase matched (QPM) configuration to provide efficient non-linear frequency conversion. This paper presents a numerical model study conducted to provide better understanding of the physics of quasi-phase matching. A single-pass three-wave coupled nonlinear frequency interaction model with temporal and spatial pulse profiles is used to analyse the behaviour of the non-linear conversion process in a QPM stack. The paper also provides an original framework on how to fabricate more efficient diffusion-bonded QPM materials.

Enhancement of frequency response and damping capabilities of the VAST finite element computer program

By L. Jang, M.W. Chernuka and M.F. Palmeter.
Dartmouth, NS : National Defence, Research & Development Branch, Defence Research Establishment Atlantic, 1995. v, 84 p. : *Ill., Bibl.* (DREA contractor report / Defence Research Establishment Atlantic ; DREA CR/95/492)
MICROLOG 96-07584 (2 fiche)

Describes the theoretical background and computer implementation issues related to the enhancement of the direct frequency response and damping analysis capabilities in the VAST finite element program. New capabilities implemented include an out-of-core complex linear algebraic equation solver, an option for computing strain energy ratios and system loss factors using a strain energy based approach, and an improved load modelling procedure. An efficient tool for optimal design of viscoelastically damped structures was also developed, taking the form of the DVASt standalone program. DVASt is based on a simplified finite element analysis-based algorithm and can predict natural frequencies and system loss factors of damped structures using a series of undamped eigenvalues. A pre-processor was also developed in DVASt to create various input data files for VAST direct frequency response analyses. Numerical examples are presented to verify the newly developed capabilities. Enhancements of the VASTG and VASGEN/VASUSE programs are also reviewed.
CA ND PS SC

Enhancement of the frequency response module of the VAST finite element program for vibration isolation and structural acoustic analysis

By I.R. Orismou... et al. Dartmouth, NS : National Defence, Research & Development Branch, Defence Research Establishment Atlantic, 1993. v, 82 p. : *Ill., Bibl.* (DREA contractor report / Defence Research Establishment Atlantic ; DREA CR/94/408)
MICROLOG 96-07585 (1 fiche)

Describes some enhancements of the VAST program which improve its capabilities for predicting the transmission of structure-borne noise and vibration originating from shipboard machinery. A direct frequency response analysis capability was incorporated and a frequency-dependent damping and stiffness property capability was provided to allow modelling of viscoelastic damping materials. Provision was also made for different damping specifications on various structural components by making damping specifications for element groups. Also described are enhancements related to post-processing of frequency response results and to graphic display capabilities. Appendices include information on input formats and operating instructions for the PLOT6 graphics program for plotting frequency response data.

Environmental health scoping study at Bruce Heavy Water Plant

By Michael Prior... et al. Ottawa : Atomic Energy Control Board, 1995. ix, 72 p. : *Ill., Bibl.* (Report / Canada. Atomic Energy Control Board ;

INFO-0601)
MICROLOG 96-07668 (1 fiche)

There are concerns that hydrogen sulphide or other emissions released from the Bruce Heavy Water Plant may be the cause of the mortalities and morbidities observed in a flock of sheep at a farm four kilometres south-southeast of the plant. This paper describes the development of a multidisciplinary study to scope and assess the validity of a perceived causal association between adverse health effects in the sheep and emissions from the plant. The paper offers investigational criteria useful in determining and validating environmental health concerns as expressed through biological effects; outlines the principles of environmental toxicology; summarises environmental health concerns associated with morbidity and mortality in sheep; reviews activities at the Bruce plant; discusses and identifies relevant environmental pathways between the sheep farm and the plant site; and presents a strategy for future elucidation of this environmental health issue.

Evaluation of accessible dock facility, Georgian Bay Islands National Park

TES Ltd. Montréal : Transport Canada, Transportation Development Centre, 1995. x, 92 p. : ill.
MICROLOG 96-07521 (2 fiche)

Describes the evaluation of the accessibility of Beausoleil Island in the Georgian Bay Islands National Park, as provided by a recently installed dock. The installed dock is compared with a conceptual dock previously described in Transport Canada report TP11982E. Except for some necessary additions, the docking facility incorporates expensive construction techniques and does not include some access aids which would enhance its usability by persons with disabilities. The evaluation included a survey of user concerns, analysis of operational concerns, and actual functional requirements of the dock. To incorporate the subjective and qualitative concerns of park visitors, a number of site visits allowed special interest groups to actively participate in the evaluation. An ergonomic analysis was also included to identify additional human factors that substantiated recommendations beyond the interests of the attending user groups.

An Evaluation of accessible transit buses in Vancouver and Victoria : final report

Prepared for BC Transit and the Transportation Development Centre, Policy and Coordination, Transport Canada ; by Tom Geehan. Montréal : Transport Canada, Policy & Coordination, Transportation Development Centre, 1995. xiii, 184 p. : ill., Bibl.
MICROLOG 96-07504 (3 fiche)

Presents results of a comprehensive and systematic evaluation of low-floor urban transit buses in Victoria and lift-equipped buses in Vancouver as alternative means of meeting the needs of persons with disabilities. The main research activities included measuring the planning, social, engineering, economic, ergonomic, and environmental impacts on the transit service and its passengers. Research methodologies included telephone surveys, engineering assessment of bus designs, ergonomic assessment of driver and passenger activities, and analysis of operating costs, capital costs, annual debt service, and maintenance costs of the buses.

Evaluation of financial assurance alternatives of licensees

By John N. Douglas. Ottawa : Atomic Energy Control Board, 1995. vi, 117 p. (Report / Canada. Atomic Energy Control Board ; INFO-0596)
MICROLOG 96-07537 (2 fiche)

The Uranium and Thorium Mining Regulations of the Atomic Energy Control Act require that applicants and licensees indicate what financial assurance plans they have made to fund the decommissioning plan they propose to implement. This report compiles a variety of financial assurance plans that could be available, and lists the advantages and disadvantages of each plan to the Atomic Energy Control Board and to the applicant or licensee. The report also ranks the various alternatives in order from most to least suitable from the Board's perspective. The appendix provides additional information from industry sources related to some of the forms, documents, or procedures that have been discussed with respect to possible financial assurance mechanisms.

Evaluation of the Canada-Alberta Partnership Agreement in Forestry

Stewart & Ewing Associates Ltd. Edmonton : Natural Resources Canada, Canadian Forest Service ; Alberta Land & Forest Services, 1996. 3 v. : *Bibl.* ISBN 0-662-24924-0 CCG-P no. Fo42-91/145-1996E
MICROLOG 96-07563 (5 fiche)

The Canada-Alberta Partnership Agreement in Forestry was intended to provide financial support to enhance the effective management of federal, provincial, and private forest lands in Alberta. Primary objectives of the Agreement included ensuring sustainability of timber supply, optimising forest management and utilisation, and fostering diversification of the forest sector. This report presents an evaluation of the Agreement conducted at two different levels. The first level assessed the results of a sample of 98 representative individual projects conducted under the Agreement. The second level consisted of a general assessment of the achievement of the Agreement's objectives and those of its constituent sub-programs. The first volume of this report presents the overall findings of the evaluation, and the second volume contains a detailed examination of the results of the 98 sample projects. The third volume contains the text of the Agreement and other background documents.

Expansion of jurisdiction of the Office of the Ombudsman

Ontario. Legislative Assembly. Standing Committee on the Ombudsman. Toronto : The Standing Committee, 1989. 21 p.
MICROLOG 96-07313 (1 fiche)

Presents the findings of the Standing Committee which reviewed the following matters: whether there is a need for expansion of the jurisdiction of the provincial ombudsman, and if so, what should be the scope of that jurisdiction; and who should perform the function covered by the expanded jurisdiction. The Committee's work included two weeks of public hearings as well as meetings with ombudsmen and legislators in New Brunswick and Manitoba. Specific areas of possible expansion considered in the review were the jurisdictions of the Ontario New Home Warranty Program, Children's Aid Societies, and public hospitals. The appendix contains a dissenting opinion to the majority findings.

An Experimental investigation of fission product release in SLOWPOKE-2 reactors

By A.M. Hamden, B.J. Lewis and L.G. Bennett. Ottawa : Atomic Energy Control Board, 1995. vi, 55 p. : *Ill., Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0591-1)
MICROLOG 96-07531 (1 fiche)

Increasing radiation fields due to a release of fission products in the reactor container of several SLOWPOKE-2 reactors fuelled with a highly-enriched uranium alloy core have been observed. It is believed that these increases are associated with fuel fabrication where a small amount of uranium-bearing material is exposed to the coolant at the end welds of the fuel element. This report describes the equipment, analysis techniques, and results of tests conducted at various reactor sites during a study to investigate this phenomenon. Samples of reactor water and gas from the headspace above the water were examined by gamma spectroscopy methods for reactors of various burn-ups. The report includes recommendations for actions to deal with the radiation problem.

Failure rates in piping manufactured to different standards

By R.W. Barnes and G.D. Cooper. Ottawa : Atomic Energy Control Board, 1995. vii, 53 p. : *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0607)
MICROLOG 96-07538 (1 fiche)

Most non-nuclear process piping systems in Canada and the United States are constructed to the requirements of the piping codes of the American Society of Mechanical Engineers (ASME B31.1 and B31.3). Section III of the ASME Boiler and Pressure

Vessel Code has additional requirements for piping that are expected to provide further assurance of pressure boundary integrity. This report describes a project that attempted to determine if the additional requirements of Section III were beneficial in preventing failure of the pressure boundary. The approach taken was to determine the causes of failure in non-nuclear piping subjected to service similar to that experienced by piping in Candu nuclear plants. The study examined information on carbon steel piping systems filled with water/steam operating at up to 600 degrees C and 1,600 pounds per square inch pressure. Failure mechanisms were identified and analysed to determine whether application of Section III requirements would have prevented failure.

Fast ferry evaluation for Canadian routes

Prepared by Ian Glen...et al. Montreal : Transportation Development Centre, Safety & Security, 1996. 2 v. : ill., Maps, Bibl. Contents: Vol. 1 : Main report - vol. 2 : Appendices. MICROLOG 96-07506 (3 fiche)

Reports on a study of the potential for reducing Canadian ferry subsidies through the introduction of high speed passenger/car ferries. Following a review of high speed ferry technology and acquisition of a data base of current high speed ferries, Canadian ferry routes are reviewed to identify those with potential for applying a faster service to effect efficiencies. Effort focused on those routes with appropriate traffic volumes, those receiving the greatest subsidy, and those for which vessel replacement is due in the short term. Seasonal operations were considered where necessary. The data were synthesised to identify the most promising routes and vessels, and an economic model was developed for exploring a ferry operation in detail using the fast ferry data base. The route from Nanaimo to Horseshoe Bay, British Columbia, was used to calibrate the model. The study provides guidance on chartering a vessel for examination of the impact of a fast ferry on the candidate routes. Appendices include route analyses and statistics, description of the economic model, a user manual for the model, and model runs for three routes.

Faulting in unconsolidated sediments and bedrock east of Toronto, phase 1

By C. Rogojina, A.A. Mohajer and N. Eyles. Ottawa : Atomic Energy Control Board, 1995. v. 23 p. : ill., Maps, Bibl. (Report / Canada. Atomic Energy Control Board ; INFO-0597) MICROLOG 96-07536 (1 fiche)

Increasing concern with the potential earthquake hazard in southern Ontario has focused attention on neotectonic structures affecting bedrock. This report presents a survey of deformations (fractures and pop-ups) in Ordovician bedrock in the metropolitan Toronto area, where about 2,500 fracture orientations have been measured in over 70 bedrock outcrops. Anomalous fracture patterns have been identified at the metro Toronto periphery, specifically along the West Humber and Rouge rivers. Careful mapping and description of four post-glacial pop-ups within metro Toronto show a possible relationship with the contemporary principal stresses in the area and the local fracture pattern.

Feasibility study for a combined EMP/explosive line charge : final report

By C.J. Anderson, Raiston, AB : National Defence, Defence Research Establishment Suffield, 1995. v. 134 p. : ill., Bibl. (DRES contractor report / Defence Research Establishment Suffield ; CR 96-002) MICROLOG 96-07580 (2 fiche)

Magnetic influence mines, buried at significant depths, are one class of mines which are relatively immune to many countermeasure measures. One ap-

proach that could conceivably defeat such mines would be to tailor the magnetic field generated by an explosive event so that the field would decoy the mine fuse. This report describes a project undertaken to examine the feasibility of generating an electromagnetic pulse (EMP) using chemical detonations, and to determine the appropriate manner of generating an EMP sufficient to activate or function magnetic influence mines. The report begins with a review of background literature, including discussion of generation of various electric and magnetic fields by combustion or detonation phenomena. It then describes experimental trials evaluating the effect of various fuel constituents, ion-generating additives, and oxidisers in generating EMPs.

Finite element and physical modelling of post yield stability of icebreaker structure

Prepared for Transportation Development Centre, Transport Canada ; prepared by J.E. Bond...et al. Ottawa : MIL Systems Engineering, 1995. 2 v. : ill., Bibl. Contents: Vol. 1 : Main report - vol. 2 : Figures. MICROLOG 96-07498 (4 fiche)

This report describes the second phase of a project whose final objective is to confirm the icebreaker stability requirements in the Arctic shipping regulations and/or to recommend new requirements. The project objectives were accomplished by designing 1/3 scale panels measuring 5 by 2.6 metres and representative of the midbody hull structure of a Canadian Arctic Class 3 icebreaker; analysing the panels using finite element methods; physically testing the panels; and comparing the analytical and test results. In the tests, load levels of up to 9,325 kilonewtons were applied and the panels were tested to failure. The behaviour of the panels, load deformation characteristics, and progression of failure from plastic hinge formation to plastification and tripping of the framing system, and to rupture of the plating are described. The ANSYS software was used to model and analyse the panels.

Fish collections, Peace, Athabasca and Slave River basins, September to December, 1994

By Toni-Lynne Jacobson and Thomas D. Boag. Edmonton : Northern River Basins Study, 1995. vi, 215 p. : ill., Bibl. (Northern River Basins Study project report / Northern River Basins Study (Canada) ; no. 61 ISSN 1192-3571) ISBN 0-662-24483-4 CCG-P no. R71-49/3-61E MICROLOG 96-07357 (3 fiche)

Presents a study that collected and prepared fish from 23 sites along the Peace, Athabasca, and Slave river drainages in order to conduct physical, physiological, contaminant, and biophysical analyses. The primary fish species targeted for collection and analysis was burbot, used as a sentinel species for monitoring contaminants in northern waters because of its wide distribution, ease of catching, place at the top of the aquatic food chain, and large liver which can bioaccumulate organic compounds. Other species collected were northern pike, long-nose sucker, and flathead chub. Specific analyses included gross pathology, metals, liver mixed function oxygenase induction, sex steroids and gonad morphology, retinoids, metallothioneins, and basic life history information. Fish were also examined externally and internally for gross pathological abnormalities and deformities. Appendices contain descriptions of fish collection and handling protocols, as well as detailed data.

Functional graphical languages for process control

Proctor & Redfern Ltd. Ottawa : Atomic Energy Control Board, 1996. vii, 53 p. : *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0626)
MICROLOG 96-07660 (1 fiche)

A wide variety of safety systems are in use today in the process industries, most of which rely on control software using procedural programming languages. This study investigates the use of functional graphical languages for controls in the process industry. Different vendor proprietary software and languages are assessed and evaluation criteria are outlined based on the ability to meet regulatory requirements, reference sites involving applications with similar safety concerns, quality assurance and control procedures, community of users, type and user-friendliness of the man-machine interface, performance of the operational code, and degree of flexibility. The main objective of the study is to prepare Atomic Energy Control Board staff to understand and competently deal with a licensing submission relating to the use of a functional graphical language for the control of a Candu-3 nuclear power plant safety shutdown system.

Genetics, growth and yield, timber quality and pest hardiness of forests in the Peace Region

By N.K. Dhir...et al. Edmonton : Alberta Environmental Protection, 1996. 34 p. : ill., Bibl. On cover: Forest Development Research Program. At head of title: Manning Diversified Forest Products Research Trust Fund. ISBN 0-7732-5055-7
MICROLOG 96-07448 (1 fiche)

Presents a progress report of activities carried out in 1995-96 with support from the Manning Diversified Forest Products Research Trust Fund. Activities are reviewed in the following areas: white spruce and lodgepole pine genetic improvement; review of clone banks and seed germplasm bank collections to identify suitable stock for breeding; seed orchard development; co-operation with the British Columbia Ministry of Forests in pine and white spruce projects and tree improvement developments; field trials and site maintenance; and wood quality analysis of superior trees. Appendices include reports on: family variation in white spruce; geographic variation of white spruce provenances; and growth performance of Siberian larch.

Geographic and temporal variations of selected respiratory diseases in Strathcona County and Fort Saskatchewan

Prepared by Fu-Lin Wang...et al. Edmonton : Alberta Health, 1996. xl, 45 p. : ill., Maps, Bibl.
MICROLOG 96-07433 (1 fiche)

Provides the findings of a descriptive epidemiological study of asthma, bronchitis, and emphysema in Strathcona County, Alberta, with comparisons of the rates of these selected respiratory diseases made for Fort Saskatchewan, Edmonton, Fort McMurray, and the province as a whole. Data were obtained from Alberta Vital Statistics, Statistics Canada, Alberta Health hospital morbidity files, and Alberta Health Care Insurance Plan files. Relative proportion (percent distribution), age-specific rate, and age-standardised (adjusted) rate were used as measurements. The results will be used to make decisions about future health assessment needs and to identify emerging health monitoring requirements.

Geology and economic deposits of the Moose River Basin : appendix, Devonian cephalopods from the Moose River Basin : fire clay, kaolin, and silica sand deposits of the Mattagami and Missinabi rivers

By W.S. Dyer...et al. Toronto : Dept. of Mines, 1929. iv, 128 p. : ill., Maps. Fold. maps not filmed. Published as vol. XXXVII, part VI, of the Ontario Dept. of Mines annual report, 1928.
MICROLOG 96-07295 (2 fiche)

The first part of this report covers the geology of the basin of the Moose River, which feeds into James Bay. It describes the basin's climate and natural resources, topography and major landforms, stratigraphy and palaeontology (Devonian, Mesozoic, and Pleistocene), structural geology (structural basins, folding), and economic geology. Descriptions are included of deposits of gypsum, lignite, peat, clay, shales, sand and gravel, limestone, and other potentially useful materials. The appendix is devoted to the systematic palaeontology of Devonian cephalopods from the basin. The second part of the report focuses on clay and sand deposits of two rivers in the basin, the Mattagami and Missinabi. Theories of clay and kaolin formation are discussed, mineral claims and occurrences are described, and results of laboratory tests of clay samples are presented.

Geology and economic possibilities of Sutton Lake area, District of Patricia

By J.E. Hawley. Toronto : Dept. of Mines, 1926. v, 56 p. : ill., Maps, Bibl. Published as vol. XXXIV, part VII, of the Ontario Dept. of Mines annual report, 1925.
MICROLOG 96-07523 (1 fiche)

The area described in this report lies about 60 miles south of Hudson Bay and 100 miles west of James Bay. The report describes the area's topography, access routes, physiography, Precambrian formations (dolomite, chert breccia, iron, diabase sill and smaller intrusives), and quartz veins. Correlation of the Precambrian rocks with those found in other areas is discussed. Finally, the economic potential of the area for silver and iron is assessed.

MICROLOG 96-07349 (2 fiche)

Two areas are described in this report, one about 70 miles north of Lake Nipigon in the vicinity of Fort Hope, and the other comprising an area of about 800 square miles in north-west Ontario near the Manitoba border. The report describes previous exploration work in the areas, as well as their physiography, topography, natural resources, general geology (Precambrian volcanics, sediments, and intrusives, and Pleistocene deposits), geologic structures, and economic geology. The first part of the report also contains a section on the geology of the routes from the railway just north of Lake Nipigon to the Albany River, and sections describing gold mining properties and claims at Fort Hope and the iron formation at Miminiska Lake. The second part includes descriptions of mining properties, exploratory workings, and claims in the Favourable Lake-Sandy Lakes area.

Geology of the Sapawe Lake area, with notes on some iron and gold deposits of Rainy River district : lead and zinc deposits, Dorlon and McTavish townships, Thunder Bay district : Boston-Skead gold-copper area, District of Timiskaming : Oba area, District of Algoma

By J.E. Hawley, L.V. Bell and J.E. Maynard.
Toronto : Dept. of Mines, 1930. v, 135 p. : ill., Maps, Bibl. Published as vol. XXXVIII, part VI, of the Ontario Dept. of Mines annual report, 1929.
MICROLOG 96-07350 (2 fiche)

The first part of this report describes an area just north of Quetico Provincial Park and east of Atikokan, Ontario. It includes descriptions of the area's topography, general geology, geologic structures, and various mining properties and claims. A separate section is devoted to the Atikokan iron deposits, which were mined between 1907 and 1911. This section describes the general geology of these deposits, the ore bodies and their mineralogy, and theories on their origin. The second part examines lead and zinc deposits in two townships located 30 miles north-east of Thunder Bay. It includes information on general geology, origin of the deposits, mining properties and claims, and exploratory workings. The third part covers the general geology and economic geology (gold and copper) of a small area located about 30 miles north of Cobalt. Descriptions of working mines, prospects, and claims are included. The final part describes the topography, resources, general geology, and metal mining claims in an area located about 50 miles north-northeast of Michipicoten Harbour.

Gold deposits of Woman, Narrow and Confederation lakes, District of Kenora, Patricia portion : Lake Savant area, District of Thunder Bay : geology of the Beardmore-Nezah gold area, Thunder Bay district : Huronian Gold Mine, Moss Township, District of Thunder Bay : platinum-bearing nickel-copper deposit on Lower Shebandowan Lake, District of Thunder Bay

By E.L. Bruce... et al. Toronto : Dept. of Mines, 1929. vii, 160 p. : ill., Maps, Bibl. Published as vol. XXXVII, part IV, of the Ontario Dept. of Mines annual report, 1928. Fold. maps not filmed.
MICROLOG 96-07548 (2 fiche)

The first part of this report describes the geology of some parts of an area in the region of Woman Lake, about 100 miles north of Dryden, Ontario. It includes descriptions of the area's topography, Precambrian rocks, glacial and post-glacial deposits, geological history, and economic geology (characteristics of gold deposits, mine workings and claims, local geology of mine properties and veins). The next two parts describe areas in the Thunder Bay district, including their topography, general geology (Precambrian volcanics, intrusives, sediments, and Pleistocene deposits), structural geology, and economic geology. Descriptions are provided of mining claims and properties (mainly gold and iron) and local geology. The fourth part focuses on the first gold mine in western Ontario, the Huronian, and its regional and local geology. The final part describes a nickel-copper deposit near Shebandowan Lake, including its mineralogy, composition, local geology, and origin.

Gowganda silver area, fourth report, revised : Gowganda vein minerals : Anima-Nipissing Lake area

By A.G. Burrows and E.W. Todd. Toronto : Dept. of Mines, 1926. vi, 110 p. : ill., Maps, Bibl. Published as vol. XXXV, part III, of the Ontario Dept. of Mines annual report, 1926. Fold. maps not filmed.
MICROLOG 96-07390 (2 fiche)

The first part of this report begins with an introduction to the topography and silver mine production of the Gowganda area, located about 80 miles north of Sudbury. It then describes the area's general geology (Precambrian volcanics, intrusives, sediments), with special attention to the Nipissing diabase, and discusses the origin of the area's silver ores. Silver mines and prospects found in the area are also detailed. The second part reviews the mineralogy of the Gowganda silver veins, as revealed in microscopic studies. The third part describes the topography, natural resources, and general geology of the Anima-Nipissing Lake area located about ten miles south-west of Cobalt. This part contains a section on economic geology which includes information on the contact relationships of the Nipissing diabase, veins in the diabase, and mine operations and claims in the area.

Greater Toronto Area 3Rs analysis : summary report, Peel Region -- Draft

M.M. Dillon Ltd. Toronto : Ministry of Environment & Energy, Fiscal Planning & Information Management Branch, 1993. 28 p. ISBN 0-7778-2078-1
MICROLOG 96-07314 (1 fiche)

To facilitate its target of a 50% reduction in waste going to landfills and incineration by the year 2000, the Ontario government introduced the 1992 Waste Management Act. This study has two purposes, each relating to a requirement created by the Act. The first requirement requires submission of waste estimates and the second pertains to analysing the 3Rs (reuse, reduce, recycle) as alternatives to landfill waste disposal sites. The present study identifies and assesses alternative 3Rs systems, comprised of combinations of 3Rs programs, technologies, and practices, that could be reasonably implemented in the Peel Region of the Greater Toronto Area

(GTA). It also determines the potential for each 3Rs system to divert waste over the 20-year minimum life expectancy of the GTA landfill sites, and identifies the advantages and drawbacks of each system.

The Greening of aviation

By J.L. Cornish, A.D. Groeneweg and J.A. Nicell. Montreal : Transport Canada, Transportation Development Centre, 1996. xvi, 100 p. : ill., Bibl. French ed. (Le Virage écologique de l'industrie...) : 96-07496/2.
MICROLOG 96-07497 (2 fiche)

The objectives of this report are to identify and assess environmental problems associated with international aviation and to propose an effective strategy for their solution. The work included summarising the scale, scope, economic impact, and future prospects of the aviation industry in Canada and world-wide; defining the environmental challenges facing the industry today; and formulating recommendations on the establishment of a mechanism for analysing and resolving environmental concerns based on the prioritisation of aviation environmental needs. The environmental issues discussed include global impacts (greenhouse effect, ozone layer depletion), air quality, water quality, waste management, noise, resource consumption, and ecological/heritage resources. Examples of environmental initiatives are included for each of these issues.

Groundhog River area : geology along an eastward continuation of Niven's 4th base line : meridian and base lines south of Lake St. Joseph, District of Thunder Bay

By E.W. Todd, T.L. Gledhill and J.P. Johnson. Toronto : Dept. of Mines, 1925. v, 52 p. : ill., Maps, Bibl. Published as vol. XXXIII, part VI, of the Ontario Dept. of Mines annual report, 1924.
MICROLOG 96-07513 (1 fiche)

The first part of this report describes an area situated about 25 miles north of Gogama, Ontario. It describes the area's surface characteristics, canoe routes, general geology (Precambrian intrusives, volcanics), and economic geology (gold claims, a barite deposit, the iron formation, and showings of some other economic minerals). The second part covers the geology along a base line running eastward from Sturgeon Lake to the Nipigon Forest Reserve, focusing on the igneous and metamorphic rocks observed. Separate sections describe gold quartz veins, granodiorite and associated porphyries, and syenites of the Sturgeon Lake area. The third part summarises the topography, natural resources, and geology of survey lines south of Lake St. Joseph in the Thunder Bay district. This part consists largely of running commentary on the rocks encountered.

Growth, development and yield of mixed-wood stands in Alberta following partial cutting of white spruce

By Imre E. Bella and Janos Gál. Edmonton : Natural Resources Canada, Canadian Forest Service, Northwest Region, Northern Forestry Centre, 1996. vi, 20 p. : ill., Bibl. (Information report / Northern Forestry Centre (Canada) ; NOR-X-346 ISSN 0704-7673) ISBN 0-662-24158-4 CCG-P no. Fo46-12/346E
MICROLOG 96-07479 (1 fiche)

In 1951-52, 121 permanent sample plots were established at 16 locations in mixed stands of white spruce and trembling aspen, which had undergone partial cutting that had removed the largest white spruce. This report describes a study that assessed the growth rates and productivity of those stands, with emphasis on white spruce. The stands were re-examined in 1962 and 1993, with the additional goals of determining whether a similar system of partial cutting would ensure future white spruce

harvests, and of monitoring and explaining mortality dynamics in those partially cut stands. Information recorded at each site included a complete tally of all trees by species in diameter classes, increment borings to determine growth, ring counts to determine age, height and diameter measurements for species other than white spruce, and a tally of dead white spruce based on external signs. A multiple regression model was developed to predict spruce merchantable volume yield for similar stands.

Guide to the use of mechanical site preparation equipment in Northwestern Ontario

By B.J. Sutherland and F.F. Foreman. Sault Ste. Marie, ON : Natural Resources Canada, Canadian Forest Service ; Toronto : Ministry of Natural Resources, 1995. 186 p. : ill., Bibl. (Technical report / Ontario. Northwest Region Science & Technology ; no. 87 ISSN 1992-8654) On cover: *Canada-Ontario Northern Ontario Development Agreement, Forestry*. ISBN 0-662-23069-8 CCG-P no. Fo42-237/1995E MICROLOG 96-07467 (2 fiche)

This guide will help forest management personnel in north-western Ontario select and use mechanical site preparation equipment in order to produce growing conditions suitable for germination and growth of seedlings. Information in the guide is presented in three sections: biological considerations for good site preparation, including the major factors affecting seedling survival and growth;

mechanical site preparation categories, including screefling, inverting, trenching, mixing, and subsoiling, as well as microsite requirements of crop trees (jack pine, black or white spruce, red pine) by site preparation category; and representative examples of postharvest site conditions and site preparation results achieved, as observed in a photo series of typical site preparation case studies from across north-western Ontario. Each photo set documents pre- and post-site preparation conditions after harvesting and includes a rating of site plantability and receptivity achieved by the site preparation equipment. Includes glossary.

Gypsum in Ontario : geology of the gypsum deposits of southwestern Ontario

By George E. Cole and W.S. Dyer. Toronto : Dept. of Mines, 1925. III, 62 p. : ill., Maps, Bibl. Published as vol. XXXIV, part II, of the *Ontario Dept. of Mines annual report, 1925*. MICROLOG 96-07525 (1 fiche)

The first part of this report begins with an introduction on the nature of gypsum and a history of the Ontario gypsum industry. It then describes gypsum occurrences in northern and south-western Ontario, the general geology of gypsum, and varieties of gypsum mined in the province. Finally, it describes gypsum mining, processing, and manufacture of gypsum products at two Ontario gypsum operations (Caledonia Mine and Lythmore Mine). The second part reviews the geology of south-western Ontario gypsum deposits, beginning with the principles of salt and gypsum deposition. It then describes the stratigraphy of the gypsum deposits, the areal distribution of gypsum in four counties, the gypsum reserves found in the south-west peninsula and north-west of Waterloo, salt reserves, and the distribution of anhydrite.

Harvesting overmature aspen stands in central Alberta

By Bjorn Andersson and Craig M. Evans. Edmonton : Canadian Forest Service ; Alberta Land & Forest Services, 1996. VIII, 42 p. : ill., Bibl. (FERIC special report / Forest Engineering Research Institute of Canada ; no. SR-112 ISSN 0835-0752) On cover: *Canada-Alberta Partnership Agreement in Forestry*. ISBN 0-662-24923-2 CCG-P no. Fo42-91/144-1996E MICROLOG 96-07534 (1 fiche)

Describes a project undertaken to examine the performance of feller-bunchers, grapple skidders, roadside delimbers, and slashers operating in overmature aspen stands in central Alberta. The project aimed at providing the forest industry with information for projecting productivities and costs of harvesting overmature aspen stands. The investigators measured machine productivity in aspen stands of different characteristics, as well as fibre losses from excessive butt rot, upper stem defects, and conversion of tree-length stems into 2.6-metre logs. The field data provided input for determining operating cost and projected machine productivity as functions of tree size or skidding distance. The report also discusses the impact on cost of harvesting decaying stands.

High speed rail and maglev : evolution, status and prospects

By Tony R. Eastham. Montreal : Transportation Development Centre, Safety & Security, 1996. xii, 53 p. : ill., Bibl. On cover: *Queen's University, Department of Electrical and Computer Engineering*. MICROLOG 96-07499 (1 fiche)

Begins with a macroscopic picture of the evolution of passenger transportation, showing that the introduction, growth, and decline of a particular mode follows a Gompertz-type curve. Following the noted historical trend showing a progressive transition from waterways to railways to roads to airways, it is argued that a new mode should be introduced to provide mobility into the 21st century: high speed ground transportation. Development of high speed rail and magnetic levitation (maglev) systems is then reviewed, focusing on systems that are operational or under development in Europe and Japan, and concluding with some thoughts on how these modes will evolve. The technology and potential applications of high speed ground transportation and a low/intermediate speed maglev system are described. Concludes with a discussion of the potential intra- and inter-city applications for high speed rail and maglev systems in Canada.

Hospital separations by health districts and for selected conditions, 1993-94

Regina : Saskatchewan Health, Population Health Branch, 1996. 118 p. : ill. MICROLOG 96-07106 (2 fiche)

The data in this document were extracted from the Saskatchewan hospital separations data base and represent the frequency of hospital use (separations) by individuals living within a given health district regardless of where the hospitalisation occurred. Data were grouped by Canadian List Diagnosis (CLD) and then age and gender adjusted rates were calculated using June 1994 population data. The first section of this document contains charts contrasting the hospitalisation rates by health district for each CLD which ranked in the top 20 for the entire province. Charts are arranged in decreasing rank, and a chart showing the hospitalisation rates by health district for malignancies is also included. The next section displays hospitalisation rates for each health district by the top 20 CLDs. Tables are also provided for each district, containing the 40 diagnostic categories accounting

for the highest rates of hospitalisation among district residents. The appendix contains the Canadian List Number and Diagnosis and the corresponding ICD-9 codes.

Human factors guides

By Johanne Penington. Ottawa : Atomic Energy Control Board, 1995. viii, 268 p. : ill., Bibl. (Report / Canada. Atomic Energy Control Board ; INFO-0605) MICROLOG 96-07544 (3 fiche)

This document presents human factors guides which have been developed to provide Atomic Energy Control Board licensees with advice as to how to address human factors issues within the design and measurement process. The first part of the document contains a general overview of issues relevant to all the guides. The three guides then follow in separate sections. The first guide is for the development of a human factors program for a design or assessment project. It outlines some general aspects of human factors philosophy, discusses applicability of the guide to the nuclear industry, and outlines elements of a human factors program. The second guide presents some of the most commonly used methods and techniques to fill human factors objectives, including their rationale, resource requirements, and appropriate project stage for their use. The final guide outlines human factors issues which should be considered within the design and assessment process of nuclear facilities. These issues relate to such areas as facility layout and access, maintenance, and environmental conditions. A separate section is devoted to the control room, due to its importance in nuclear facilities.

Hydraulic flood routing models of the Peace and Slave rivers, Hudson Hope to Great Slave Lake

By Faye E. Hicks and K. McKay. Edmonton : Northern River Basins Study, 1996. vi, 156 p. : ill., Maps, Bibl. (Northern River Basins Study project report / Northern River Basins Study (Canada) ; no. 77 ISSN 1192-3571) Diskettes not included with microfiche. ISBN 0-662-24796-5 CCG-P no. R71-49/3-77E MICROLOG 96-07234 (2 fiche)

Describes a hydraulic flood routing model developed to accurately model the open water river discharge on the Peace and Slave rivers. The model is capable of modelling the discharge at sites where no discharge data exist. The document includes description of the development of the database for the model, including the geometric database (channel distances, surface slopes, bed profiles, channel widths and resistances) and the hydrologic data. The appendix includes a user manual for the user-friendly microcomputer program that has been set up to run historical flows (1961-93) and to simulate naturalised flows on the Peace River (1969-91).

Hydrogeologic characteristics of domains of sparsely fractured rock in the granitic Lac du Bonnet batholith, southeastern Manitoba, Canada

By D.R. Stevenson... et al. Pinawa, MB : Atomic Energy of Canada Ltd., Whiteshell Laboratories, 1996. 26 p. : ill., Maps, Bibl. (AECL research / Atomic Energy of Canada Ltd. ; AECL-11558 ISSN 0067-0367) ISBN 0-660-16516-3 CCG-P no. CC2-11558E MICROLOG 96-07115 (1 fiche)

Hydrogeologic studies at the granitic Lac du Bonnet batholith in south-eastern Manitoba have included an extensive program of drilling, borehole logging, rock testing, sampling, and monitoring in 19 deep surface boreholes. The results of these studies were combined with an earlier database to produce a revised conceptual groundwater flow

model of the rocks in the Whiteshell Research Area (WRA). The model could not be calibrated against observed data until the rock domains of the batholith were divided into two types based on rock alteration, pore water quality, and pore pressure data. This report summarises the available information which allowed incorporation of these distinct domains into the revised groundwater flow model. It includes descriptions of the lithology, rock structure, and the hydraulic properties of the sparsely fractured rock domains at the WRA, and a summary of the domains' hydrogeologic characteristics.

Identification and monitoring of non-radiological carcinogens

By C.A. Chuaquil... et al. Ottawa : Atomic Energy Control Board, 1995. x, 81 p. : ill., Bibl. (Report / Canada. Atomic Energy Control Board ; INFO-0594) MICROLOG 96-07549 (1 fiche)

Examines the feasibility of identifying and monitoring occupational exposures to non-radiological carcinogens in the workplace at Canadian nuclear establishments; also describes the problem of chemical carcinogens and the mechanisms involved in chemical carcinogenesis, the epidemiology related to the problem, the analytical aspects of detection, monitoring and analysis of carcinogens, and the regulatory aspects and regulations in place. A list of chemical carcinogens used industrially at four Canadian nuclear facilities is identified, and several recommendations are made in relation to the need for practical and efficient monitoring methods for chemical carcinogens, the definition of radiation and chemical dose equivalences, and the classification and disposal of chemical carcinogens.

Igneous rocks of Sudbury and their relation to the ore deposits

By T.C. Phemister. Toronto : Dept. of Mines, 1926. iv, 61 p. : ill., Maps, Bibl. Published as vol. XXXIV, part VIII, of the Ontario Dept. of Mines annual report, 1925. Fold. maps not filmed. MICROLOG 96-07547 (1 fiche)

This paper presents evidence regarding the Precambrian igneous rocks of the Sudbury nickel region, showing that the norite and micropegmatite identified in previous researches are two separate intrusions, and that the norite should be called a gabbro. After a brief introduction on the general geology of the area, the paper discusses three different problems: the structural and time relationships of the norite and micropegmatite, the granites of the southern nickel range, and the rock of the off-sets; the character of the norite-micropegmatite itself; and the genesis of the nickeliferous pyroxenite ore bodies. Field investigations described in the paper include traverses across the area in question, describing mineralogical variations and contact metamorphism. The study of the ore deposits considers the distribution of sulphides, their relation to the structure of the area, and the occurrence and petrography of the ore bodies.

Improving the Canada Pension Plan : a report

National Council of Welfare (Canada). Ottawa : The Council, 1996. 40 p. : *Bibl.*
ISBN 0-662-24984-4 CCG-P no. H68-39/1996E
MICROLOG 96-07484 (1 fiche)

Begins with a review of some of the myths and misconceptions about the Canada Pension Plan that have become an impediment to intelligent debate about the Plan. Chapter two reviews proposals for steady-state financing of the Plan and suggests the possibility of broadening the base of contributory earnings. Chapter three proposes some possible improvements in Plan benefits and criticises cuts that have been suggested by the federal government in its 1996 consultation paper entitled An Information Paper for Consultations on the Canada Pension Plan. Chapter four contains a critique of the research that went into the consultation paper as well as a review of long-standing concerns about the secretive ways in which governments exercise their stewardship over the Plan.

Independent verification in operations at nuclear power plants

By D.C. Donderi...et al. Ottawa : Atomic Energy Control Board, 1995. vi, 8 p. (Report / Canada. Atomic Energy Control Board ; INFO-0592-1)
MICROLOG 96-07550 (1 fiche)

This report identifies the uses of independent verification in nuclear power plant operations and provides an assessment of the effectiveness of the various approaches. For the purposes of the report, independent verification is defined as a second person observing and verifying control settings shortly after the controls have been changed by a first person. Comparisons are made between independent verification practices in Canada and in other countries. On the basis of knowledge of human error and on conversations with staff at various nuclear plants, the report recommends research that could be undertaken to assist in achieving the goal of independent verification, namely the reduction of error.

Inhalable particulate matter in Edmonton and Calgary from 1984 to 1993

By D.L. Bates. Edmonton : Alberta Environmental Protection, Chemicals Assessment & Management Division, Air Issues & Monitoring Branch, 1996. 49 p. : *Ill.*, *Bibl.* ISBN 0-7732-5052-2
MICROLOG 96-07614 (2 fiche)

This report has been compiled to support health impact investigations and the development of ambient objectives for particulates. It evaluates the size and composition of airborne particulate matter in downtown Edmonton and Calgary, as measured using dichotomous samplers and size selective inlet samplers during 1984-93. Monitoring sites in the two cities are compared in terms of measured ambient mass loadings of particulates less than 10 microns and less than 2.5 microns in diameter, and their composition, as well as seasonal peaks and trends in concentration. A summary of the operation of the two particulate monitoring instruments is also included.

Intelligent transportation systems : an approach to benefit-cost studies

By Richard Zaverghu. Montreal : Transport Canada, Transportation Development Centre, 1996. xiv, 87 p. : *Bibl.*
MICROLOG 96-07503 (2 fiche)

The identification, measurement, and allocation of benefits and costs for intelligent transportation systems (ITS) are critical areas of investigation that influence the decision making related to ITS implementation. Traditional methods have concentrated on safety improvements and congestion relief, where time savings and reduction of incidents have generated the bulk of ITS benefits for transportation users. This approach limits the scope of a benefit-cost analysis and an underestimation of ITS benefits. This report develops an alternative approach that identifies four separate beneficiaries of ITS. It proposes a hierarchy of costs and benefits identifying and classifying benefits in relation to relevant costs. This framework will allow policy makers to understand how the financing of ITS deployment could be structured. To demonstrate how such a framework would work in a real-world ITS application, the report includes two case studies: one on border crossing and one on congestion charging.

Interpreting money-supply and interest-rate shocks as monetary-policy shocks

By Marcel Kasumovich. Ottawa : Bank of Canada, 1996. 39 p. : Bibl. (Working paper / Bank of Canada ; 96-8 ISSN 1192-5434) ISBN 0-662-24940-9
MICROLOG 96-07255 (1 fiche)

This paper analyses two economic shocks using Canadian data: a money-supply shock and an interest-rate shock. Money-supply shocks are derived using long-run restrictions based on long-run propositions of monetary theory, and are represented by an orthogonalised innovation in the trend shared by money and prices. An interest rate shock is represented by the orthogonalised innovation in

the overnight interest rate. Either type of shock might be interpreted as a monetary policy shock. The paper then analyses the dynamics of the transmission mechanism in the Canadian economy, interpreting the supply of money in excess of its long-run demand as an indicator of the stance of monetary policy. The empirical methodology used is adaptation of that of King, Plosser, Stock, and Watson (1991).

Investment rules for the global economy : enhancing access to markets

Pierre Sauvé and Daniel Schwanen, eds. Toronto : C.D. Howe Institute, 1996. viii, 332 p. : Bibl. (Policy study / C.D. Howe Institute ; no. 28 ISSN 0832-7912) ISBN 0-88806-386-5
MICROLOG 96-07137 (4 fiche)

A key element in the formal liberalisation of the global marketplace is the codification of relations between states and foreign investors. Such codification has become an essential complement to the existing elaborate rules governing trade flows, since trade and investment increasingly complement each other. This book presents a collection of papers that document the current state of international investor-state relations, examine the technical and theoretical issues underlying the need for multilateral rules on investment, and discuss proposals for the content and process of such a rule-making initiative. Topics of the papers consider such matters as existing investment instruments, negotiation of an agreement on foreign direct investment, lessons learned from NAFTA, investment barriers, private and public impediments to market presence, and tax harmonisation.

Le Logement polyvalent : une solution de rechange souple, Dovel Construction Ltd., Richmond, Colombie-Britannique

Energy Pathways Inc. Ottawa : Fédération canadienne des municipalités ; Société canadienne d'hypothèques et de logement ; Assn canadienne des constructeurs d'habitations ; Assn canadienne d'habitation et de rénovation urbaine, 1995. II, 23, II, 19 p. : ill. Sur la couv. : A.C.T., Abordabilité et choix toujours, réformes réglementaires pour améliorer l'habitation. Bilingue (The Convertible house...). En tête du titre: Abordabilité et choix toujours (A.C.T.), Projet de démonstration.
MICROLOG 96-07460 (1 fiche)

En novembre 1990, on a tenté de mettre à exécution un projet de démonstration du logement polyvalent. L'objectif principal du projet était de montrer que les nouvelles habitations dotées d'appartements accessoires optionnels pouvaient : permettre de conserver le caractère des quartiers où dominent les maisons individuelles; être facilement réaménagées pour répondre aux besoins en constante évolution des propriétaires-occupants; et, être plus abordables que les logements non polyvalents de taille comparable. Ce document présente les résultats de cette étude de cas sur le logement polyvalent.

Lysimeter studies to evaluate the impacts of intensive harvesting and site preparation methods on site quality : an establishment report

By D.G.O. Kingston... et al. Fredericton : Natural Resources Canada, Canadian Forest Service - Fredericton, 1995. 43 p. : Maps, Bibl. (Information report ; M-X-197E ISSN 1195-3799) French ed. (Etudes lysimétriques visant à évaluer...) : 96-07311/1. Funded by the Canada/Nova Scotia Cooperation Agreement for Forestry Development. ISBN 0-662-23984-9 CCG-P no. Fo46-19/197E
MICROLOG 96-07334 (1 fiche)

Concern about the possible deleterious impacts of whole-tree harvesting on soil nutrients and site quality, combined with the increased trend toward whole-tree harvesting in the Maritime Provinces, led the Canadian Forest Service to initiate lysimeter studies described in this report. The studies were designed to evaluate the possibilities of soil degradation due to harvesting, site preparation methods, and planting of different tree species. The studies were conducted at four Nova Scotia locations representing different hardwood and softwood stands growing on some representative soil types and site classes. This report includes descriptions of the experimental set-up, stands, and soils on each study site. Appendices include tables of estimates of total biomass on site and biomass removed by whole-tree harvesting, estimates of nutrients and of increase in nutrient removal due to harvesting, and pH and moisture content field capacity at the four sites.

Manitoba provincial parks public consultations, phase 2 : draft system plan summary

Winnipeg : Manitoba Natural Resources, 1996. 12 p. : Maps
MICROLOG 96-07402 (1 fiche)

Presents a summary of Manitoba draft park system plan prepared after a 1995-96 public consultation, and provides information about the second phase of consultation to be used in developing a final version of the plan. The system plan is intended to provide balance among the various purposes that a provincial park can serve (recreation, protection, resource use) and to ensure that an organised approach is taken to park protection, use, and development over the long term. The draft plan is presented in two parts: part one highlights of park classifications and land use categories, and discusses future directions for the park system; part

two contains park proposals which describe each park's classification and land use categories. Proposals for the larger parks also include a map and park purpose statements.

Manual for exponential nutrient loading of seedlings to improve outplanting performance on competitive forest sites

By V.R. Timmer and A.S. Aidelbaum. Sault Ste. Marie, ON : Natural Resources Canada, Canadian Forest Service - Ontario, Great Lakes Forestry Centre ; Toronto : Ministry of Natural Resources, 1996. 22 p. : ill., Bibl. (NODA/NFP technical report / Great Lakes Forestry Centre ; TR-25 ISSN 1195-2334) On title page: Canada-Ontario Northern Ontario Development Agreement, Forestry. ISBN 0-662-24208-4 CCG-P no. Fo29-42/25-1996E
MICROLOG 96-07112 (1 fiche)

Provides a review of principles and technology of exponential fertilisation and nutrient loading for container stock production, an examination of the growth and nutritional responses of loaded seedlings planted on competitive sites, and information for implementing exponential nutrient loading practices on an operational basis. The loading technique presented improves the competitiveness of containerised seedlings planted on vegetation-rich mixedwood sites by promoting initial growth performance and weed suppression. The approach is based on two new preconditioning practices which

promote steady-state luxury consumption of nutrients in seedlings for outplanting.

Metallogeny of the central mineral belt and adjacent Archean basement, Labrador

By Derek H. Wilson. St. John's : Dept. of Mines & Energy, Geological Survey, 1996. xvii, 178 p. : ill., Maps, Bibl. (Mineral resources report / Newfoundland. Geological Survey Branch ; 8) Fold. map not filmed. ISBN 1-55146-024-6
MICROLOG 96-07592 (3 fiche)

The Labrador Central Mineral Belt comprises a series of six successive Proterozoic supracrustal sequences and associated Archean basement rocks occupying a 260-by-75 kilometre area in central to coastal Labrador. The Belt hosts most of the base metal and uraniumiferous occurrences known in Labrador. This report provides geological and geochemical data on each mineralised lithostratigraphic unit in the Belt, and then describes the mineral occurrences within that unit. Information is presented in this manner in order to define a chronological hierarchy of mineralisation within each basement and supracrustal sequence, which can then be used to examine large-scale regional parameters of mineralisation through the Belt. Limited sampling was completed on all showings and some new con-

clusions are presented based on this work.

Methanol in Ontario, an assessment of a transportation fuel alternative : summary report

Prepared by the Ontario Energy Corporation ; for the Ontario Ministry of Energy. Toronto : The Corporation, 1984. xiv, 101 p. : *ill.*
MICROLOG 96-07641 (2 fiche)

The objectives of this study are to: determine the role for methanol as an alternative to petroleum-based fuels for transportation in Ontario; assess the prospects, timing, and preconditions for commercialisation of methanol fuels; and identify the best technology and feedstock combinations for production of methanol in Ontario. The study scope included the fuel distribution system, vehicle technology, fuel specifications, and regulatory, environmental, and safety issues. In addition, vehicle and fuel trends were predicted, consumer attitudes surveyed, and economics evaluated from the methanol plant to the pump. On the production side, the study focused on the potential for methanol synthesis from lignite, wood, and peat, with the economics of conventional natural gas processes used as a basis for comparison. Includes glossary.

Méthodes alternatives d'aménagement des bétulaies blanches : projet no 9000

Dendrotik Inc. Ottawa : Ressources naturelles Canada, Service canadien des forêts, 1995. vii, 60 p. : *ill.* Sur la couv. : Essais, expérimentations et transfert technologique en foresterie. Financé en vertu de l'Entente audilaire Canada-Québec sur le développement économique des régions du Québec. ISBN 0-662-81437-1 GCC-E no Fo29-39/58-1996F
MICROLOG 96-07363 (1 fiche)

Le projet visait à identifier les meilleures méthodes d'aménagement pour optimiser le rendement des forêts de bouleau blanc. Dans un premier temps, le potentiel réel du bouleau à papier comme bois d'oeuvre dans les différentes régions du Québec a été réalisée. Par la suite, en collaboration avec des industriels des régions concernées, des peuplements à étudier ont été choisis. Dans un deuxième temps, des données furent recueillies dans les peuplements choisis puis analysées afin de déterminer les réactions des bétulaies blanches aux coupes partielles réalisées il y a 10 à 20 ans. Cette étude a permis d'évaluer les traitements sylvicoles susceptibles d'optimiser, à long terme, le rendement en bois d'oeuvre des bétulaies, tout en assurant, à court terme et moyen terme, des approvisionnements à l'industrie.

A Methodology for PSA model validation

By Stephen D. Unwin. Ottawa : Atomic Energy Control Board, 1995. xlii, 181 p. : *ill.*, *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0595-2)
MICROLOG 96-07669 (3 fiche)

Reports the second phase of work undertaken in support of the Atomic Energy Control Board's probabilistic safety assessment (PSA) review. A methodology is presented for the systematic review and evaluation of a PSA model. These methods are intended to support consideration of the following question, identified as a key PSA validation issue in the first phase: to within the scope and depth of modelling resolution of a PSA study, is the resultant model a complete and accurate representation of the subject plant? The validation methods are based on a model transformation process devised to enhance the transparency of the modelling assumptions. Through conversion to a success-oriented framework, a closer correspondence to plant design and operational specifications is achieved. The process is defined and applied to fault trees documented in the Darlington probabilistic safety evaluation. An electrical system and a mechanical system are chosen for trial application, and a tentative real-time process is outlined for implementation and documentation of a PSA review based on the proposed methods.

Microbial analysis of the buffer/container experiment at AECL's Underground Research Laboratory

By S. Stroes-Gascoyne... et al. Pinawa, MB : Whiteshell Laboratories, 1996. 219 p. : *ill.*, *Bibl.* (AECL research / Atomic Energy of Canada Ltd. ;

AECL-11436 ISSN 0067-0367)
ISBN 0-660-16510-4 CCG-P no. CC2-11436E
MICROLOG 96-07395 (3 fiche)

The 2.5-year buffer/container experiment at the Underground Research Laboratory examined the in-situ performance of compacted buffer material in a single emplacement borehole under vault-relevant conditions. During the experiment decommissioning, samples were taken for microbial analysis to determine if the naturally present microbial population in buffer material survived the conditions and to determine which group(s) of micro-organisms would be dominant in such a simulated vault environment. Such knowledge will be useful in assessing the potential effects of microbial activity on the concept for deep disposal of Canada's nuclear fuel waste. This report describes the microbial sampling and analysis methods used, as well as the results. Implications of the results (microbial survival, viability, activity, and conditions affecting micro-organisms) for nuclear fuel waste management are discussed.

Microclimatic influences on advance Amabilis fir regeneration in clearcut and understorey habitats of a coastal montane reforestation site

By R.S. Koppelaar... et al. Victoria : Canada-British Columbia Partnership Agreement on Forest Resource Development: FRDA II, 1995. vi, 20 p. : *ill.*, *Bibl.* (FRDA report / Canada-British Columbia Partnership Agreement on Forest Resource Development: FRDA II ; 233 ISSN 0835-0752) On cover: *Forestry*. ISBN 0-7726-2562-X
MICROLOG 96-07283 (1 fiche)

Problems with delayed and inconsistent growth of advance regeneration following clear-cutting on high-elevation coastal reforestation sites have raised concern over the influence of post-harvest microclimate on the regeneration of shade-tolerant conifers. This report assesses the growth and physiology of advance amabilis fir (*Abies amabilis*) regeneration in response to a microclimatic gradient that extended from the understorey of an old-growth montane forest into an adjoining clear-cut. The study area was located on eastern Vancouver Island. Discussion of results covers the site microclimate, tree growth and morphology, photosynthesis and water relations, heat tolerance, and frost hardiness.

Mississagi Reserve and Goulais River Iron ranges, District of Algoma : the Whiskey Lake area, District of Algoma : La Cloche area, District of Sudbury

By E.S. Moore and G. Vibert Douglas. Toronto : Dept. of Mines, 1926. iv, 56 p. : ill., Maps, Bibl. Published as vol. XXXIV, part IV, of the Ontario Dept. of Mines annual report, 1925. Fold. maps not filmed.
MICROLOG 96-07546 (1 fiche)

The first part of this report describes the topography, natural resources, general geology, structural geology, and economic geology of the Mississagi Forest Reserve and Goulais River Iron ranges, located about 25 miles north of Sault Ste. Marie. Some information on mining claims and a discussion of the economic possibilities of the southern part of the range are included. The second part describes the topography, general geology, and economic geology of an area located around Whiskey Lake, about 15 miles north of Lake Huron. This part includes descriptions of some iron mining claims. The third part describes an area around Harrow Township and La Cloche Lake, off the North Channel of Lake Huron. It includes brief descriptions of the area's general geology and mineral occurrences.

Moving to competition, a guide to Alberta's new electric industry structure

Edmonton : Dept. of Energy, Electricity Branch, Policy Division, 1996. 19 p. : ill.
ISBN 0-7732-0943-3
MICROLOG 96-07435 (1 fiche)

This guide outlines the main components of the new structure of Alberta's electric power industry. The new structure is the result of changes in the

key characteristics of the old structure: vertical integration and regulated monopoly. Technological developments have made the former no longer necessary to ensure reliability or safety. Small-scale generation technology has become cost-effective, and some consumers have the ability and desire to make their own arrangements for electricity supply, making a regulated monopoly only necessary for the transmission side of the industry. Elements of the new industry structure include open competition for power generation, an open access power pool, regulated distribution, and removal of restrictions on power imports and exports.

National Strategy for the Integration of Persons with Disabilities, CMHC initiatives : program evaluation report - Draft

Ottawa : Canada Mortgage & Housing Corporation, Program Evaluation Division, 1995. 70 p. : *Bibl. French ed. (Stratégie nationale pour l'intégration...)* : 96-07429/1.
MICROLOG 96-07428 (1 fiche)

The National Strategy for the Integration of Persons with Disabilities is a five-year federal program involving 11 departments or agencies. The Strategy's purpose is to help persons with disabilities to work, live, and participate in leisure activities independently. This report evaluates the activities of Canada Mortgage & Housing funded under that Strategy, specifically its Home Adaptation for Seniors' Independence (HASI) pilot program which was to assist seniors with diminishing abilities to continue living independently in their own homes. HASI projects developed and designed construction solutions to improve seniors' living conditions, and the report evaluates the effects of completed and ongoing projects on awareness of disability issues and accessibility, the design and delivery success of the program, the success of research and demonstration initiatives, and the program's cost-effectiveness.

Natural regeneration of hardwood and softwood tree species following full-tree harvesting in northwestern Ontario

By Edward S. Symons. Sault Ste. Marie, ON : Natural Resources Canada, Canadian Forest Service, Great Lakes Forestry Centre ; Toronto : Ministry of Natural Resources, 1996. 16 p. : *ill. Bibl. (NODA/NFP technical report / Great Lakes Forestry Centre ; TR-22 ISSN 1195-2334)* On cover: *Canada-Ontario Northern Ontario Development Agreement - Forestry, Northern Forestry Program.* ISBN 0-662-24097-9 CCG-P no. Fo29-42/22-1996E
MICROLOG 96-07634 (1 fiche)

Presents results of a study that describes the stand structure and composition of selected full-tree harvested sites about ten years after harvest, with examination of evidence for ingress of natural regeneration. Sampled sites were stratified by seedbed condition and the pre-harvest vegetation type they supported; seedbeds were classified as either intact/mixed forest floor or scalped/mineral soil exposed. Vegetation types were amalgamated into ecologically similar groups or treatment units. Most sites were classified as black spruce-jack pine/feathermoss with intact/mixed forest floor seedbeds. Both the rate of natural ingress over the first seven years of stand development and the resultant stand structure and composition are noted.

Neural networks for multisensor data fusion

By John Litva, Fengshen Wang, Titus Lo ; submitted to Defence Research Establishment Valcartier. Hamilton, ON : McMaster University, Communications Research Laboratory, 1995. 70 p. : *ill. Bibl.*
MICROLOG 96-07529 (1 fiche)

Describes research to study multisensor data fusion using artificial neural networks (ANN). In a study of multisensor data fusion for airborne target classification with ANN, a feature set possessing the dominant characteristics of targets and having a certain dynamic range, is chosen to teach the networks. The entire system consists of identification sets and classification sets; each identification network extracts a particular feature of the target, then the outputs of these networks are fused by a classification network, in which the neural network acts as a decision-making processor. Multilayer perceptrons neural networks trained by back-propagation rule are discussed, and simulation results are presented. In a related study of neural data association, the authors create new energy functions for measurement data association that consists of assigning radar contacts to predicted track positions. The neural network presented for the association problem can minimise a global cost, and its performance is compared to that of the neural networks.

North American emergency response guidebook : a guidebook for first responders during the initial phase of a hazardous materials/dangerous goods incident, 1996

Ottawa : Transport Canada, Dangerous Goods, Safety & Security, 1996. 355 p. : ill. French ed. (*Guide nord-américain des mesures...*) : 96-07645/4. On cover: U.S. Department of Transportation, Research and Special Programs Administration, [Mexico] Secretariat of Transport and Communications.
MICROLOG 96-07644 (4 fiche)

This guidebook was developed for use by fire fighters, police, and other emergency services personnel who may be the first to arrive at the scene of a transportation incident involving dangerous goods. However, it should not be considered a substitute for emergency response training, knowledge or sound judgement. Includes a table of placards with initials. The guide is divided into three sections: describes potential hazards that the material may display in terms of fire/explosion and health effects upon exposure; outlines suggested public safety measures based on the situation at hand,

provides general information regarding immediate isolation of the site, the recommended type of protective clothing and respiratory protection, and suggested evacuation distances for small and large spills and for fire situations. Finally, it covers response actions and first aid, outlines special precautions for incidents which involve fire, spill or chemical exposure, and several recommendations are listed under each part which will further assist in the decision making process. Information on first aid is general guidance prior to seeking medical care.

The Notwithstanding clause, Section 33 of the Charter of Rights - Rev.

By Philip Kaye. Toronto : Ontario Legislative Library, Legislative Research Service, 1992. 31 p. : Bibl. (Current issue paper / Ontario. Legislative Library : no. 72 ISSN 0835-0299)
MICROLOG 96-07692 (1 fiche)

Section 33 of the Canadian Charter of Rights and Freedoms, more popularly known as the 'notwithstanding clause', permits provincial legislatures as well as the federal parliament to opt out of, or override, many of the Charter's protections. This so-called override power has become the subject of growing controversy, especially with the passage of Quebec's Bill 178 regarding the language displayed on signs. This paper reviews the arguments in support of, and in opposition to, Section 33. It examines the nature of the notwithstanding clause, which kinds of rights and freedoms can be overridden, how the clause is invoked, how and why it was used in Bill 178, where else the override power has been exercised, and whether the clause's inclusion in the Charter is a setback in Canadian legal history. Finally, the paper looks at how the debate over Section 33 has given rise to a resolution of the Ontario legislature and a recommendation by one of its committees.

Dupuytren's contracture is a disease of the palmar fascia resulting in a thickening and contracture of fibrous bands on the palmar surface of the hands and fingers. This paper reviews the literature on the clinical symptoms and signs of this disease, some epidemiological characteristics of the condition, the

pathogenesis of the disease, and associations of the disease with occupation. The latter associations are considered in two aspects: associations with chronic manual, repetitive work or vibration; and associations with a single injury (trauma).

Occupational standards development process

Canada. Occupational & Career Information Branch. Ottawa : The Branch, 1995. 17 p. *French ed.* (Processus d'élaboration de normes...) on the same fiche. ISBN 0-662-23473-1 CCG-P no. MP43-347/1995E
MICROLOG 96-07236 (1 fiche)

The Occupational Standards Development Process was developed to support the SPI and to provide industry, sector councils, associations, and national occupational groups with a simple, general and proven approach to help clarify the steps involved in the development of occupational standards and related training programs. The report outlines a flowchart of the process and briefly describes each of the critical steps. This report is intended to be informative and used as a checklist or guide only. It could also be used to identify the roles and responsibilities of key players and participants in each of the processes.

The Ombudsman : historical development, different models and common problems

By Paul Murray. Toronto : Ontario Legislative Library, Legislative Research Service, 1994. 34 p. : *Bibl.* (Current issue paper / Ontario. Legislative Library ; no. 153 ISSN 0835-0299)
MICROLOG 96-07688 (1 fiche)

This paper presents an overview of the institution of the ombudsman, tracing its historical development and diffusion from Sweden to jurisdictions around the world, including Ontario and other Canadian provinces. As the institution has spread, it has been adapted to vastly differing political systems. The paper examines some variations some variations in the model and its types, such as legislative, executive, specialised, and private sector ombudsmen. Finally, the paper discusses some of the problems often faced by legislative ombudsmen in particular and explains the steps taken by various jurisdictions to address those problems.

Optimum sensor fusion and data compression

By Q. Jin...et al. ; submitted to Defence Research Establishment Valcartier, Hamilton, ON : McMaster University, Communications Research Laboratory, 1995. 85 p. : *Ill., Bibl.*
MICROLOG 96-07527 (1 fiche)

In general, sensors can be considered as windows into the physical environment in which the phenomenon under observation is taking place. Since data collected by each sensor represent only partial information of the phenomenon under observation, a process of sensor fusion is needed so that more complete information can be acquired. At the very basic level, sensor fusion for combat and combat support systems includes detection, registration, association, correlation, filtering or tracking, and identification. This report focuses on target tracking using centralised Kalman filtering. It explores the idea of combining total measurement data collected from all sensors before applying the filtering algorithm, and an optimum method of linearly combining the measurement vectors is developed. Computer simulation results compare performance of this data fusion algorithm to one using the total measurement data. Two data compression methods are examined for transmitting the data from sensors to the central processor, and separate algorithms of data decomposition using these two methods are developed and evaluated by computer simulation.

Ore deposits near the north shore of Lake Huron : the Cartier-Stralak area, District of Sudbury

By E.S. Moore and F.F. Osborne. Toronto : Dept. of Mines, 1930. v. 74 p. : *Ill., Maps, Bibl. Published as vol. XXXVIII, part VII, of the Ontario Dept. of Mines annual report, 1929. Fold. maps not filmed.*
MICROLOG 96-07347 (1 fiche)

The main (first) part of this report focuses on the economic geology of 16 townships near the Lake Huron north shore, 13 of which are in the vicinity of Espanola and three inland to the west-northwest. The report begins with a review of the area's topography, drainage, industries, general geology, and structural geology, then outlines the general features of the ore deposits (copper, nickel, lead, and other metals) found in the area. Detailed descriptions are provided of various metal mines (mainly copper), exploratory workings, mining properties and claims, and ore deposit geology. The second part of the report covers the area north-west of Sudbury lying between Cartier and Stralak railway stations. The second part reviews this area's physiography, structural geology, general geology (Precambrian volcanics, intrusives, sediments), and economic geology, including descriptions of lead-zinc mining operations and other types of mineral properties and occurrences.

An Overview of potential isotopic techniques for dating groundwaters in crystalline rocks

By D.J. Bottomley. Ottawa : Atomic Energy Control Board, 1996. vii, 46 p. : *Ill., Bibl. (Report / Canada. Atomic Energy Control Board ; INFO-0630)*
MICROLOG 96-07656 (1 fiche)

The rate of groundwater flow through a particular rock formation is a major factor in determining whether it may be an acceptable geologic medium for the disposal of nuclear fuel waste. This report reviews isotopic techniques that could be potentially useful for dating groundwater in crystalline rocks of the Canadian Shield. Techniques are examined under four categories: radionuclides produced in the atmosphere, such as carbon 14; subsurface products of radioactive decay; uranium series disequilibrium; and application of stable isotope techniques. The final chapter presents and discusses results reported in the literature of groundwater age determinations in crystalline rocks.

Financial statements and a report of the auditors are included. BC CA FI SC ST

The Palaces of government : a history of the Legislative Buildings of the Provinces of Upper Canada, Canada and Ontario, 1792-1992

By Clare A. Dale. Toronto : Legislative Library, 1993. v, 114 p. : *Ill., Bibl.* ISBN 0-7778-0960-5 MICROLOG 96-07488 (2 fiche)

This study of the parliamentary buildings occupied by the legislatures of the provinces of Upper Canada, Canada, and Ontario describes the political and social developments which provided the historical background for the activities of successive legislatures and legislators of the past 200 years. It begins with the inception of the House of Assembly of Upper Canada at Newark in 1792 and the rest of the Upper Canada period (1797-1841) when the legislature was at York, later called Toronto. It then covers the Union period to 1867, when the legislature was at Kingston, Montreal, Toronto, and Quebec City. Finally, the post-Confederation period (1867 to date) is described, including the history of construction of the present legislative building in Toronto. CU ON PA PR SS

A Perception survey of forest fire research needs for west-central Canada

By Max M. Pinedo, Kelvin G. Hirsch and Bryan S. Lee. Edmonton : Natural Resources Canada, Canadian Forest Service, Northwest Region, Northern Forestry Centre, 1995. vi, 132 p. (Information report / Northern Forestry Centre (Canada) ; NOR-X-343 ISSN 0704-7673) ISBN 0-662-23648-3 CCG-P no. Fo46-12/343E MICROLOG 96-07478 (2 fiche)

Presents findings of a survey of fire management agencies, the forest industry, academic institutions, and selected resource management agencies within In Forestry Canada's Northwest Region. The survey objectives were: to identify current and anticipated fire research, development, and technology transfer needs and to determine their relative importance; to define those needs based on their value to the user agencies; and to obtain client perceptions on the fire research process at Northern Forestry Centre. Survey methodology involved a three-part questionnaire. Seventy research needs were ranked for the region (Alberta, Manitoba, Saskatchewan, and the Northwest Territories) according to their present (1-2 years) and future (3-5 years) importance. In addition, 36 activities were identified by users as potential research activities. The appendix includes a tabulation of survey results and a copy of the questionnaire. AL CA FO MS ND NO PW SC

Performance monitoring of a brick veneer/steel stud wall system : phase 2 results

Keller Engineering Associates Inc. Ottawa : Canada Mortgage & Housing Corporation, 1995. vi, 51 p. : *Ill., Bibl.* *French ed. (Etude de performance d'un système...)* : 96-07417/1. MICROLOG 96-07416 (1 fiche)

The rapid adaptation of the brick veneer/steel stud (BVSS) wall system in Canada has preceded the development of adequate design and construction standards, leading to concerns regarding the long-term safety, serviceability, and durability of BVSS wall systems. Accordingly, a study was initiated to monitor the in-situ performance of a BVSS wall system with respect to air and moisture movements as well as temperature gradients. This report presents results from the second year of monitoring a BVSS wall system of a seven-storey residential building in the Ottawa/Hull region. The wall performance

was monitored using various temperature, moisture, and air pressure sensors connected to an automatic data logging system. In addition, inspection openings were made in the wall to verify the results of the data analysis. Serious performance problems are identified which could cause significant building distress problems over the long term. CA DE PL SC

Perspectives on heritage : discussion paper

Regina : Interim Heritage Council, 1996. 20 p. MICROLOG 96-07125 (1 fiche)

This discussion paper is the first step in a process to review the entire spectrum of heritage issues in Saskatchewan. The purpose of the paper is to obtain views regarding the future direction of heritage activities in the province. It presents questions for discussion, along with commentary, in the following categories: the nature of heritage and the stewardship of heritage resources; the state of Saskatchewan heritage and what it is good for; the heritage community and its needs; heritage conservation leadership and structure; tools, information management, and new technology in the heritage community; funding; education and awareness; heritage tourism and marketing; heritage conservation training; identity and diversity issues; and First Nations issues. The appendix includes an outline of current cultural heritage activity in Saskatchewan. CU MS PR SS

Les Petits producteurs ont-ils été le moteur de la croissance du secteur manufacturier canadien au cours des années 1980?

Par John R. Baldwin. Ottawa : Statistique Canada, Direction des études analytiques, 1996. 45 p. : ill., Bibl. (Documents de recherche / Statistique Canada. Direction des études analytiques ; no 88) L'éd. anglaise (*Were small producers the engines...*) sur la même fiche. ISSN 1200-5231 ISBN 0-660-95380-5 SCC 11F0019MPF no 88 MICROLOG 96-07597 (1 fiche)

Les petites entreprises sont souvent perçues comme le moteur de la croissance économique. Essentiellement, deux preuves empiriques sont avancées à l'appui de cette assertion : la première est que la création d'emploi imputable aux petites entreprises a augmenté au cours des vingt dernières années. Ces deux arguments reposent sur un seul facteur : l'emploi. Ce document a pour objet de déterminer si le changement d'instrument de mesure peut influencer la perception du rôle des petites entreprises dans le processus de croissance économique. Pileated woodpecker habitat ecology in boreal forests : project update, 1995-96

By Rick Bonar. Edmonton : Alberta Environmental Protection, 1996. 1, 14 p. : Bibl. At head of title: *Manning Diversified Forest Products Research Trust Fund. On cover: Forest Development Research Program.* ISBN 0-7732-5063-8 MICROLOG 96-07452 (1 fiche)

Describes a project undertaken to gather information on the boreal forest habitat ecology of the pileated woodpecker (*Dryocopus pileatus*) in Alberta. The study site is the Foothills Model Forest near Hinton. The goal of the project is to obtain appropriate ecological data and develop a management strategy for long-term pileated woodpecker habitat and population conservation. Specific tasks include description of the characteristics of nest and roost trees, foraging sites, habitat use, home range size, reproductive success, adult survival, and comparison of fragmented and continuous forest habitats. Individual birds are being monitored using fitted radio transmitters. AL FO LS PR SC

Pilot inventory for Pacific yew

By R.J. De Jong and G. Michael Bonnor. Victoria : Canada-British Columbia Partnership Agreement on Forest Resource Development: FRDA II, 1995. vi, 18 p. : ill., Maps, Bibl. (FRDA report / Canada-British Columbia Partnership Agreement on Forest Resource Development: FRDA II ; 231 ISSN 0835-0752) On cover: *Forestry.* ISBN 0-7726-2511-5 MICROLOG 96-07281 (1 fiche)

To provide information about the quantities of yew available in British Columbia, the provincial Ministry of Forests and the Canadian Forest Service initiated a pilot study to design and implement an inventory for Pacific yew (*Taxus brevifolia* Nutt.). This paper describes the pilot study methodology, the inventory area and preliminary survey, data stratification, field sampling, data compilation, and results. Results of two survey methods used (ecosystem-based and forest cover based inventory) are compared with each other and with other yew inventories made in the United States Pacific northwest. Un Plan d'ensemble sur le développement de la pensée : enseigner comment réfléchir à l'aide des programmes d'études : document à l'intention des écoles de la maternelle au secondaire 4

Winnipeg : Éducation et formation professionnelle Manitoba, 1996. 58 p. : Bibl. ISBN 0-7711-2030-3 MICROLOG 96-07265 (1 fiche)

Il est vrai que chacun est capable de penser, mais tous ne possèdent pas les habiletés ou la formation requises pour penser de façon efficace, c'est-à-dire avoir l'esprit critique et créatif pour, en somme, réfléchir en vue de résoudre un problème. Ces processus cognitifs et ces habiletés de raisonnement devraient être enseignés à tous les niveaux et dans toutes les matières. Ce document d'appui aux programmes d'études sert de base organisationnelle aux personnes responsables de l'élaboration des programmes d'études ainsi qu'aux enseignants dans toutes les disciplines et à tous les niveaux. Son but est de développer une base de connaissances et un langage communs qui permettront d'enseigner comment réfléchir. ED MS PR SS

La Planification des services de santé des années 1990 en Ontario : sommaire du processus de planification des conseils régionaux de santé

Toronto : Assn des conseils régionaux de santé de l'Ontario, 1991. 23 p. : Bibl. L'éd. anglaise (*Planning Ontario's health care...*) sur la même fiche. MICROLOG 96-07379 (1 fiche)

Ce document présente un sommaire du rôle des conseils régionaux de santé en matière de planification des services de santé en Ontario. This paper is an introduction to the health planning role of district health councils in the province of Ontario. Topics covered are: organizing the planning process; the basic steps of planning; methodologies of planning; priority-setting exercises; implementing the plan; and, evaluation. HE ON PR SS

Policies and regulations for seniors' housing, City of Burlington, Burlington, Ontario

Energy Pathways Inc. Ottawa : Federation of Canadian Municipalities ; Canada Mortgage & Housing Corporation ; Canadian Home Builders' Assn ; Canadian Housing & Renewal Assn, 1995. ii, 21, 24 p. Bilingual (*Politiques et réglementation concernant...*). On cover: *A.C.T., Affordability and Choice Today, regulatory reform initiatives to improve housing. At head of title: Affordability and Choice Today (A.C.T.), Case Study Project.* MICROLOG 96-07427 (1 fiche)

In consultation with community and non-profit organizations, the City reviewed its policies and regulations to facilitate the development of housing that would meet seniors' needs. The project was designed primarily to address regulations that have a direct bearing on the land development approval process. Specifically, the City wanted to update its regulations for seniors' housing to achieve the following: streamline and standardize the approvals process; set consistent standards for approval. This document presents a case study of policies and regulations for senior's housing. CA JU MU ND ON PL SA SS

Politiques et réglementation concernant le logement des aînés, ville de Burlington, Burlington, Ontario

Energy Pathways Inc. Ottawa : Fédération canadienne des municipalités ; Société canadienne d'hypothèques et de logement ; Assn canadienne des constructeurs d'habitations ; Assn canadienne d'habitation et de rénovation urbaine, 1995.

II, 24, II, 21 p. *Bilingue (Policies and regulations for seniors...)*. Sur la couv.: A.C.T., *Abordabilité et choix toujours, réformes réglementaires pour améliorer l'habitation*. En tête du titre: *Abordabilité et choix toujours (A.C.T.), Projet d'étude de cas*.

MICROLOG 96-07427 (1 fiche)

De concert avec les organismes communautaires et sans but lucratif, la Ville a procédé à la révision de ses politiques et règlements afin de favoriser des aménagements résidentiels qui répondraient aux besoins des aînés. Au départ, le projet visait les règlements qui avaient une incidence directe sur le processus d'approbation en matière d'aménagement foncier. Plus précisément, la Ville désirait mettre à jour ses règlements concernant le logement des personnes âgées pour : rationaliser et normaliser le processus d'approbation; et, établir des normes cohérentes en ce qui a trait à l'approbation. Ce document présente une étude de cas sur les politiques et réglementation concernant le logement des aînés.

Predicting the effects of microbial activity on the corrosion of copper nuclear fuel waste disposal containers

By Fraser King and Simcha Stroes-Gascoyne. Pl-nawa, MB : Whiteshell Laboratories, 1996. 15 p. : *ill.*, *Bibl.* (AECL research / Atomic Energy of Canada Ltd. ; AECL-11598 ISSN 0067-0367)

Presented at a NATO Advanced Research Workshop on Microbial Degradation Processes in Radioactive Waste Repository and in Nuclear Fuel Storage Areas. ISBN 0-660-16529-5 CCG-P no. CC2-11598E

MICROLOG 96-07409 (1 fiche)

Microbially influenced corrosion of copper nuclear fuel waste containers may occur in a disposal vault buried in granitic rock. The extent and diversity of microbial activity in the vault is expected to be limited initially because of the aggressive conditions produced by gamma radiation, elevated temperatures, and desiccation of the clay-based buffer in which the containers will be emplaced. This paper presents new evidence regarding the claim that a virtually sterile zone will be created around the container, and describes experiments studying the effects of remote sulphate-reducing bacteria activity on the long-term corrosion of the container. A method for predicting the consequences for the container lifetime is also presented.

A Preliminary report on juvenile chinook production in the Cowichan River, 1995

By D.A. Nagtegaal, E.W. Carter and B. Riddell. Nanaimo, BC : Fisheries & Oceans Canada, Science Branch, Pacific Region, Pacific Biological Station, 1996. vi, 43 p. : *ill.*, *Bibl.* (Canadian manuscript report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2360 ISSN 0706-6473)

MICROLOG 96-07520 (1 fiche)

Presents the findings of part of an ongoing study to assess the productivity of chinook salmon in the Cowichan River, in which researchers began monitoring the downstream migration of chinook juveniles in 1991. They also monitored the interaction between hatchery and naturally-spawned chinook juveniles. Various techniques and equipment such as minnow traps and purse seines were used on the river in 1991 and 1992 to collect information on growth, abundance, and migration timing of juvenile chinook salmon. Results presented include estimates of naturally-spawned chinook juveniles and hatchery releases.

Presentation to the Royal Commission on New Reproductive Technologies

Ontario Advisory Council on Women's Issues. Toronto : The Advisory Council, 1990. xiv, 60 p. : *Bibl.*

MICROLOG 96-07599 (1 fiche)

This paper examines those aspects of reproductive technology which raise the most urgent issues for Ontario women: the use of contracts to hire the reproductive services of women; restriction on access to and parentage issues arising from the use of alternative insemination; and the increasing use of fertilisation to create pregnancies. For each issue, the paper discusses the advantages and disadvantages of various options to address the issue and then presents recommendations along with their rationale. These recommendations put the focus in reproduction back to prioritising the health and security needs of birth mothers, their children, and birth families, and to discouraging the use of contracts or technologies that commodify women and children.

Proceedings of the Northern River Basins Study Instream Flow Needs Workshop

Prepared by Gordon L. Walder. Edmonton : Northern River Basins Study, 1996. vii, 196 p. : ill., Maps, Bibl. (Northern River Basins Study project report / Northern River Basins Study (Canada) ; no. 66 ISSN 1192-3571) ISBN 0-662-24830-9 CCG-P no. R71-49/3-66E
MICROLOG 96-07358 (3 fiche)

The need to address Instream flow needs (IFN) in the Northern River Basins Study arises primarily from issues related to flow regulation on the Peace River. Flow regulation may have effects on fish habitats and has clearly affected riparian habitats in the study area. This report presents proceedings of a workshop held to review methods and approaches for conducting IFN analyses, to consider their applicability to the northern river basins, and to develop recommendations for undertaking IFN investigations as part of the Study. The workshop included two sessions, one on IFN related to fisheries and aquatic habitats and one on IFN related to riparian and delta habitats. Topics of presentations and papers include river hydrology, water quality considerations, vegetation studies, instream flow assessment, winter habitat, implications of river impoundment, modelling of wildlife habitat, channel morphology, sediment transport, and wetland vegetation management.

Program prospectus

By Robert G. Wagner. Sault Ste. Marie, ON : The Program, 1992. iii, 18 p. ISBN 0-7729-9759-4
MICROLOG 96-07674 (1 fiche)

A key to success in forest renewal is the protection of young forests from non-crop plant species. This has traditionally been done using herbicides. Increased environmental awareness has made herbicide use less acceptable in forestry. This paper describes an Ontario program that has the goal of gradually reducing dependence on herbicides in forestry by developing alternatives and gaining a better understanding of forest ecosystems. The following components of the program are outlined: research on treatment alternatives, forest ecosystem responses, forest growth and yield, ecosystem dynamics, the interface of vegetation management with society, and biological control; education of foresters and the public about safe use of herbicides and alternative vegetation management practices; and field delivery of research results. The paper concludes with a description of program delivery elements and program structure, including the

roles of committees and regional science & technology units.

A Program to assess the impacts and benefits of composted source-separated solid wastes (CSSSW) applied to agricultural lands : National Agricultural Compost Trial

Edited by Sherman D. Nelson, Henri Diné, and Terry Goodyear. Ottawa : Agriculture & Agri-Food Canada, Research Branch, Centre for Land & Biological Resources Research, 1995. vii, 93 p. : Maps, Bibl. (CLBRR contribution / Center for Land & Biological Resources Research (Canada) ; no. 95-92) (Technical bulletin / Canada. Agriculture & Agri-Food Canada. Research Branch ; 1995-9E) ISBN 0-662-23919-9 CCG-P no. A54-8/1995-9E
MICROLOG 96-07233 (2 fiche)

The first part of this publication summarises a workshop held to discuss the design of a National Agricultural Compost Trial (NACT) which would assess the impacts and benefits of applying composted source-separated solid wastes (CSSSW) to farmlands. Discussions focused on systematic research approaches to evaluate, conserve, and improve land productivity. Presentations include reviews of ongoing CSSSW research in various provinces. A consensus was reached on certain aspects of the NACT. The second part reviews issues related to CSSSW application on farmland: metals and organic contaminants, plant and animal pathogens and their survival after composting, and agronomic considerations in using CSSSW. The third part provides a conceptual framework to assess the impacts and benefits of CSSSW application in harmony with regional needs and objectives. The context of CSSSW use in Canada is also discussed. Recommendations are made for the use of the framework at local sites and for the co-ordination and funding of the NACT.

Putting consumers first : reforming the Canadian financial services industry

Jack M. Mintz and James E. Pesando, eds.
Toronto : C.D. Howe Institute, 1996. xiii, 104 p. : ill., Bibl. (Policy study / C.D. Howe Institute ; no. 27 ISSN 0832-7912) ISBN 0-88806-388-1
MICROLOG 96-07248 (2 fiche)

This volume examines a set of policy questions central to the forthcoming legislative review of financial services regulation. It contains three papers, the first of which examines the link between concentration, competition, and profitability, with particular attention to the role of the major banks within Canada's financial services industry. This paper discusses the concept of efficiency as it pertains to financial markets and reviews two types of evidence bearing on the issue of market power. The second paper examines the current structure of the Canadian payments system and notes the problems with that structure, including its restricting of the ability of market demand to promote development of alternative settlement technologies. The third paper focuses on retail financial services in an environment of rapidly changing technologies which poses a significant challenge to regulators. It argues for a change in regulatory emphasis toward protecting consumer interests.

Quantifying extreme winds : experiments aimed at reducing wind damage to released white spruce understories

By Thomas K. Fiesch and John D. Wilson. Edmonton : Alberta Environmental Protection, 1995. 19 p. : ill., Bibl. At head of title: *Manning Diversified Forest Products Research Trust Fund. On cover: Forest Development Research Program.* ISBN 0-7732-5054-9
MICROLOG 96-07449 (1 fiche)

Describes a project undertaken to improve the understanding of wind climatology at the site of a silviculture study in Alberta, and to aid in identifying hardwood harvest designs which best protect released spruce from wind damage. The project had several objectives: to measure the extreme winds encountered on site during the silviculture study, and determine how the winds in the period compare to the long-term climatology of the area; and to examine how different cutblock designs affect the wind and the windthrow potential of released spruce. Most of the work centred on understanding the wind flow within a 150-metre-wide cutblock. Measurements of turbulence and tree motion gave a clearer picture of how a tree responds to the wind.

Radionuclide response functions for the convection-dispersion equation from a point source along the axis of nested cylindrical media

By Dennis M. LeNeveu and Miroslav Kolár. Pinawa, MB : Whiteshell Laboratories, 1996. 18 p. : ill., Bibl. (AECL research / Atomic Energy of Canada Ltd. ; AECL-11549 ISSN 0067-0367) ISBN 0-660-16558-9 CCG-P no. CC2-11549E
MICROLOG 96-07410 (1 fiche)

This paper develops response functions for the mass transport of radionuclides from a small pin-hole-size defect in a waste container located in a cylindrical disposal room. The rooms are considered to be filled with buffer and backfill materials composed of clay/sand or clay/rock mixtures. The paper describes a model based on the boundary integral method, in which the room is represented by three coaxial cylinders comprised of buffer, backfill, and excavation damage zone, surrounded by the sparsely fractured rock. The integrated flux obtained from the model is compared with that obtained by the finite element code MOTIF, consisting of coaxial rectangular regions that have the same volume as the respective cylinders in the boundary integral model. Sample numerical calculations are presented for Iodine-129, one of the longest-lived and most readily leachable radionuclides that would be released.

Rainfall simulation, soil infiltration, and surface erosion on skidroad surfaces, Nelson Forest Region

By Paul R. Commandeur and Ed F. Wass. Victoria : Canada-British Columbia Partnership Agreement on Forest Resource Development: FRDA II, 1994. vi, 28 p. : ill., Maps, Bibl. (FRDA report / Canada-British Columbia Partnership Agreement on Forest Resource Development: FRDA II ; 228 ISSN 0835-0752) On cover: *Forestry.* ISBN 0-7726-2364-3
MICROLOG 96-07282 (1 fiche)

Describes rainfall simulation experiments conducted on bladed, skidroad-constructed surfaces located in the Nelson Forest Region of British Columbia. The experiments were intended to explain trends in infiltration rate and surface erosion as functions of soil texture, and to help confirm or revise a surface erosion hazard key contained in a field guide. The investigators established 234 plots along 12 sites on sandy loam, fine sandy loam, and silt loam soil textures, and measured infiltration rates and mean mass of erosion over two hours of simulated rainfall. The findings indicate the degree of support for how the factors related to infiltration, surface erosion, and slope gradient are presently set up in the hazard key.

RBE from a microdosimetric approach

By W.V. Prestwich, C.S. Kwok and J. Nunes. Ottawa : Atomic Energy Control Board, 1995. vi, 77 p. : *Ill., Bibl. (Report / Canada. Atomic Energy Control Board ; INFO-0593)*
MICROLOG 96-07530 (1 fiche)

Reviews the current status of microdosimetry and knowledge regarding the response of biological systems to radiation fields of differing linear energy transfer. The primary objective is to investigate the potential application to radon daughter lung dosimetry. The concept of track structure and its statistical behaviour is discussed and applied to estimate the yield of double strand breaks (DSBs). The general microdosimetric approach to modelling radiation response is presented in terms of the hit-size effectiveness function and the behaviour for specific proposed functions is examined. Radiobiological investigations of the DSB, chromosome aberration, and oncogenic transformation end points are reviewed with emphasis on recent development. A simplified model system is developed, illustrating the potential for analysis of the risk from radon daughter inhalation. Public research directed toward this goal is also discussed.

Re: Mr. Will Ferguson, M.P.P. : report

Ontario. Commission on Conflict of Interest. Toronto : The Commission, 1992. 122 p. Gregory T. Evans, Commissioner.
MICROLOG 96-07317 (2 fiche)

Presents the report of the commissioner investigating whether the Ontario member of parliament for Kitchener, Will Ferguson, contravened the Members' Conflict of Interest Act. The complaint against Mr. Ferguson was that while serving as a parliamentary assistant to the Minister of Transportation, he took steps to attempt to publicise the criminal record of a private citizen. He had launched a civil action in libel and slander against this citizen and others, with regard to allegations that he had helped a woman escape from the Grandview School for Girls in exchange for sexual favours. The complainant suggested that the attempted disclosure of this woman's criminal record was intended to damage her credibility, which would in turn increase Mr. Ferguson's chances of success in the civil action. Issues considered in the investigation relate to sections 2, 3, and 4 of the Act, and also relate to whether a formal or informal inquiry into the matter should be conducted. Appendices include supporting documentation such as court documents, a transcript of part of the Ontario Legislative Assembly proceedings questioning Mr. Ferguson's conduct, and press clippings.

Real-time analysis of a spread spectrum environment with an optoelectronic cyclic cross correlation : proof-of-concept experiments (U)

By N. Brousseau and J.W. Salt. Ottawa : National Defence, Defence Research Establishment Ottawa, 1995. xi, 32 p. : *Ill., Bibl. (Technical note / Defence Research Establishment Ottawa ; 95-14)*
MICROLOG 96-07569 (1 fiche)

The purpose of this note is to present a new algorithm to obtain real-time information for electronic support measures (ESM) for wideband, low probability of intercept radar and communication signals. The algorithm is called cyclic cross correlation (CCC). It allows the detection, separation, and characterisation of spread spectrum signals having overlapped spectra, the same carrier frequency, and the same time of arrival. An opto-electronic real-time implementation of the CCC for large-bandwidth spread spectrum signals was constructed using an optical time-integrating correlator (TIC). A description of the real-time optical implementation of the CCC with a TIC and the associated experimental results are presented. An assessment of the potential of this technique for application to radar and communication ESM is also included.

This handbook summarises information about techniques for management of red alder (*Alnus rubra*) in British Columbia. It addresses three fundamentally different ways of viewing red alder management (red alder as a renewable and sustainable source of woody biomass and as a species that provides habitat diversity; red alder as a companion species to enhance conifer production; and red alder as a weed tree) but emphasises management practices that focus on alder's intrinsic value as a producer of biomass and diversity, and as an important ecosystem component of west coast mixed-wood stands. Sections of the handbook cover the status of red alder inventories; ecosystems that support red alder; the biology and silvics of red alder, including natural regeneration, succession, competition, growth, and yield; management of red alder in pure and mixed-species stands; alder management for non-timber resource uses; and future prospects for red alder. Includes glossary.

The Redistribution of electoral districts in Ontario -- Rev.

By Philip Kaye. Toronto : Ontario Legislative Library, Legislative Research Service, 1993. 30 p. : *Bibl.* (Current issue paper / Ontario. Legislative Library ; no. 24 ISSN 0835-0299)
MICROLOG 96-07689 (1 fiche)

This paper focuses on one aspect of the electoral process, the design of provincial electoral districts in Ontario. Key issues examined are: how should those represented in the legislature be organised into constituencies, giving rise to the need for criteria or guiding principles when redrawing electoral boundaries; and who should do the organising. The paper looks at these issues from a historical perspective, reviewing the last three electoral redistributions in the province and the work of the Special Commission on Redistribution of Electoral Districts in Ontario (1962-65), the Select Committee on Election Laws, the Ontario Electoral Boundaries Commission (1973-75 and 1983-86), the Ontario Commission on the Legislature, and the private member's resolution of November 1992 on the issue of rural representation.

Réforme des transports, projet de loi C-101

Par John Christopher. Ottawa : Bibliothèque du Parlement, Service de recherche, 1995. 10 p. (Étude générale / Canada. Bibliothèque du Parlement ; BP-404F) *L'éd. anglaise (Transportation reform...) sur la même fiche.* ISBN 0-660-95211-4 GCC-E no YM32-2/404F
MICROLOG 96-07321 (1 fiche)

Le 20 juin 1995, le ministre des Transports a déposé le projet de loi C-101, Loi sur les transports au Canada, qui vise à moderniser et à simplifier la réglementation ferroviaire, à favoriser la création de chemins de fer sur de courtes distances, à faire en sorte que les expéditeurs continuent d'avoir accès à des services de transport concurrentiels, à éliminer la réglementation inutile dans les autres modes de transport et à mettre davantage l'accent sur une prise de décisions fondée sur les pratiques commerciales dans le secteur des transports. Dans ce document, nous traitons de diverses dispositions du projet de loi.

Regional comparisons of wood density and branch size in low stand density lodgepole pine

By G.R. Middleton...et al. Vancouver, BC : Forintek Canada Corp., Western Laboratory, 1996. vi, 31 p. : ill., *Bibl.* (Special publication / Forintek Canada Corp. ; no. SP-36 ISSN 0824-2199) *On cover: Canada-British Columbia Partnership Agreement on Forest Resource Development: FRDA II.*
MICROLOG 96-07215 (1 fiche)

Examines relationships between tree diameter at breast height, wood density, and knot size in good-site, low stand density lodgepole pine from five different biogeoclimatic zones in British Columbia. At least 30 trees were selected from stands at each site, and average basic wood density was determined from two cores obtained from each sample tree. Lumber strength estimates using a previously developed regression equation are also made.

Regional-scale groundwater flow modelling of generic high level waste disposal sites

By D. Metcalfe. Ottawa : Atomic Energy Control Board, 1996. xvi, 103 p. : ill., *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0632)
MICROLOG 96-07658 (2 fiche)

Describes regional-scale groundwater flow modelling analyses performed on generic high-level waste (HLW) disposal sites to assess the extent to which a large crystalline rock mass can be expected to contain and isolate HLW in terms of hydraulic considerations for a variety of geologic and hydrogeologic conditions. The two-dimensional cross-sectional conceptual models of generic HLW disposal sites are evaluated using SWIFT III, a finite difference flow and transport code. All steps leading to the final results and conclusions are presented. Available data and information on geologic and hydrogeologic conditions in plutons and batholiths are summarised, and the generic conceptual models developed from this information are defined. The modelled results are described with contour maps showing the modelled head fields, groundwater flow paths and travel times, and groundwater flux rates within the modelled systems. The results are used to develop general conclusions on the scales and patterns of groundwater flow in granitic plutons and batholiths, focusing on characteristics that can result in favourable conditions for a HLW repository.

Regulating the use of force by Ontario police officers

By Andrew McNaught. Toronto : Ontario Legislative Library, Legislative Research Service, 1992. I, 37 p. : *Bibl.* (Current issue paper / Ontario. Legislative Library ; no. 133 ISSN 0835-0299)
MICROLOG 96-07696 (1 fiche)

This paper focuses on the debate over what legal constraints should be placed on the use of lethal force by police officers. It outlines the existing statutory provisions governing the use of lethal force by police officers in Ontario, as well as some criticisms directed at the legislation. Proposed changes are discussed in light of the recommendations made in the reports of the Greenwood Commission and the Clare Lewis Task Force, and the reactions of interested parties to the proposed changes are noted. The appendix contains text of relevant legislation and regulations.

The Regulation and public funding of private schools in Canada

By Susan Swift. Toronto : Ontario Legislative Library, Legislative Research Service, 1993. II, 46 p. : *Bibl.* (Current issue paper / Ontario. Legislative Library ; no. 140 ISSN 0835-0299)
MICROLOG 96-07686 (1 fiche)

This paper focuses on three important issues concerning private education in Canada: the degree to which the provinces have attempted to guarantee the quality of education being offered by private schools; the recourse available to parents or guardians who have pre-paid tuition or course fees in the case of a financial failure of the school; and the public funding of private schools. The paper is arranged by jurisdiction. Under each province or territory, it examines the nature and extent of government regulation in setting standards for curriculum, evaluation of students, inspection of schools, teacher qualifications, length of school day and year, reporting requirements, statutory consumer protection provisions against losses due to financial failure or fraudulent operation of private schools, and the status of separate schools.

The Relationship between the minimum wage and unemployment and poverty

By David Pond. Toronto : Ontario Legislative Library, Legislative Research Service, 1992. 21 p. : *Bibl.* (Current issue paper / Ontario. Legislative Library ; no. 128 ISSN 0835-0299)
MICROLOG 96-07682 (1 fiche)

This paper begins with a description of the origins, development, and current operation of Ontario's minimum wage law. It then discusses the question of how the minimum wage affects unemployment. Contemporary rationales for the minimum wage, as well as the case against the minimum wage which has been postulated by economists, are also reviewed. Finally, the paper examines the possible impact that increases in the minimum wage might have in reducing poverty. Difficulties associated with empirical research into the minimum wage are noted.

The Relationship of occupational silica exposure to systemic sclerosis or scleroderma

By Duncan A. Gordon. Toronto : Occupational Disease Panel, 1992. 20 p. : *Bibl.*
MICROLOG 96-07242 (1 fiche)

Systemic sclerosis or scleroderma is a generalised disorder associated with degeneration and inflammation of the connective tissues of the body leading to intense diffuse fibrosis. This paper reviews the classification of scleroderma on the basis of the extent of skin involvement and presents criteria for diagnosis when a series of cases is reported. It then describes pulmonary complications associated with scleroderma and the epidemiology of scleroderma. Finally, it reviews literature on the relationship between scleroderma and silica exposure, and on the relationship between occupational conditions and Raynaud's phenomenon, which may be associated with localised forms of scleroderma.

Renewing the vision, human rights in Saskatchewan : report

Saskatchewan Human Rights Commission. Regina : The Commission, 1996. II, 161 p. : *Ill.*, *Bibl.* ISBN 0-9680933-0-2
MICROLOG 96-07105 (2 fiche)

The 1979 Saskatchewan Human Rights Code amalgamated and improved all previous human rights legislation in the province. It outlines the structure and duties of the provincial Human Rights Commission, establishes a complaint process, and contains provisions for equity programs and exemptions. Over the past 17 years, the Code has become outdated, the Commission structure requires improvement, and the complaint system has been unable to handle the volume and complexity of complaints or problems with systemic discrimination. This report presents findings of a review of the Code and contains recommendations to enhance human rights protection in Saskatchewan by amending the Code, introducing and strengthening related legislation, and giving financial support to the Commission. Sections of the review cover the history of human rights legislation in Saskatchewan, Commission restructuring, improving the complaint system, changes to the Code, sharing human rights responsibilities, and addressing systemic discrimination.

Répertoire des municipalités du Québec, 1996

Québec : Gouvernement du Québec, Ministère des affaires municipales, 1996. 888 p. : *Cartes géogr.* ISSN 0079-869X
MICROLOG 96-07204 (10 fiche)

Cette édition comprend 6 parties distinctes. Chacune fait ressortir un aspect des principales particularités du monde municipal. La 1^{re} partie présente, en bref, le régime municipal québécois avec ses 2 niveaux d'organisation territoriale: le local et le régional. Elle traite aussi de la révision des lois municipales entreprises par le Ministère. La 2^e partie du document fait état des modifications apportées aux municipalités pendant l'année. La 3^e partie regroupe les données de population et de superficie des territoires des municipalités locales, des territoires non organisés, des réserves indiennes et celles des organismes régionaux: l'Administration régionale Kativik, les communautés urbaines et les municipalités régionales de comté. La 4^e partie fournit des renseignements sur les municipalités, tels les noms des membres du conseil et des responsables de l'organisation municipale, la date de constitution de la municipalité, ainsi que l'énumération de ses services administratifs. La partie 5 présente les fiches techniques des organismes supramunicipaux, c'est-à-dire les régies intermunicipales et les organismes de transport. La 6^e partie comprend les toponymes usuels répartis selon les municipalités locales et les municipalités régionales de comté.

Report of the Ombudsman's opinion, reasons therefor, and recommendations following his investigation into the complaint of Farm Q Limited

Ontario. Office of the Ombudsman. Toronto : The Office, 1989. 10 p. ISBN 0-7729-5381-3
MICROLOG 96-07625 (1 fiche)

In 1985, an Ontario swine operation referred to as Farm Q brought a complaint to the provincial Ombudsman that the Ministry of Agriculture & Food unreasonably disseminated unreliable Swine Record of Performance data. The farm relied on these data to purchase what it thought to be genetically superior pigs, but because the data were incorrect, the pigs were found not to be fit for breeding purposes and the farm suffered financial losses. This report presents the Ombudsman's findings in his investigation of the Farm Q case. The Ministry's reasons for rejecting Farm Q's claim for compensation are discussed and recommendations regarding the farm's complaint are presented.
AG ON PA PR SC

Report of the Ombudsman's opinion, reasons therefor, and recommendations following his investigation into the complaint of Mr. B., the complaint of Ms. D., the complaint of Chief B.

Ontario. Office of the Ombudsman. Toronto : The Office, 1988. 26 p.
MICROLOG 96-07627 (1 fiche)

The first two parts of this report present the findings of the Ombudsman's investigation into cases where victims of criminal offences were denied compensation. Issues discussed in both cases included the extent to which the victims were responsible for their own misfortune, the seriousness of the injuries received by the victims, and whether the seriousness of the injuries is relevant to the awarding or to the amount of compensation. The third part concerns the case of an Indian band charged with failing to file monthly fishing reports when it had been agreed that the reports could be filed by a fishery manager. An important issue considered in this case is that of administrative unfairness.
JU NP ON PA PR SS

Report of the Ombudsman's opinion, reasons therefor, and recommendations following his investigation into the complaint of Mr. F.

Ontario. Office of the Ombudsman. Toronto : The Office, 1986. 15 p.
MICROLOG 96-07629 (1 fiche)

Presents the investigation and findings of the Ombudsman regarding the case of a physiotherapist operating a private clinic in Belleville that does not have Ontario Health Insurance Plan billing privileges. The physiotherapist entered into an agreement to purchase another physiotherapy facility in Millbrook which does have such privileges, and complained that the Ministry of Health denied his request to transfer the billing privileges from the Millbrook facility to the Belleville clinic. Issues considered include: whether physiotherapy treatment deficits exist in the Belleville area; and the methodology and data base used by the Ministry of Health for routine assessment of outpatient physiotherapy service adequacy.

Report of the Social Assistance Review Committee on the Spouse in the House Rule

Ontario. Social Assistance Review Committee. Toronto : The Committee, 1987. ii, 16 p.
MICROLOG 96-07102 (1 fiche)

In September 1986, the Ontario government announced it would change a controversial set of rules that had been a feature of provincial social as-

sistance programs. It proposed that a sole support parent living with a person of the opposite sex would remain eligible for benefits, unless that parent lives with another person who either has a legal obligation to support the parent and dependent children, or who provides economic support for the parent and children and accepts parental responsibility. The government also wanted to address whether and how the assets and income of someone living with a sole support parent should be taken into account when assessing that parent's need for social assistance. This report presents the findings and recommendations of a committee formed to review the government's proposed new eligibility criteria and to suggest whether a recipient's needs should be seen as less if the recipient lives with another person.

Report to the Workers' Compensation Board on the health effects of occupational exposure to fluids used for machining and lubricating metal in manufacturing : cancer of the esophagus

Ontario. Occupational Disease Panel. Toronto : The Panel, 1996. 99 p. : *Bibl.* (ODP report / Ontario. Occupational Disease Panel ; 18)
ISSN 0840-7274 ISBN 0-7778-5420-1
MICROLOG 96-07366 (2 fiche)

Reports the findings of a panel investigating the possible connection between occupational exposure to metalworking fluids and incidence of cancer of the oesophagus. Begins with background information on the cancer, the characteristics of metalworking fluids and oil mists, and the potential carcinogens contained in those fluids. Subsequently examines evidence for the connection as revealed in the occupational health literature, taking into account limitations on the evidence and the possible effects of confounding factors. Epidemiological findings are discussed with reference to criteria of strength of association, consistency, specificity, temporality, biological plausibility, dose-response relationships, coherence, experimental evidence, and analogy. The findings are accompanied by recommendations regarding further research and whether the appropriate schedule of the Ontario Workers' Compensation Act should be modified. Appendices include a report on the toxicology of metalworking fluids.

Requirements specification and tracking methodology, RSTM : final version

Groupe CGI. Ottawa : Dept. of National Defence, 1995. 62 p. : *ill.*, *Bibl.*
MICROLOG 96-07555 (1 fiche)

The front end of system development, the identification and definition of system requirements, is considered as crucial for the delivery of quality systems. Addressing requirements means improving their elicitation, specification (and tracing), and validation. Requirements specification has received the most attention in the literature, but the social dimension of the other two activities has made them much less amenable to the process of requirements engineering. The methodology proposed in this report is an attempt to integrate the social dimension of requirements engineering, in which elicitation and validation are seen as negotiation processes in which stakeholders are trading their requirements off. The methodology consists of four

dimensions: project initiation and set-up, generation and formulation of requirements, specification of requirements, and tracking of requirements. For each dimension, objectives are stated, a general definition is provided, critical success factors identified, and activities listed. The appendix includes brief descriptions of some requirements elicitation and validation methods.

Review of the GOTHIC code and trial application

By Marcel Lacroix, Nicolas Galanis and Jocelyn Millette. Ottawa : Atomic Energy Control Board, 1996. xiv, 238 p. : *ill.*, *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0625)
MICROLOG 96-07661 (3 fiche)

GOTHIC is a computer code package for solving multiphase, multicomponent fluid and heat transfer problems with specific applications to nuclear plant containment and confinement analysis. The first two cases studied in this report illustrate some modelling options available in GOTHIC and delineate the code's capabilities in predicting the thermal behaviour of simple systems. The next case adopts GOTHIC's distributed parameter approach for predicting hydrogen concentration distributions inside an experimental test facility. The effect of the most influential parameters in the model is examined and GOTHIC is tested for various hydrogen release scenarios. This is followed by a study of the ability of GOTHIC to predict the thermal-hydraulic response of a complex full-scale multi-compartment containment geometry to a steam/water blowdown followed by hydrogen release from a reactor vessel. Effects of certain parameters on predictive capabilities of the model are examined and the predicted flow behaviour and hydrogen concentration distributions are studied for various blowdown conditions. The report ends with a critical review of the implementation of physics by the generic GOTHIC code and a discussion of the limitations of the code.

A Review of the literature on the removal of organic chemicals from drinking water

By Nicholas J. Oke, Daniel W. Smith and Stephen J. Stanley. Edmonton : Northern River Basins Study, 1996. iv, 71 p. : *ill.*, *Bibl.* (Northern River Basins Study project report / Northern River Basins Study (Canada) ; no. 87 ISSN 1192-3571)
ISBN 0-662-24635-7 CCG-P no. R71-49/3-87E
MICROLOG 96-07232 (1 fiche)

Reviews the literature concerning the current state of knowledge of removing organic chemicals from drinking water. Such chemicals may include humic substances produced by degradation of plant and

animal matter, contaminated leachate from landfills and lagoons, agricultural runoff, and accidental and illegal dumping of chemicals. Treatment techniques reviewed include coagulation, softening, sedimentation, filtration, chlorination, adsorption on activated carbon or resins, air stripping, reverse osmosis, and the use of oxidants or ultraviolet radiation.

A Review of theories on the origins of saline waters and brines in the Canadian Precambrian Shield

By D.J. Bottomley. Ottawa : Atomic Energy Control Board, 1996. vii, 24 p. : *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0631) MICROLOG 96-07657 (1 fiche)

Groundwater at depths over 500 metres in the Canadian Shield is typically saline with a sodium-calcium chloride chemical composition. Brines with dissolved solids concentrations exceeding 100 grams/litre have been encountered in several deep mines in the Shield. This paper reviews theories on the origin of these brines, grouped into two general categories: in-situ origins attributable to silicate mineral hydrolysis over geological time scales, leaching of fluid inclusions, or radiolysis effects; and external sources caused by the infiltration of brine of modified seawater origins in the geologic past. Implications of the findings for waste isolation within the geosphere are discussed.

Rhizome growth of *Calamagrostis canadensis* in response to soil nutrients and bulk density

By S.M. Landhauser...et al. Edmonton : Alberta Environmental Protection, 1996. v, 10 p. : *Bibl.* At head of title: *Manning Diversified Forest Products Research Trust Fund. On cover: Forest Development Research Program.* ISBN 0-7732-5061-1 MICROLOG 96-07454 (1 fiche)

Calamagrostis canadensis, or marsh reed grass, poses a major competitive problem to white spruce (*Picea glauca*) regeneration on clear-cut sites in the boreal mixedwood forest. This report describes a series of experiments investigating rhizome spread and growth of *C. canadensis*, as governed by changes in soil bulk density and nutrient availability. The investigators assessed the ability of rhizomes originating from vigorous marsh reed grass plants to penetrate mineral soil with different bulk densities and their response to various nutrient conditions. The results may be useful for selecting those methods of site preparation treatments which reduce the growth and competitive ability of *C. canadensis* relative to tree seedlings.

SAMPLE, a seismo-acoustic mode program for layered environments : theoretical background

By T.W. Dawson and R.T. Kessel. Dartmouth, NS : National Defence, Research & Development Branch, Defence Research Establishment Atlantic, 1995. viii, 106 p. : *Ill., Bibl.* (DREA technical memorandum / Defence Research Establishment Atlantic ; 95/225) MICROLOG 96-07556 (2 fiche)

SAMPLE (Seismo-Acoustic Mode Program for Layered Environments) is a capable and general set of software tools for the modelling of time-harmonic wave propagation in stratified solid and/or fluid media. This report describes the mathematical framework underlying the code, which is capable of handling arbitrary combinations of mixed solid and fluid layers, terminated at the outer boundaries by either impenetrable or half-space boundary conditions. The code can compute the full vector displacement and tensor stress fields at arbitrary locations within the medium. The report introduces basic elastodynamic theory and then considers the formulation for one-dimensional stratification, the propagator-based solution of the two-point boundary value problem, scattering- and wave-based formulations, analytical approaches to the forced two-point boundary problem, global matrix methods, singular value decomposition, and normal modes.

Sampling and identification of forest tent caterpillar parasitoids in the prairie provinces

By Daryl J. Williams, David W. Langor and Dylan Parry. Edmonton : Natural Resources Canada, Canadian Forest Service, Northwest Region, Northern Forestry Centre, 1996. viii, 27 p. : *Ill., Bibl.* (Information report / Northern Forestry Centre (Canada) ; NOR-X-345 ISSN 0704-7673) ISBN 0-662-24157-6 CCG-P no. Fo46-12/345E MICROLOG 96-07539 (1 fiche)

Discusses methods for sampling, collecting, and rearing parasitoids of eggs, larvae, and pupae of the forest tent caterpillar, *Malacosoma disstria* Hubner, in the prairie provinces. Illustrated keys are provided for the identification of 42 Diptera and Hymenoptera species, which are parasitoids, hyper-parasitoids, and scavengers associated with the forest tent caterpillar. Of those species, 29 are known to associate with forest tent caterpillar in the prairie region, and another 15 occur in adjacent regions and are likely to occur there as well. A brief discussion is given of the biology, abundance, and probable role of each species identified. Includes glossary.

Seismicity and seismotectonics of the western Lake Ontario region : relocation of seismic events, phase III

By A.A. Mohajer. Ottawa : Atomic Energy Control Board, 1995. vi, 36 p. : Maps, Bibl. (Report / Canada. Atomic Energy Control Board ; INFO-0622)
MICROLOG 96-07663 (1 fiche)

Earthquake hazard analysis in Canada relies mainly on recorded earthquake data. The ability to record earthquakes of a given magnitude has varied considerably over time as has the accuracy of location determinations. Recomputation of earthquake locations has been suggested as a possible means of improving the existing data base for better definition of seismic sources. In this study, the locations of over 50 small to moderate magnitude earthquakes in the western Lake Ontario region were examined and an attempt is made to improve the hypocentral locations for those events which have sufficient input data to yield a better computational solution. The study concludes with a discussion of the regional seismotectonic framework, local seismogenic features, and suggested source zones.

Shipboard reception and use of high resolution imagery products

Canarctic Shipping Company. Montreal : Transport Canada, Policy & Coordination, Transportation Development Centre, 1995. xvi, 127 p. : ill., Bibl.
MICROLOG 96-07509 (2 fiche)

Presents results of the first phase of a project that examines the development of shipboard ice navigation technology systems and the use of high resolution image data as input to those systems. This program is intended to assist in the definition and development of the capability to deliver high resolution image-based ice information to ship-based users and to ensure that it can be used effectively.

A review of past work in the area of high resolution image transmission to ships was undertaken to define the context of the past and current capabilities in ice navigation systems utilising image information. An operational field trial was performed on the MV Arctic during fall 1993 to compare the shipboard requirements satisfied by existing ice navigation technologies, primarily data from aircraft reconnaissance, with that supplied by satellite-based technologies. Data from the trial was analysed to define the spatial and temporal ice information required by operators for the shipboard system. From this analysis and consideration of the image data inputs, communications, and data compression capabilities, a functional specification of the requirements for a shipboard system is defined.

A Snapshot of Canadian finances : provincial and federal budgets, 1993

By Anne Anderson. Toronto : Ontario Legislative Library, Legislative Research Service, 1993. 46 p. : Bibl. (Current issue paper / Ontario. Legislative Library ; no. 149 ISSN 0835-0299)
MICROLOG 96-07695 (1 fiche)

This paper aims to establish the broader context for the debate over the deteriorating financial condition of governments within Canada. It provides a snapshot of Canadian public finance through the most recent federal and provincial budgets. The first section compares the provinces' financial situations using basic indicators such as per-capita expenditures, revenues, and deficits. It also highlights some common themes such as fiscal plans to balance the budget or measures to reduce the cost of the public sector. The second section tabulates revenues, expenditures, deficits, and debt levels over the last five years for each province and the federal government, and outlines key initiatives announced in their latest budgets. Economic statistics are also included.

The Social charter : evolution of the concept in recent constitutional negotiations

By Alison Drummond. Toronto : Ontario Legislative Library, Legislative Research Service, 1992. 11 p. : Bibl. (Current issue paper / Ontario. Legislative Library ; no. 129 ISSN 0835-0299)
MICROLOG 96-07691 (1 fiche)

Among the industrialised states of the Organization for Economic Cooperation and Development, references in constitutions and official documents to rights to education, social assistance, and employment are commonly found, with more limited mention of health, housing, the environment, and culture. There are also regional and international conventions addressing social and economic rights. In the current round of negotiations on the Canadian constitution, the idea of a Social Charter for Canada came into prominence for the first time. This paper reviews Ontario's Initiation of discussion of a Social Charter, its proposal that such a charter be constitutionally entrenched, and the form such a charter would take; the reaction to the idea of a Social Charter from various federal and provincial committees; initiatives made toward agreement on a Social Charter; and the Charlottetown Agreement's 1992 proposal for a social and economic union.

Statistical review of Ontario's mineral industry in 1927 : classes for prospectors : mines of Ontario in 1927 : mining accidents in 1927

Toronto : Dept. of Mines, 1929. VIII, 215 p. : *III*. *Published as vol. XXXVII, part I, of the Ontario Dept. of Mines annual report, 1928.*
MICROLOG 96-07297 (3 fiche)

Document provides a summary of mineral statistics, comparative value of mineral production and total mineral production. It then covers some products: gold (with producing mines, Royal Mint, world output); silver-cobalt (shipments, refineries); nickel, copper and platinum (mining & smelting, refining, precious metals recovered); iron ore, pig iron, steel & ferro-alloys, coke; lead & zinc; diamond-drilling; non-metallic minerals; structural materials & clay. Classes for prospectors are discussed followed by information about specific mines in Ontario, grouped by product. The document concludes by looking at mining accidents including fatalities, infection, accidents from explosives & prosecutions.

Statistics report, 1994-95

Edmonton : Alberta Labour, Employment Pensions, 1995. 64 p. : *III*.
MICROLOG 96-07193 (1 fiche)

This report provides a brief description of the programs of Employment Pensions and an overview of activity, historically and over the past year specifically. It also examines the plans registered under the Act and covers such areas as plan membership and types of plans. It also covers features such as vesting, funding and solvency, and actuarial assumptions being used in defined benefit plans. As well, it examines some of the trends that have started to appear when compared with past reports and provides some observations and commentary on those trends. The information presented is based on the data received from plan sponsors and tabulated by the Branch.

The Status of members upon the dissolution of the Legislature

Prepared by: Philip Kaye ; revised by David Pond.
Toronto : Ontario Legislative Library, Legislative Research Service, 1990. 12 p. : *Bibl.* (Current issue paper / Ontario. Legislative Library ; no. 40
ISSN 0835-0299 ISSN 0715-9587
MICROLOG 96-07685 (1 fiche)

This paper examines the consequences for legislative members of the July 30, 1990 proclamation issued by the Lieutenant Governor dissolving the Ontario legislature. It reviews the general effects of dissolution on all members, on the premier, cabinet ministers, and parliamentary assistants, and on the speaker and deputy speaker. The paper then dis-

cusses the entitlements of members which continue after dissolution, including indemnity and expense allowances, accommodation expenses in Toronto, travel expenses, and support services. Finally, it outlines the legal status of members.

Stock assessment for British Columbia herring in 1995 and forecasts of the potential catch in 1996

By J.F. Schweigert, L. Hamer and C. Fort. Nanaimo, BC : Dept. of Fisheries & Oceans, Science Branch, Pacific Region, Pacific Biological Station, 1996. vii, 66 p. : *Ill., Bibl.* (Canadian technical report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2098 ISSN 0706-6457)
MICROLOG 96-07648 (1 fiche)

Herring are an important component of the British Columbia commercial fishery with catch records dating from 1877. Since 1983, herring fisheries have been managed with a fixed quota system in which catch levels are determined prior to the season based on a fixed percentage of forecast stock abundance. This report presents stock assessments from escapement and age-structured analytical models that were developed explicitly for B.C. herring. Both models reconstruct stock abundance from 1951 to last year and forecast pre-spawning abundance for the coming year. Forecasts of recruit spawners are presented as poor, average and good, based on historical recruitment levels. The report does not discuss the development and evaluation of empirical models for forecasting recruitment.

Une Stratégie en vue de remplir l'engagement du CCME en matière de prévention de la pollution

Conseil canadien des ministres de l'environnement. Toronto : le Conseil, 1996. 10 p. *L'éd. anglaise (A Strategy to fulfill the CCME...) sur la même fiche. En tête du titre: Réunion du Conseil canadien des ministres de l'environnement.*
MICROLOG 96-07260 (1 fiche)

En novembre 1993, le Conseil canadien des ministres de l'environnement publiait un document sur son engagement en matière de prévention de la pollution qui formulait une série de principes de na-

ture à guider la prévention de la pollution au Canada. Dans l'esprit de cet engagement, le Comité de protection de l'environnement a formé un groupe de travail en janvier 1995 en vue de développer davantage cet engagement. Le groupe a été chargé de recueillir de l'information sur l'état de la prévention de la pollution au pays et ailleurs, d'examiner la définition de la prévention de la pollution et d'autres enjeux stratégiques et de faire rapport sur ses conclusions. Cette stratégie est le fruit de ces travaux.

Study of the crosscorrelation properties of the 8-stage maximal length sequences for the testing of a time-integrating correlator (U)

By S. Faulkner and N. Brousseau. Ottawa : National Defence, Defence Research Establishment Ottawa, 1995. xi, 36 p. : *Ill., Bibl.* (Technical note / Defence Research Establishment Ottawa ; 95-9)
MICROLOG 96-07567 (1 fiche)

It is possible to detect spread spectrum signals buried in noise with specialised processing such as correlation. This technical note presents experimental and theoretical results on the properties of the cross-correlations of maximum length direct sequences (m-sequences) generated by an 8-stage shift register generator. The code correlation families and the relationship between full- and partial-period correlations are described. Results from software developed to study the cross-correlation properties are presented along with results obtained from an optical correlator and theoretical studies. Properties of partial-period correlations are also analysed and a generalisation to longer m-sequences is developed. The results from the optical correlator demonstrate whether it is possible to visually identify the m-sequence family associated with the cross-correlations for those which have the strongest features.

Sublethal toxicological stress in adult sockeye salmon, *Oncorhynchus nerka*, exposed to a combination of resin acid and salt water hypoxia

By J.S. Korstrom...et al. West Vancouver, BC : Dept. of Fisheries & Oceans, Science Branch, Pacific Region, West Vancouver Laboratory, 1996. vii, 83 p. : *Ill., Bibl.* (Canadian data report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 985 ISSN 0706-6465)

CCG-P no. Fs97-6/985E
MICROLOG 96-07516 (1 fiche)

Present hypoxic conditions exist in waters at the head of Alberni Inlet, British Columbia. These conditions are related to a naturally slow flushing rate and the effluent from a pulp and paper mill. This study examined the combined sub-lethal effects of hypoxic salt water and dehydroabietic acid (a wood processing waste contaminant) on adult sockeye salmon from the inlet. Changes in sustained swimming performance and respiratory frequency were used as indicators of sublethal effects. Assessment of swimming stamina consisted of exposing control and treatment groups of four fish for 24 hours to sublethal concentrations of the acid in an annular swim chamber under normal or hypoxic conditions. Fish were then challenged to swim in 20-degree-C fresh water for eight hours against a water velocity of 42 centimetres/second, simulating conditions encountered by the salmon during their spawning migration through Alberni Inlet.

Sudbury Basin area

By A.G. Burrows and H.C. Rickaby, Toronto : Dept. of Mines, 1930. iv, 55 p. : ill., Maps, Bibl. Published as vol. XXXVIII, part III, of the Ontario Dept. of Mines annual report, 1929. Fold. maps not filmed.
MICROLOG 96-07348 (1 fiche)

This report focuses on the zinc-lead-copper deposits of the Sudbury Basin area rather than its more famous nickel-copper deposits. It begins with an overview of the basin's general features and geology and then studies in detail the lithology of the basin's volcanic rocks of the Onaping series; the metamorphic effects of a micropegmatite on these rocks; sedimentary rocks in the basin (slate, sandstone); and intrusives, including acidic and basic intrusives and olivine diabase dikes. Subsequent sections cover structural geology (fault zones, concretion) and economic geology, including general characteristics of the zinc-lead-copper deposits and their origin, vein minerals, and mine properties. Descriptions are included of mine operations and mining claims.

A Summary of land resource and groundwater resource issues related to plains coal mine reclamation in Alberta

By Daphne B. Cheel...et al. Edmonton : Alberta Conservation & Reclamation Management Group, Reclamation Research Technical Advisory Committee, 1996. xiv, 99 p. : ill., Bibl. (Report / Alberta. Reclamation Research Technical Advisory Committee ; RRTAC OF-10) ISBN 0-7732-5050-6
MICROLOG 96-07457 (2 fiche)

Development and extraction of coal resources in Alberta disrupts the landscape and alters two other important resources, land and groundwater. To support environmentally responsible coal resource development, the Alberta Reclamation Research Technical Advisory Committee, in co-operation with the coal industry, guided research into plains coal reclamation. This report synthesises and summarises that research in a manner designed to provide the user with a unified source of information on land reclamation in the plains of Alberta. The first section of the report addresses questions that apply to the land resource, such as soil reconstruction, compaction, subsidence, and salinity. The second section addresses questions that apply to the groundwater resource, such as local and regional groundwater impacts, landscape impacts, and surface water and groundwater contamination potential.

Summary of reported Atlantic salmon (*Salmo salar*) catches and sightings in British Columbia and adjacent waters in 1995

By A.J. Thomson and Skip McKinnell. Nanaimo, BC : Dept. of Fisheries & Oceans, Biological Sciences Branch, Pacific Biological Station, 1996. iv, 29 p. : ill., Maps, Bibl. (Canadian manuscript report of fisheries and aquatic sciences / Canada. Dept. of Fisheries & Oceans ; no. 2357 ISSN 0706-6473)
MICROLOG 96-07472 (1 fiche)

In 1991, a joint federal/provincial program was initiated to monitor the presence of Atlantic salmon in British Columbia coastal streams. Based on recommendations following the first season of monitoring, the program was expanded to include monitoring in all B.C. waters (freshwater and marine) and a biological database was established. The monitoring program was established to increase the awareness of the presence of Atlantic salmon in B.C. waters; to expand the reporting of Atlantic salmon; to develop and maintain a database of the number of Atlantic salmon reported and/or observed in B.C.; and to prepare an annual report of catches or sightings. The biological sampling of available Atlantic salmon was expanded to include a variety of ageing and growth structures and tissues, and a biological database was also developed. The program was conducted by contacting individuals, mainly fisheries officers, conservation officers, community advisors, hatchery managers, and major commercial fish buyers, advising them to return or report all encountered Atlantic salmon. Catches of Atlantic salmon in the sales slip and mark recovery databases were reviewed also.

A Synthesis of information on effluent characteristics of municipal and non-pulp mill industrial sources in the Peace, Athabasca and Slave river basins

Sentar Consultants Ltd. Edmonton : Northern River Basins Study, 1996. vii, 121 p. : Maps, Bibl. (Northern River Basins Study project report / Northern River Basins Study (Canada) ; no. 79 ISSN 1192-3571) *Diskette not included with microfiche.* ISBN 0-662-24840-6 CCG-P no. R71-49/3-79E
MICROLOG 96-07235 (3 fiche)

The objective of this report is to compile and synthesize existing information from government and industry sources on the nature of liquid effluents from municipalities and non-pulp mill industries in northern Alberta river basins. Information was obtained from 16 continuously discharging municipal sewage treatment plants, 77 periodically discharging sewage plants, and 62 licensed industrial discharges such as oil sands plants, coal mines, cement plants, and wood products operations. Information presented includes: description of wastewater treatment methods used; releases of treated sanitary wastewater; quantity and quantity of sewage treatment plant data; characteristics (chemical, nutrient, microbial, toxicological) of sanitary wastewater discharges; industrial effluent characteristics; and impacts on the aquatic environment. Gaps in the data are also identified.

Systems integration study of a hierarchical minefield image analysis algorithm : final report

By Richard C. Vu and Mabo R. Ito. Ralston, AB : National Defence, Defence Research Establishment Suffield, 1995. 57 p. : ill., Bibl. (DRES contractor report / Defence Research Establishment Suffield ; CR 95-026)
MICROLOG 96-07570 (1 fiche)

Describes a study of systems integration of both hardware and software aspects of various modules in all levels of a remote minefield detection hierarchical algorithm. Begins by focusing on the study of the system integration of the low (target cueing) and middle (target shape analysis) levels of the algorithm, then investigates the high level (target spatial analysis) and finally introduces a data interface between the high level and an expert system. An expert system shell has been chosen to integrate data delivered from the high level, the user, and other sources to arrive at a final decision using

heuristic reasoning techniques. Processor requirements, data rate, system architecture, and topology are discussed.

Terrestrial and wetland ecosites of northwestern Ontario

By G.D. Racey...et al. Thunder Bay, ON : Ministry of Natural Resources, Northwest Science & Technology, 1996. iii, 112 p. : ill., Bibl. (NWST field guide / Ontario. Northwest Region Science & Technology ; FG-02) On title page: *Canada-Ontario Northern Ontario Development Agreement, Forestry.* ISBN 0-7778-5235-7
MICROLOG 96-07376 (2 fiche)

This guide provides a framework for classifying and mapping terrestrial and wetland ecosites (mappable ecological land units) in north-western Ontario. Ecosites are appropriate for describing and mapping forest ecosystems at a scale compatible with the Ontario Forest Resources Inventory and operational forest management planning. The classification of ecosites presented in the guide is based on data and experience from north-western Ontario. The guide describes 40 forested and wetland ecosites and provides fact sheets, ecosite keys to aid in identification, and information to support the understanding, interpretation, and application of ecosites. Appendices include lists of common and scientific names of plant species, and background information on the process of developing ecosites.

Think globally, search locally : a strategic plan for the implementation of a multitype library system in Saskatchewan

Regina : Minister's Multitype Library Development Advisory Committee, 1996. 24 p. : Bibl. ISBN 0-919059-78-3
MICROLOG 96-07123 (1 fiche)

A multitype library system is a co-operative system in which any two or more types of libraries participate to deliver library services. This document provides an overview of a strategic plan to develop a multitype library system for Saskatchewan in which the Provincial Library will be one of the partners. The first part of the plan outlines the course for future development of libraries in the province, including the possible partners in the multitype library system, their roles, and trends in provincial library services. The second part contains the detailed implementation plan, including values and principles, goals and objectives, specific strategies, and funding principles.

Threatening a member : recent cases of privilege from Alberta

By Robert Reynolds. Victoria : Assn of Parliamentary Counsel in Canada, 1996. 12 p. : Bibl. *Originally presented at the Association of Clerks-at-the-Table Professional Development Seminar.*
MICROLOG 96-07698 (1 fiche)

In Alberta, during the spring sitting of the fourth session of the 23rd Legislature, there were two instances of members being threatened with legal action for comments that may have been or were made in the Assembly. In both cases, the Speaker ruled that prima facie breaches of privilege existed. This paper reviews the factual situations of the two

cases of privilege and discusses the authorities that are relevant to the Speaker's rulings. The paper concludes with comments on some of the implications for cases of privilege relating to a member's freedom of speech in light of Canadian jurisprudence and contemporary attitudes.

Three-year business plan, 1996-98

Alberta. Safety Codes Council. Edmonton : The Council, 1996. 34 p.
MICROLOG 96-07443 (1 fiche)

The Alberta Safety Codes Act consolidated seven previous pieces of safety legislation into one statute and covers safety standards and code regulations for nine disciplines: amusement rides, boilers and pressure vessels, buildings, electrical, elevators, fire prevention, gas, plumbing, and passenger ropeways. The Safety Codes Council derives its mandate from the Act and from the Minister of Labour to recommend codes and standards for the above disciplines, administer a system to accredit organisations to carry out specific activities under the Act, develop and administer a program to certify safety codes officers, administer an appeal process, and promote uniform safety standards. This document states the Council's mandate, mission, vision, and values, and describes its structure, partner roles and responsibilities, accomplishments in 1995, staffing, issues being addressed, goals, and objectives. A table is included giving actions, target dates, expected results, and performance indicators for a number of action plans intended to meet the Council's goals.

Transportation reform, Bill C-101

By John Christopher. Ottawa : Library of Parliament, Research Branch, 1995. 9 p. (Background paper / Canada. Library of Parliament ; BP-404E) *French ed. (Réforme des transports...)* on the same fiche. ISBN 0-660-15366-7 CCG-P no. YM32-2/404E
MICROLOG 96-07321 (1 fiche)

On June 20, 1995, the Minister of Transport tabled Bill C-101, the Canada Transportation Act. The legislation is intended to modernize and streamline rail regulation, promote the formation of short-line railways, ensure that shippers continue to have access to competitive transportation services, eliminate unnecessary regulation in other modes of transport, and place greater emphasis on commercial decision-making in the transport sector. Specific clauses of the bill are dealt with in the following parts of this paper.

Two-phase counter-current flow limitations in complex piping systems

By D.G. Noel, M. Shoukri and A. Abdul-Razzak. Ottawa : Atomic Energy Control Board, 1995. v. 85 p. : *Ill.*, *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0620)
MICROLOG 96-07664 (1 fiche)

Reports on a project to experimentally examine the nature of counter-current flow limitations in complex piping geometries which are geometrically similar to a Candu feeder, and to develop empirical

relations for the onset of flooding and the zero-liquid penetration limits in such a geometry. Experiments were performed for adiabatic air-water counter-current flow in test sections. One section represented the complexity of Candu feeders at 1:4 scale; in the second section, the effect of declining the horizontal parts of the original test section was investigated. The experiments were designed to evaluate the effect of test procedure on the flooding limits. Accordingly, for a given liquid flow rate, the flooding limits were obtained by both increasing and decreasing the gas flow rate. The experimental results also included visual observation of the various flow regimes encountered between the two flooding limits. These observations are summarised in flow regime maps.

Urban contamination and dose model

By E. Robertson and P.J. Barry. Ottawa : Atomic Energy Control Board, 1995. v. 42 p. : *Bibl.* (Report / Canada. Atomic Energy Control Board ; INFO-0600)
MICROLOG 96-07667 (1 fiche)

Accidental releases of radionuclides to the atmosphere in built-up areas result in radiological exposure pathways that differ from those caused by releases in rural environments. It is important to assess the potential exposures and to estimate the cost-effectiveness of dose reduction measures in urban environments. This report describes a model developed to help carry out such assessments. The model draws heavily on experience gained in European cities after their contamination by fallout from the Chernobyl incident. Input to the model is time-integrated concentrations of specific radionuclides in urban air, obtained either by direct measurement or by prediction using an atmospheric dispersion model. The code includes default values for site-specific variables and transfer parameters but the user can enter other values if desired. Output is the time-integrated dose rates for individuals selected because of their characteristic living, working, and recreational habits. An accompanying manual documents the technical background on which the model is based and leads a first-time user through the various steps and operations encountered while the model is running.

Use of instrumented wheelset to quantify coal car performance under increased axle load conditions

By Wilson Pak and Allan E. Kendrick. Montreal : Transportation Development Centre, 1996. xii, 71 p. : *Ill.*, *Bibl.*
MICROLOG 96-07501 (1 fiche)

Details the work successfully conducted by CP Rail to acquire two instrumented wheelsets and to quantify the in-service load environment of a 100-ton bathtub coal car under increased axle load conditions using this technology. A special test consist was used on CP Rail mainline revenue track in western Canada to gather test data. The results show whether the instrumented wheelset is a practical tool to accurately assess freight car truck performance, and whether the wheelset could also be used as a track force surveying tool to assist the track geometry car for track defect detection. Results discussed relate to vertical dynamic performance, centre plate torque, and lateral and longitudinal curving performance.

Using opportunity costs to assess the economic impact of spruce budworm defoliation

By Stig Andersen, John M. Lawson and Derek F. Dool. Sault Ste. Marie, ON : Natural Resources Canada, Canadian Forest Service - Ontario, 1995. 4 p. : ill., *Bibl.* (Technical note / Canadian Forest Service, Ontario Region ; no. 19 ISSN 1183-2762) ISBN 0-662-23425-1 CCG-P no. Fo 29-29/19E MICROLOG 96-07485 (1 fiche)

In 1984, studies were initiated to develop and test a practical methodology to gauge the economic consequences of extensive spruce budworm (*Choristoneura fumiferana*) defoliation, either incipient or anticipated. The first stage was completed in 1987 and the second stage is now complete. The result of the second stage work is an analytical framework designed to facilitate the exploration of 'what if' scenarios. Application of the framework focuses on the determination and interpretation of differences in timber recovery costs (in essence, a measure of opportunity costs). This paper illustrates the concept of opportunity costs for a hypothetical forest and an imminent spruce budworm outbreak, showing costs of taking protective measures or of doing nothing. It also outlines the components of the analytical framework developed and describes tests of the framework using forest resource inventory data. CA FO ND ON SC

Utilization of aspen fire kill for pulp quality

By Randy W. Lowe. Edmonton : Alberta Environmental Protection, 1996. iv, 16 p. : ill. On cover: *Forest Development Research Program. At head of title: Manning Diversified Forest Products Research Trust Fund.* ISBN 0-7732-5064-6 MICROLOG 96-07451 (1 fiche)

Pulp mills are reluctant to use wood from the many stands of fire-killed aspen in Alberta because of concerns with contamination of bleached pulp from carbon originating from the burnt tree. The project described in this report had the objective of determining the amount of carbon in a representative sampling of some burnt aspen logs and to determine whether the logs could be used to make bleached kraft pulp. Eight logs of fire-killed aspen were processed and pulped, and carbon determinations were performed on prepared pulp samples using a stereo microscope. Results are also included with regard to pulp yield and strength. Recommendations are made on the utilisation of fire-killed wood for pulping. AL FO PR SC

Validation des facteurs de qualité et de rendement (forêt-sciage) en fonction des bénéfices globaux : projet no 4037

Par Georges E. Pagé. Ottawa : Ressources naturelles Canada, Service canadien des forêts, 1996. vi, 77 p. : ill., *Bibl.* Sur la couv.: *Essais, expérimentations et transfert technologique en foresterie. Financé en vertu de l'Entente auxiliaire Canada-Québec sur le développement économique des régions du Québec.* Sur la page de titre: *For International Itée.* ISBN 0-662-81349-9 GCC-E no Fo29-39/52-1996F MICROLOG 96-07543 (1 fiche)

Ce projet avait pour but d'évaluer les liens et influences entre les méthodes de récolte et le rendement des procédés de transformation du bois d'œuvre, grâce au regroupement d'organismes spécialisés tels FERIC pour la récolte, FORINTEK pour la transformation et la participation de deux industriels du sciage, l'un qui produit des colombages et l'autre du bois d'œuvre de longueurs assorties. L'essai en forêt devait permettre d'évaluer les avantages et inconvénients entre les méthodes de récolte d'arbres entiers et de bois tronçonnés. Le tronçonnage en forêt versus le tronçonnage à l'usine a été analysé. Un échantillon de 80 m3 a été

étudié pour chaque méthode de récolte. CA FO ND QU SC

Velocity and inert scalar measurements in rocket plumes : final contract report

By J.P. Sislian. Courcellette, PQ : Defence Research Establishment Valcartier, 1992. xxvi, 410 p. : ill., *Bibl.* On cover: *University of Toronto Institute for Aerospace Studies.* MICROLOG 96-07564 (5 fiche)

Describes an experimental investigation of the flow fields of a pre-mixed hydrogen-air flame and isothermal air jet exhausting vertically into a coaxial air stream in the presence and absence of a base. The experiments were designed to compare the turbulence structures of the two cases and to obtain data for evaluation and refinement of mathematical models of turbulence. Flow field visualisation was achieved using Schlieren photography, and a laser Doppler velocimeter was employed to make systematic measurements of the mean and fluctuating flow quantities. The axial turbulence microscale was determined from the measured longitudinal spatial correlation coefficient, and mean temperature was measured with a thermocouple. The results of the investigation provide a valuable database for mathematical modelling of turbulence in high Reynolds number combustors and isothermal coaxial jets. CA ND PS SC

Vers le remplacement de la taxe sur les produits et services

Ottawa : Ministère des finances Canada, 1996. 108 p. L'éd. anglaise (*Towards replacing the Goods...*) : 96-05904/1. MICROLOG 96-07604 (2 fiche)

Le gouvernement du Canada propose un train de mesures qui représentent un progrès important vers le remplacement de la taxe sur les produits et services. La signature du protocole d'entente entre le gouvernement fédéral et les gouvernements de la Nouvelle-Écosse, du Nouveau-Brunswick et de Terre-Neuve et du Labrador marque une importante première étape vers la mise en place d'une taxe de vente fédérale-provinciale intégrée. Puisque le processus d'harmonisation avec la province de Québec sera complété cette année, le gouvernement s'est donné pour mission de travailler avec les autres provinces pour étendre le régime à l'échelle du pays. Le gouvernement propose en outre plus de cent mesures pour rationaliser et simplifier l'application de la taxe de vente du Canada. Ces mesures sont une partie essentielle de la nouvelle structure d'un régime qui sera grandement amélioré. Ensemble, ces initiatives représentent un pas important vers une réforme réfléchie de la taxe de vente. Elles profiteront à la fois aux consommateurs, aux contribuables et aux entreprises, particulièrement aux petites entreprises. CA DE PA SS

Water plant optimization study, Amherstburg, Amherstburg area water supply system : project no. 7-2031

Toronto : Environment Ontario, 1991. vii, 277 p. : Ill. Cover title: *Water treatment optimization study, Amherstburg area water supply system.*
ISBN 0-7729-3306-5
MICROLOG 96-07380 (3 fiche)

The Amherstburg Area Water Treatment Plant was designed to supply treated water to a large industrial plant as well as to residents of Amherstburg and the townships of Anderdon, Colchester North, and Malden. The demand for industrial water did not materialise and as a result, the plant operates at less than 50% of capacity. The purpose of this study is to describe the present condition of the plant with respect to equipment and operation as well as to provide information regarding the quantity and quality of raw and finished water. The report attempts to make recommendations that will allow the plant to operate in an optimum condition so that the best possible finished water quality is achieved, with emphasis on particulate removal and disinfection. The approach is to optimise the existing facilities and recommend short- and long-term improvements.

Were small producers the engines of growth in the Canadian manufacturing sector in the 1980s?

By John R. Baldwin. Ottawa : Statistics Canada, Analytical Studies Branch, 1996. 41 p. : Ill., Bbl. (Research paper series / Statistics Canada. Analytical Studies Branch; no. 88) French ed. (*Les Petits producteurs...*) on the same fiche.
ISSN 1200-5223 ISBN 0-660-16636-4
SCC 11F0019MPE no. 88
MICROLOG 96-07597 (1 fiche)

Small firms are often seen to be the engines of growth. There are two main sources of empirical evidence that are adduced to support this conclusion. The first is that job creation has been coming mainly from small firms. The second is that the share of employment accounted for by small firms has increased in the past two decades. Both of these sources rely on a simple metric, employment. This paper asks whether changes in this metric affect the view of the role that small firms play in the growth process.

What we heard : a report on public consultations on conserving old growth red and white pine

By Jeff Solway. Sudbury, ON : Old Growth Policy Advisory Committee, 1993. 43 p. Bilingual summary (4, 4 p.) laid in. ISBN 0-7778-1279-7
MICROLOG 96-07676 (1 fiche)

In 1992, the Ontario Ministry of Natural Resources established an Independent Policy Advisory Committee to develop recommendations for conserving old growth forest ecosystems in Ontario. Its first task was to develop recommendations for red and white pine forests. As part of this task, the Committee conducted a public consultation program. To help stimulate discussion, it presented a set of options for conserving red and white pine, including full protection of existing old-growth stands, continued logging under existing regulations, and a continuum of intermediate options. This report begins with a review of the nature of old growth forests, their succession and age classes, and forest classification. It then summarises input from the public consultations, with regard to the following issues: protection of old-growth forests; economic aspects of protection; regional concerns; and strategic implications, including re-orienting of commercial forestry and the institutional challenges involved in old-growth protection.

Windows Integrated Marine Management Environment (WIMME) and support infrastructure study

By R. Basu...et al. Montreal : Transport Canada, Transportation Development Centre, 1995. xlib, 69 p. : Ill., Bbl. On cover: *MIL Systems.*
MICROLOG 96-07508 (2 fiche)

Current shipboard application software could be described as many single-application programs with limited ability for intercommunication. A need is perceived for a data exchange, formatting, and sequencing software package that would enable inter-application transparency in the Windows operating environment. This package is identified as the Windows Integrated Marine Management Environment (WIMME). This report addresses the requirements of WIMME within the context of vessel operations and investigates the feasibility of developing network data communication infrastructure based on power line technology. Vessel operational information requirements are examined and an outline requirements specification for WIMME is presented. A survey of existing shipboard operations and management software was undertaken to determine the functions currently served and to consider them in the light of concepts for WIMME applications. Cost estimates for retrofit installations are developed and the broader issues related to the commercial potential of a data exchange package such as WIMME are discussed.

Women in Canada : socio-economic status and other contemporary issues – Rev.

By Sandra Harder. Ottawa : Library of Parliament, Research Branch, 1995. 26 p. : *Bibl.* (Current issue review / Canada. Library of Parliament. Research Branch ; 91-5E) *French ed. (Les Femmes au Canada : situation...) on the same fiche.* Revised 19 July 1995. ISBN 0-660-16337-3 CCG-P no. YM32-1/91-5-1995-07E
MICROLOG 96-07324 (1 fiche)

Although a great deal of attention has been directed to the issue of women's status in Canada, women continue to face conditions that set them apart from men in our society. For example, Canadian women on average continue to earn less than men. This is reflected in the greater risk of poverty for women than for men, which is often linked to the inability of some women to leave violent living situations. This paper looks at the socio-economic status and other contemporary issues concerning women in Canada.

MICROLOG 96-07654 (1 fiche)

This year resulted in a reorganization of the operating environment for the Technology Development Unit. The North Bay Unit is now known as the Central Region Science and Technology Development Unit. This report presents programs on provincial growth and yield, forest ecosystem classification, vegetation management alternatives, forest habitat, hardwoods, conifers, and sustainable forestry initiatives. Provides information for each program, including project title and number, objectives, proponent, contacts, current and subsequent year activities, timelines, and current year funding. A summary of funding by sources concludes this report.

Work plan, 1993-94

Ontario. Central Ontario Forest Technology Development Unit. North Bay, ON : The Unit, 1994. 16 p.
MICROLOG 96-07653 (1 fiche)

The Unit is divided into various technical program areas. Four programs: conifer, hardwoods, forest habitat and systems, comprise the base workplan, and four additional programs: vegetation management alternatives, growth and yield, forest ecosystem classification and forest demonstration, are implemented under the auspices of the Sustainable Forest Initiatives Program. This report provides information for each program, including project title and number, objectives, proponent, contacts, current and subsequent year activities, timelines, and current year funding. A summary of funding by source, concludes this report.

Workers' Compensation Board of British Columbia : Annual report 1995

Vancouver, BC : The Board, 1996. 44 p. : *Ill.*, *Bibl.*
MICROLOG 96-07224 (1 fiche)

The annual report explains the mandate of the Board's departments including occupational safety and health, compensation and medical services, financial services and administrative services. Includes financial statements which incorporate data on claims for the year.

BC LA PR SS ST

Workers' Compensation Board of Prince Edward Island : Annual report 1995

Charlottetown : The Board, 1996. II, 48 p. : *Ill.*
MICROLOG 96-07201 (1 fiche)

Annual report presents a corporate review and a summary of benefit changes, an auditor's report, a

balance sheet, statements of operations and unfunded liability, and of cash flows, notes to financial statements, and a schedule of administration expenditure. Statistics are included on operations and expenditure, claims, costs and assessments by years, month and locality of accidents or occurrence, weeks of duration, nature and region of injury, and cause of accidents.

Your Ontario, your choice : a preliminary look at the referendum alternative

Toronto : The Province, 1996. 45 p. : *Bibl.* *French ed. (L'Ontario vous appartient...) on the same fiche.*

MICROLOG 96-07632 (1 fiche)

This paper is the start of an extensive and full dialogue with Ontarians about how best to implement a referendum strategy for Ontario. The document looks at the following points: situation; the referendum alternative; constitutional and legal implications; the referendum experience; implementation; and, making yourself heard.

Yukon Index to mining assessment reports, 1995

Whitehorse : Indian & Northern Affairs Canada, Yukon Region, Exploration & Geological Services Division, 1995. 361 p.
MICROLOG 96-07397 (4 fiche)

Index listing technical reports covering diamond drilling; geological, geochemical and geophysical surveys; and preliminary and feasibility studies submitted as evidence of the performance of representation work on mineral claims and prospecting permits. Both confidential and released reports are listed with the pending release date (year, month and day) indicated for the confidential reports. Yukon assessment reports are released from confidential status when the claims lapse. Reports that were submitted through the Atomic Energy Control Board remain confidential unless released by the company which submitted them.

Agriculture

Agri-Food Innovation Fund : strategic overview.
96-07121/1
Agricultural programs, 1995-96. 96-07367/2
An Agriculture 2000 strategy, addressing issues :
progress report, 1995. 96-07113/1
Agriculture biotechnology report. 96-07116/1
Agriculture Financial Services Corporation (Alta.) :
Annual report 1995-96. 96-07647/1
Alberta Dairy Control Board : Annual report
1994-95. 96-07343/1
British Columbia. Ministry of Agriculture, Fisheries
& Food : Annual report 1993-94. 96-07168/1
British Columbia. Ministry of Agriculture, Fisheries
& Food : Annual report 1994-95. 96-07109/1
British Columbia. Provincial Agricultural Land
Commission : Annual report 1994-95.
96-07173/1
Concentrations and variability of major, minor and
trace elements in soils and crops from two humic
gleysol fields in southeastern Ontario, Canada.
96-07252/1
Directory of personnel, 1996. 96-07307/1
Grain elevators in Canada : crop year 1996-97.
96-07464/2
Input costs and the agriculture and food sector :
progress report. 96-07162/1
Manitoba agricultural review, 1995. 96-07605/1
Nova Scotia farm management analysis project,
1994. 96-07339/1
Nova Scotia. Plant Industry : Annual report 1995.
96-07309/1
Okanagan Valley Tree Fruit Authority (B.C.) :
Annual report 1994-95. 96-07178/1
Okanagan Valley Tree Fruit Authority (B.C.) :
Annual report 1995-96. 96-07179/1
A Program to assess the impacts and benefits of
composted source-separated solid wastes
(CSSSW) applied to agricultural lands : National
Agricultural Compost Trial. 96-07233/2

Programs for Industry development, 1996-97.
96-07356/1
Project reports, 1995. 96-07272/2
Recommandations pour les cultures fruitières,
1996-97. 96-07611/3
Report of the Farm Support Review Committee on
crop insurance. 96-07126/1
Report of the Ombudsman's opinion, reasons
therefor, and recommendations following his
investigation into the complaint of Farm Q
Limited. 96-07625/1
Silos à grains du Canada : campagne agricole
1996-97. 96-07464/2

Alberta

Accumulation of fish mixed function oxygenase
inducers by semipermeable membrane devices
in river water and effluents, Athabasca, Peace
and Wapiti rivers, August and September, 1995.
96-07158/1
Agriculture Financial Services Corporation (Alta.) :
Annual report 1995-96. 96-07647/1
Alberta. Alberta Advanced Education & Career
Development : Annual report 1995-96.
96-07468/1
Alberta. Alberta Education : Annual report and
annual results report 1995-96. 96-07463/2
Alberta. Alberta Federal & Intergovernmental
Affairs : Annual report 1995-96. 96-07577/1
Alberta. Alberta Health : Annual report 1995-96.
96-07474/2
Alberta. Alberta Municipal Affairs : Annual report
1995-96. 96-07469/1
Alberta. Alberta Treasury : Annual report 1995-96.
96-07447/1
Alberta. Appeals Commission : Annual report
1995. 96-07403/1
Alberta apprenticeship and industry training
system : historical overview, April 1, 1994 to
March 31, 1996. 96-07438/1
Alberta business outlook for 1996-97. 96-07446/1

Alberta Dairy Control Board : Annual report
1994-95. 96-07343/1
Alberta Environmental Appeal Board : Annual
report 1994-95. 96-07134/1
Alberta government systems inventory, 1995.
96-07154/2
Alberta government systems inventory, 1996.
96-07169/2
Alberta Heritage Savings Trust Fund : Annual
report 1995-96. 96-07461/2
Alberta Liquor Control Board : Annual report
1995-96. 96-07612/1
Alberta Lotteries : Annual report 1995-96.
96-07613/1
Alberta. Mental Health Patient Advocate Office :
Annual report 1995. 96-07471/1
Alberta. Ministry of Energy : Annual report
1995-96. 96-07594/2
Alberta. Premier's Council on the Status of
Persons with Disabilities : Annual report 1995-96.
96-07473/1
Alberta. Private Colleges Accreditation Board :
Annual report 1995-96. 96-07155/1
Alberta Securities Commission : Annual report
1995-96. 96-07476/1
Alberta traffic collision statistics, 1995. 96-07151/1
Alberta transfer guide : a guide to transfer credit at
Alberta post-secondary institutions, 1996-97.
96-07287/3
Alberta. Victims' Programs Assistance Committee :
Annual report 1995-96. 96-07475/1
Alberta. Vital Statistics Division : Annual review
1995. 96-07465/1
Alberta's energy resources : 1995 in review.
96-07342/1
Assessing pulp mill contamination using
morphological deformities in chironomid larvae
(Diptera Chironomidae) upper Athabasca River,
April, 1992. 96-07156/1
Assessment of log yard runoff in Alberta :
preliminary evaluation. 96-07431/1

- An Assessment of the utility of benthic macroinvertebrate and fish community structure in biomonitoring, Peace, Athabasca and Slave River basins. 96-07359/3
- Benchmarks for Alberta's post-secondary education system : a discussion paper. 96-07432/1
- BONAR, a database for benthos of Peace, Athabasca and Slave River basins : user's guide. 96-07362/1
- Boreal Wood Centre, Manning, AB : project update, 1995-96. 96-07455/1
- A Compilation of archived writings about environmental change in the Peace, Athabasca and Slave River basins. 96-07159/1
- Cooperative Fisheries Inventory : progress report #1. 96-07450/1
- Coordinated physiotherapy services within the Community Rehabilitation Program. 96-07251/1
- A Database of environmental samples collected and analysed for the Northern River Basins Study. 96-07360/2
- Dissolved oxygen conditions and fish requirements in the Athabasca, Peace and Slave rivers : assessment of present conditions and future trends. 96-07270/2
- Ecotoxicology of suspended and bottom sediments, Athabasca, Smoky and Peace rivers, June, 1995. 96-07157/1
- ECS program unit funding : a handbook for ECS operators, 1996-97. 96-07442/1
- Effects of watershed characteristics and disturbances on the water quality of two boreal streams. 96-07453/1
- Evaluation of the Canada-Alberta Partnership Agreement in Forestry. 96-07563/5
- Fish collections, Peace, Athabasca and Slave River basins, September to December, 1994. 96-07357/3
- Five years of HIV/AIDS research : practical lessons learned. 96-07671/1
- Genetics, growth and yield, timber quality and pest hardiness of forests in the Peace Region. 96-07448/1
- Geographic and temporal variations of selected respiratory diseases in Strathcona County and Fort Saskatchewan. 96-07433/1
- Growth, development and yield of mixed-wood stands in Alberta following partial cutting of white spruce. 96-07479/1
- Harvesting overmature aspen stands in central Alberta. 96-07534/1
- Hydraulic flood routing models of the Peace and Slave rivers, Hudson Hope to Great Slave Lake. 96-07234/2
- Inhalable particulate matter in Edmonton and Calgary from 1984 to 1993. 96-07614/2
- Local Authorities Pension Plan : Annual report 1995. 96-07462/1
- Lost-time claims and claim rates : summary, 1994. 96-07153/1
- Lost-time claims and claim rates : summary, 1995. 96-07152/1
- Management plan for white-tailed deer in Alberta. 96-07456/2
- Mobile monitoring survey of the City of Grande Prairie, June 7 and 9, 1994. 96-07436/1
- Mobile monitoring survey of the City of Red Deer, February 26, 1996. 96-07434/1
- Motifs de décision relativement à Express Pipeline Ltd., demande datée du 8 juin 1995, dans sa version modifiée, visant le projet Express Pipeline : OH-1-95. 96-07256/1
- Moving to competition, a guide to Alberta's new electric industry structure. 96-07435/1
- Northern River Basins Study : Annual report 1995-96. 96-07372/1
- An Overview of streamflows and lake levels for the Peace, Athabasca and Slave River basins. 96-07361/1
- A Perception survey of forest fire research needs for west-central Canada. 96-07478/2
- Pileated woodpecker habitat ecology in boreal forests : project update, 1995-96. 96-07452/1
- Proceedings of the Northern River Basins Study Instream Flow Needs Workshop. 96-07358/3
- Programs and services reference guide, descriptive only, 1996-97. 96-07191/1
- Public accounts, vol. 2-4, 1995-96. 96-07533/12
- Quantifying extreme winds : experiments aimed at reducing wind damage to released white spruce understoreys. 96-07449/1
- Recommendations of the Premier's Task Force on Construction Contracts. 96-07437/1
- The Report of the Chief Electoral Officer on the Redwater by-election held Tuesday, May 21, 1996. 96-07652/1
- A Review of population health status in northern Alberta. 96-07378/1
- A Review of the literature on the removal of organic chemicals from drinking water. 96-07232/1
- Rhizome growth of *Calamagrostis canadensis* in response to soil nutrients and bulk density. 96-07454/1
- Sampling and identification of forest tent caterpillar parasitoids in the prairie provinces. 96-07539/1
- Special education funding : a handbook of procedures and definitions, 1996-97. 96-07440/1
- A Spill response model, user's manual. 96-07364/1
- Statistics report, 1994-95. 96-07193/1
- A Summary of land resource and groundwater resource issues related to plains coal mine reclamation in Alberta. 96-07457/2
- Supplementary estimates : general revenue fund, 1996-97. 96-07135/1
- A Synthesis of information on effluent characteristics of municipal and non-pulp mill industrial sources in the Peace, Athabasca and Slave river basins. 96-07235/3
- Teacher resources catalogue, 1996. 96-07441/1
- Threatening a member : recent cases of privilege from Alberta. 96-07698/1
- Three-year business plan, 1996-98. 96-07443/1
- Universities Academic Pension Plan : Annual report 1995. 96-07406/1
- Utilization of aspen fire kill for pulp quality. 96-07451/1
- Water quality update 1995, Parly Creek-Buffalo Lake Water Management Project. 96-07439/1
- Wild Rose Foundation (Alta.) : Annual report 1995-96. 96-07470/1
- ### Atlantic Provinces
- Aging in place : strategies to meet the needs of senior tenants in non-profit housing. 96-07430/2
- Agricultural programs, 1995-96. 96-07367/2

Other Canadian Reference Sources

- Available from Micromedia -

Canadian Index

A comprehensive index providing access to nearly 100,000 citations each year from: nine major daily newspapers, over 200 Canadian trade and business periodicals, over 50 specialized Canadian trade magazines for which indexing is unavailable elsewhere, and more than 350 general periodicals.

KIOSK: CBCA

KIOSK: CBCA is a reference tool which combines a high quality indexing and abstracting database (CBCA) with direct access to the fulltext content of the articles indexed.

CBCA Fulltext

CBCA Fulltext provides fulltext access to Canadian periodicals and current affairs information, and incorporates the largest and most-comprehensive subject guide to periodical literature. CBCA Fulltext allows searching on Windows, Macintosh, DOS and UNIX platforms.

CBCA OnDisc

CBCA OnDisc is the Knight Ridder CD-ROM version of the Canadian Index, giving you access to ten years of indexing. It includes every citation in the Canadian Index, plus thousands of informative abstracts which do not appear in the print edition.

KIOSK: Maclean's

Published in cooperation with Maclean's magazine, KIOSK: Maclean's contains every article and news report published by Canada's Weekly Newsmagazine over an eight year period.

CNI Clips: Press Clippings on Microfiche

CNI Clips is a unique service which provides the full text of more than 40,000 Canadian Press news stories and feature articles each year, and is delivered in a practical and economical microfiche format.

Canadian Education Index

Canadian Education Index covers more than 200 Canadian education periodicals, as well as reports and monographs from the educational research community across Canada. In addition, the Index covers report literature from government agencies, educational faculties and teachers' associations, and large school boards.

Canadian Education Index Thesaurus

Canadian Education Index Thesaurus is a bilingual controlled vocabulary of over 5,000 terms, developed for the indexing and retrieval of French or English-language material in Canadian education, and is an invaluable research aid for users of the Canadian Education Index.
